

Geography

About the Course

Discover the earth's continents, the changing seasons, latitude and longitude, map-making, and topographical features. Use a globe, wall maps, and models to explore the concept of place by taking an in-depth look at "home" in North America. Students make models and maps of places that are important to them such as their room, home, and yard.

Placement & Combining Tips

All students in Grade 1 should take this course. Students in Grades 2-3 who have never studied geography may also benefit, though they could likely work at a faster pace.

Scheduling

GRADE	SCHEDULE INFO.	BOOKS
1	Geography: Grade 1 2 times/week 15 min	Down Comes the Rain Elementary Geography Me on the Map The Reasons for Seasons What Makes Day and Night United States Atlas 7th Ed.

How To Teach

Overview

The steps below are generally true for most geography lessons. Sometimes several lessons might build together or focus on a particular area (like Map Work).

Introduce

Through questions, observations, an activity, or recalling the last lesson, introduce the topic for the day.

Read

Read and narrate from the assigned book.

Practice

This can include things like demonstrations and map-making.

Map Work

This includes things like answering questions on the map or making your own maps.

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) 

Term 1

WEEK 1

15m Geography: Grade 1 - Lesson 1

Shape of Earth

 Materials: Elementary Geography, orange or styrofoam ball, pen or marker

→ **READ, NARRATE, & DISCUSS**

Lesson 1-2 p.3-6 "Sun, Moon, and" - "fourth lesson."

→ **DEMONSTRATE**

Using the ball or orange, demonstrate the activity from p.6.

★ **TEACHER TIP**
Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

WEEK 1

15m Geography: Grade 1 - Lesson 2

Shape of Earth cont'd

 Materials: Elementary Geography, globe, a small object like a toy car

→ **RECAP**

What did you read last time?

→ **OBSERVE**

Place the car or small object on the globe and start spinning the globe slowly. If you continue to do this, are there times you cannot see the object? If so, when?

→ **READ, NARRATE, & DISCUSS**

Lesson 4 p.11-12 "We cannot go" - "as the land."

WEEK 2

15m Geography: Grade 1 - Lesson 3

The Earth Turns

 Materials: What Makes Day & Night, ball

→ **RECAP**

What did you read last time?

→ **DEMONSTRATE**

Can you spin a ball on your finger? Try it.

→ **READ, NARRATE, & DISCUSS**

p.6-15 "We all live" - "day and night."

WEEK 2

15m Geography: Grade 1 - Lesson 4

The Earth Turns

 Materials: What Makes Day & Night, lamp

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

p.16-24 "Imagine you" - "from night to day."

WEEK 3

15m Geography: Grade 1 - Lesson 5

Sunrise and Sunset

 Materials: What Makes Day & Night

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

p.24-30 "You can see" - "the planet earth."

WEEK 3

15m Geography: Grade 1 - Lesson 6

Build a Model

 Materials: blocks, Legos, or other objects

→ **RECAP**

What did you read last time?

→ **MODELING DAY**

Use blocks, Legos, or other objects to make a model of a room (bedroom, classroom, etc.), making sure to orient the model so that it is parallel to the room. See picture for an example.

→ **VIEW**

∞ Image Link: Room Model

∞ Image Link: Model Showing Orientation

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) QR

Term 1

→ NOTE

Keep model for next and other future lessons, or take a picture so you can easily rebuild it.

WEEK 4

15m Geography: Grade 1 - Lesson 7

Hide & Seek with Model

Materials: model of room from the previous lesson, a penny or another small object, a small sticker or sticky note

PREP: Hide one object in the room. Place a sticker or other marker on the model to show where it is hidden.

→ RECAP

What model did you make last week?

→ PLAY

Have student look at the model to determine where the object is hidden and then go find it. Take turns hiding and finding objects.

→ VIEW

∞ Image Link: Hide and Seek Room Model

→ NOTE

Keep the model for future lessons, or take a picture so you can easily rebuild it.

WEEK 4

15m Geography: Grade 1 - Lesson 8

Materials: Me on the Map

→ RECAP

What did we play last time with your model?

→ READ, NARRATE, & DISCUSS

p.1-25 "This is me" - "me on the map."

→ NOTE

The book is read in its entirety today, and future lessons will focus on specific pages. This book is not numbered, so assume p.1 is the "This is me." page. Please note the error on p.11. Alabama and Mississippi should be switched.

★ TEACHER TIP
Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

WEEK 5

15m Geography: Grade 1 - Lesson 9

Me on the Map Room Study

Materials: Me on the Map

→ RECAP

What did you read last time?

→ READ, NARRATE, & DISCUSS

p.1-4 "This is me" - "map of my house."

→ VIEW & DISCUSS

Look at the pictures on p.2-3. Take turns matching the picture of the real object on p.2 with its symbol on p.3. Find the child's bedroom on p.4 by matching it to the symbol bedroom on p.3.

WEEK 5

15m Geography: Grade 1 - Lesson 10

Model to Symbol Map

Materials: model of room from lesson 7

→ RECAP

What did you read last time?

→ MODELING DAY

Using the model for help, draw a symbol map of the room like in Me on the Map.

→ VIEW

∞ Image Link: Map from Room Model

→ NOTE

Keep symbol map for next lesson.

Term 1

WEEK 6

15m Geography: Grade 1 - Lesson 11

Hide & Seek with Symbol Map

 Materials: symbol map of room from the previous lesson, sticker, penny or other small object

PREP: Hide one object in the room. Place a sticker or other marker on the symbol map to show where it is hidden.

→ **RECAP**

What model did you make last time?

→ **PLAY**

Have student look at the map to determine where the object is hidden and then go find it. Take turns hiding and finding objects.

→ **VIEW**

∞ Image Link: Room Map Hide and Seek

→ **NOTE**

Feel free to keep the symbol map to play with in the future.

WEEK 6

15m Geography: Grade 1 - Lesson 12

Build a Model of the Street

 Materials: blocks, Legos, or other objects, optional: tray to build on

→ **RECAP**

What did we play last time with your model?

→ **DISCUSS**

Do you know your address? If you do not, start learning it. It is good to know where you live. (Classroom teachers, ask parents for addresses so students can work on this.)

→ **MODELING DAY**

Use blocks, Legos, or other objects to make a model of your home and immediate neighbors. You will need to go across the street and use blocks to represent your home and neighboring buildings. If weather does not permit, build the view across the street from a window. See picture for an example.

→ **VIEW**

∞ Image Link: Street Model

→ **NOTE**

Keep model for next and other future lessons, or take a picture so you can easily rebuild it.

WEEK 7

15m Geography: Grade 1 - Lesson 13

Hide & Seek with Model of Home and Neighbors

 Materials: model of home and neighbors, object (should be large enough to find)

PREP: Teacher hide one object near home. Place a sticker or other marker on the model to show where it is hidden.

→ **RECAP**

What model did you make last time?

→ **PLAY**

Have student look at the model to determine where the object is hidden and then go find it. Take turns hiding and finding objects.

→ **VIEW**

∞ Image Link: Street Model Hide and Seek

→ **NOTE**

Keep model or picture of model for next lesson.

WEEK 7

15m Geography: Grade 1 - Lesson 14

Model to Symbol Street Map

 Materials: Me on the Map, model of home and neighbors from lesson 13, paper, pencil/colored pencils/markers/crayons

→ **RECAP**

What did we play last time with your model?

→ **READ, NARRATE, & DISCUSS**

p.4-5 "This is my house" - "map of my street."

Term 1

→ VIEW & DISCUSS

Look at the pictures on p.5. Take turns matching the picture of the real object on top of the page with its symbol below it. We only built one side of our street, but we will draw our map as she did in the book.

→ MODELING DAY

Using the model for help, draw a symbol map of the street like in Me on the Map. If you run out of time, you may finish in the next lesson.

→ VIEW

∞ Image Link: Map from Street Model

→ NOTE

Keep symbol map for next lesson.

WEEK 8

15m Geography: Grade 1 - Lesson 15

Street Map

 Materials: your street map, pencil/colored pencils/markers/crayons

→ RECAP

What activity did you do last time?

→ MODELING DAY

Using the model for help, finish drawing a symbol map of the street like in Me on the Map.

→ DISCUSS

Have you learned your address yet? If so, tell someone. Keep working if you do not know it yet.

→ VIEW & DISCUSS

If you have access to something like Google Maps, you can find the street view of your house. Compare it to your drawing and see if you can locate neighboring buildings.

→ NOTE

For the next lesson, the student will add the location of sunrise and sunset to their symbol map of the street. Please help them note where the sun rises and sets over the next week for multiple days.

WEEK 8

15m Geography: Grade 1 - Lesson 16

Add Sunrise and Sunset to Street Map

 Materials: your street map, pencil/colored pencils/markers/crayons

→ RECAP

What activity did you do last time?

→ DISCUSS

Do you remember learning about sunrise and sunset from the book "What Makes Day and Night" and how the child can see the sunrise from their bed? Today, we are going to add sunrise and sunset to your street map.

→ DRAW

Add a small drawing of the sun where it rises and sets on your street map. See picture for example.

→ VIEW

∞ Image Link: Sunrise and Sunset on Street Map

WEEK 9

15m Geography: Grade 1 - Lesson 17

The Surface of the Earth, Land vs. Water

 Materials: Elementary Geography, globe, world wall map

→ RECAP

What did you add to your map last time?

→ READ, NARRATE, & DISCUSS

Lesson 34 p.107-109 "Wherever we go" - "in the eastern."

→ DISCUSS

Look at the colors on the globe. What do you think they represent? How does the globe compare to the maps in this lesson?

★ TEACHER TIP
Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

Term 1

WEEK 9

15m Geography: Grade 1 - Lesson 18

The Surface of the Earth, Continents

 Materials: Elementary Geography, globe, world wall map

→ RECAP

What did you read last time?

→ READ, NARRATE, & DISCUSS

Lesson 35 p.111-113 "In the eastern" - "with their size."

→ VIEW & DISCUSS

Look at the globe. Point to some water. Point to some land. Let's find North America together. Find the "belt" of the globe. This is called the equator.

WEEK 10

15m Geography: Grade 1 - Lesson 19

Matching Maps with the Globe and Wall Map

 Materials: globe, world wall map

→ NOTE

The object is to build understanding and familiarity between a 3 and 2-dimensional map of Earth. The teacher points to something on one map, and the student locates the same place on the other map. Alternate starting a match with either the globe or the world wall map.

→ RECAP

What did you read last time?

→ PLAY

Play with a globe and a 2-dimensional world map. Some example questions:

- Locate North America on the world map. (Ask while the teacher is pointing to it on the globe.)
- Let's find Antarctica, where penguins live.
- Continue with other land masses, as well as oceans.

WEEK 10

15m Geography: Grade 1 - Lesson 20

I Spy with the Globe and Wall Map

 Materials: globe, world wall map

→ NOTE

The object is twofold. First, there is practice learning and finding the continents. Second, there is continued practice using both a 3 and 2-dimensional map of the Earth. Ask the "I Spy" question and allow the student to find it on one of the maps, while you find it on the other. Then compare your answers, making sure to alternate regularly between the globe and the map.

→ RECAP

What activity did you do last time?

→ PLAY

Example Questions:

- "I spy a continent that is oval-shaped up top and skinnier on the bottom." (Africa)
- "I spy a continent near the bottom of the globe that has water all around it." (Antarctica)
- "I spy a continent that is connected to another one by a narrow strip of land." (North or South America)
- "I spy an ocean that spans between North America and Europe." (Atlantic)
- "I spy an ocean that does not touch the equator." (Arctic)

WEEK 11

15m Geography: Grade 1 - Lesson 21

Demonstration

 Materials: globe, 2-dimensional world map, an orange, sharp knife, spoon, one inflated balloon, marker, scissors

→ RECAP

What game did we play last time?

→ DISCUSS

Compare the globe to the orange and the balloon. Are they similar? We are going to try to make the orange and the balloon flat.

→ DEMONSTRATE

1. Cut the orange in half, from top to bottom, and scoop out the flesh. Are you able to flatten it? If so, how?
2. Teacher draws simple shapes of the continents on the blown-up balloon. Carefully cut it from pole to pole. Try to stretch it flat. Can you see how the shapes change near the edges? What happens to them?
3. Compare your orange and balloon to the 2-dimensional world map.
4. Which map, a globe or a 2-dimensional map, is more accurate? Why?

Term 1	
WEEK 11 15m Geography: Grade 1 - Lesson 22 Sight-Seeing → NOTE When the student created the street map, they had to pay attention to the placement of objects. Today, the student will add to that the ability to verbally describe their street. Charlotte Mason described this as sight-seeing in her writings. → RECAP What activity did we do last time? → MEMORY EXERCISE Have the student go outside (or look out different windows) and look closely at a building near your home. The teacher is not allowed to look. Then, the student describes the building in as much detail as possible, and the teacher has to guess which building it is. Student and teacher can take turns describing different homes/buildings near them.	
WEEK 12 15m Geography: Grade 1 - Lesson 23 Exam Week → EXAMS Answer question(s) related to course. Questions will come from: Elementary Geography	
WEEK 12 15m Geography: Grade 1 - Lesson 24 Exam Week → EXAMS Answer question(s) related to course. Questions will come from: Me on the Map	

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) 

Term 2

WEEK 1

15m Geography: Grade 1 - Lesson 25

Poles and Axis

 Materials: Elementary Geography, globe

→ **READ, NARRATE, & DISCUSS**

Lesson 11 p.33-34 "If you watch" - "south pole."

→ **DISCUSS**

 Map Resource: Globe

Look at the globe. Locate the north and south poles.

★ **TEACHER TIP**
Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

WEEK 1

15m Geography: Grade 1 - Lesson 26

Hemispheres

 Materials: Elementary Geography, globe

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

Lesson 11 p.34-35 "As the ends" - "southern hemisphere."

→ **DISCUSS**

 Map Resource: Globe

Look at the globe. Locate the equator. Point to the Northern Hemisphere. Now point to the Southern Hemisphere. In which hemisphere do we live?

WEEK 2

15m Geography: Grade 1 - Lesson 27

What Makes Seasons?

 Materials: The Reasons for Seasons, globe

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

p.1-7 "Spring" - "other hemisphere."

→ **DEMONSTRATE**

 Map Resource: Globe

Look at the globe. Locate the equator and the two poles. Imagine a straight line going from pole to pole and all the way through. Your globe may have one of these. Have the student be the sun and stand in the middle of the room. As the teacher walks the "earth" around the "sun," recreate and narrate what was happening on p.6-7.

WEEK 2

15m Geography: Grade 1 - Lesson 28

Spring

 Materials: The Reasons for Seasons

→ **NOTE**

The next 4 lessons are about the seasons. As an option, you can begin each lesson with a short seasonal poem.

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

p.8-12 "In the Northern" - "periods of time."

WEEK 3

15m Geography: Grade 1 - Lesson 29

Summer

 Materials: The Reasons for Seasons

→ **NOTE**

You can begin with a short seasonal poem.

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

p.13-17 "Summer begins" - "nights are shorter."

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) 

Term 2

WEEK 3

15m Geography: Grade 1 - Lesson 30

Autumn

 Materials: The Reasons for Seasons

→ **NOTE**

You can begin with a short seasonal poem.

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

p.18-22 "Autumn begins" - "autumn sky."

WEEK 4

15m Geography: Grade 1 - Lesson 31

Winter

 Materials: The Reasons for Seasons

→ **NOTE**

You can begin with a short seasonal poem.

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

p.23-27 "In the Northern" - "before dinner."

★ **TEACHER TIP**
Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

WEEK 4

15m Geography: Grade 1 - Lesson 32

Seasons at the Equator and Poles

 Materials: The Reasons for Seasons

→ **RECAP**

What do you remember about the seasons? I wonder if everyone's seasons are the same.

→ **READ, NARRATE, & DISCUSS**

p.28-31 "Areas near" - "repeat themselves."

WEEK 5

15m Geography: Grade 1 - Lesson 33

Our World is a Planet

 Materials: Elementary Geography

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

Lesson 6 p.17-19 "About three hundred" - "of the sun."

→ **NOTE**

On p.18, the book states, "We cannot get out of our own world." This is because the book was written in 1881.

WEEK 5

15m Geography: Grade 1 - Lesson 34

Other Planets

 Materials: Elementary Geography

→ **RECAP**

What did you read last time?

→ **READ, NARRATE, & DISCUSS**

Lesson 7 p.21-22 "The great sun" - "He has given them."

WEEK 6

15m Geography: Grade 1 - Lesson 35

Other Planets cont'd

 Materials: Elementary Geography

→ **RECAP**

What did you read last time?

→ **INTRO**

Would it take longer to walk around a table or to walk around your home/school? Why? (It's farther.)

Term 2

→ READ, NARRATE, & DISCUSS

Lesson 7 p.22-23 "The eight planets" - "about these yet."

→ VIEW & DISCUSS

Look at the image. Which planet has the shortest distance? Which one has the longest?

∞ Image Link: [Eight Planets Orbiting the Sun](#)

WEEK 6

15m Geography: Grade 1 - Lesson 36

Pictorial and Panoramic Maps

 Materials: paper, pencil/colored pencils/markers/crayons

→ RECAP

What did you read last time?

→ INTRO

Maps can be drawn in many different ways. Today, your child will be introduced to two views: pictorial and panoramic.

→ VIEW & DISCUSS

Me on the Map had both pictorial and panoramic view maps. The pictorial map looks like you are right in front of the houses, but the panoramic map looks like you may be on a hill looking across and down at the streets.

→ MODELING DAY

You will practice this type of mapping by drawing a map of your home or school. Imagine you are on a hill overlooking your home/school. Try to do a panoramic map. (Note: If this is too difficult, use a pictorial map.) Next week, we will draw a map of the yard.

→ VIEW

See an example of each type of map.

∞ Image Link: [Pictorial and Panoramic](#)

WEEK 7

15m Geography: Grade 1 - Lesson 37

Building a Yard Map

 Materials: paper, pencil/colored pencils/markers/crayons

→ NOTE

This project requires an outdoor open area outside of your home or school. It does not have to be big, but it needs to have things in it to add to a map. It could be your backyard, school playground, garden, etc.

→ RECAP

What kind of map did you draw last time?

→ MODELING DAY

You will begin drawing a map of your yard at home or school. You will have two days to complete your map. You can use blocks to begin with if that helps. Imagine you are on a hill overlooking the yard, and draw the area. This can be a panoramic map. (Note: If this is too difficult, use a pictorial map.)

WEEK 7

15m Geography: Grade 1 - Lesson 38

Building a Yard Map cont'd

 Materials: pencil/colored pencils/markers/crayons

→ RECAP

What kind of map did you draw last time?

→ MODELING DAY

Finish drawing the map of your yard at home or school.

→ NOTE

Save the map for the next lesson.

WEEK 8

15m Geography: Grade 1 - Lesson 39

Going on a Hunt

 Materials: your yard map, treasure of choice

→ NOTE

This project can be as simple or complicated as you like. You can hide something in the yard and mark it on the map, or hide clues that send them to different parts of the map and ultimately to a "treasure." The teacher could do the simple version, and have the student create a more elaborate plan with clues or multiple things to find for other classmates, siblings, or parents. SAVE the map for future lessons.

→ RECAP

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) 

Term 2

What kind of map did you draw last time?

→ PLAY

The teacher uses the map made in the last lesson to hide a treasure in the yard. The teacher marks it on the map, and the student goes hunting for the treasure.

WEEK 8

15m Geography: Grade 1 - Lesson 40

Sunrise and Sunset

 Materials: Elementary Geography, your yard map, pencil/colored pencils/markers/crayons

→ RECAP

What activity did you do last time?

→ INTRO

You might remember where the sun rises at your home or school. If not, get up early and find it.

→ SET UP

The sun rises in the east, so find some way to mark that direction on the map you drew of your yard.

→ READ, NARRATE, & DISCUSS

Lesson 24 p.69-71 "One change" - "like to know."

→ SET UP

Now that you know east, based on your readings, find west, north, and south in the area you mapped. You will add this to your map next week.

WEEK 9

15m Geography: Grade 1 - Lesson 41

Adding Direction to a Map

 Materials: your yard map, pencil/colored pencils/markers/crayons, your home and neighborhood map (optional)

→ RECAP

What did you read last time?

→ DRAW

Based on your findings in the last lesson, add E (for east), W (for west), N (for north), and S (for south) to your yard map.

If you have your home and neighborhood map, you may add it to that one also. (Just look for your sunrise and sunset marks, and put an E next to the sunrise, etc.)

WEEK 9

15m Geography: Grade 1 - Lesson 42

Creating a Compass Rose

 Materials: a paved area, chalk, compass

→ RECAP

What did you add to your map last time?

→ DRAW

1. Using chalk, draw a large circle on the pavement.
2. Place the compass in the center.
3. Once the needle is still, slowly turn the compass until it is pointing north, which is when the needle and mark for north line up.
4. Next, draw a line from the compass at the north mark to the edge of the circle. Here, write N with the chalk.
5. Using the compass as a guide, draw lines from the S, W, and E marks of the compass to the edge of the circle, and write the directions, respectively.

You have created a large compass rose.

WEEK 10

15m Geography: Grade 1 - Lesson 43

The Mariner's Compass

 Materials: Elementary Geography

→ RECAP

What activity did we do last time?

→ INTRO

In the last lesson, you used a compass to create a compass rose. Today, we will learn how a compass works.

→ READ, NARRATE, & DISCUSS

Lesson 29 p.85-87 "Why does the" - "unknown dangers."

★ TEACHER TIP
Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) QR

Term 2

WEEK 10 **15m Geography: Grade 1 - Lesson 44** *Cardinal Direction Game*

 Materials: slips of paper, compass, treat

PREP: Find a place outside with enough space to pace off steps for the game. Each slip of paper will have a cardinal direction and a number of paces written upon it. The student will use the magnetic compass to turn toward the appropriate cardinal direction, count off the number of paces, and hunt at that location for the next written directions. Select a place of beginning, a minimum of 3 locations to hide the slips of paper, and a final destination where some sort of treat/reward is hidden.

→ RECAP

What did you read last time?

→ PLAY

1. Have the student stand at the starting point so that the compass is facing N.
2. Provide the student with written directions for finding the next written directions.
3. Use the compass to determine which direction to walk, and count off the appropriate number of paces. (Teacher help as needed.)
4. Hunt for the piece of paper, and continue the journey.
5. The student's exploration has ended once the treat is discovered.

WEEK 11 **15m Geography: Grade 1 - Lesson 45** *Compass Activity*

 Materials: compass

→ RECAP

What activity did we do last time?

→ PLAY

1. Go outside if possible.
2. Have student hold compass and face north. While facing north, point west.
3. Face south, and point east.
4. What \\\ (building, area, etc) is north of you?
5. Face your home/school. What direction is it (from you)?
6. Continue in this manner. (If not able to go outside, ask questions based on indoor rooms.)

WEEK 11 **15m Geography: Grade 1 - Lesson 46** *Boundaries*

 Materials: maps you have drawn, pencil/colored pencils/markers/crayons (optional)

→ RECAP

What activity did we do last time?

→ DISCUSS

- Does your room have boundaries? Walls, rugs, and curtains are examples.
- Does your home have borders?
- If you have a yard, does it have borders?
- Look back at the maps you have drawn this year, and tell what the boundaries are of each one. (It could be things like walls, streets, lawns, etc.)

→ DRAW

If your maps do not have boundaries, think about adding some.

WEEK 12 **15m Geography: Grade 1 - Lesson 47** *Exam Week*

→ EXAMS

Answer question(s) related to course.

Questions will come from:
Elementary Geography

WEEK 12 **15m Geography: Grade 1 - Lesson 48** *Exam Week*

→ EXAMS

Answer question(s) related to course.

Questions will come from:
The Reasons for Seasons

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) 

Term 3

WEEK 1

15m Geography: Grade 1 - Lesson 49

Highlands and Lowlands

 Materials: Elementary Geography, kinetic sand

→ NOTE

Over this term, time will be spent on rain and the water cycle, as well as how geography affects the flow of water. Use opportunities when it rains to observe the flow of water outside, noting which directions it travels, what it must go around, etc.

→ READ, NARRATE, & DISCUSS

Lesson 36 p.117-118 "Most likely" - "ridges at the top."

→ MODEL

Build what you think the mountains and mountain chains, with valleys between them, look like from your reading today.

WEEK 1

15m Geography: Grade 1 - Lesson 50

Highlands and Lowlands cont'd

 Materials: Elementary Geography, kinetic sand

→ RECAP

What did you read last time?

→ READ, NARRATE, & DISCUSS

Lesson 36 p.118-119 "After getting up" - "all over the world."

→ MODEL

Build what you think the mountains and tablelands look like from your reading today.

WEEK 2

15m Geography: Grade 1 - Lesson 51

Model Day

 Materials: Model Magic, pan or tray that will hold water

→ RECAP

What did you read last time?

→ MODEL

Build what you think the mountains, mountain chains, tablelands, and valleys look like, but this time in clay. Let it dry for the next lesson.

WEEK 2

15m Geography: Grade 1 - Lesson 52

Model Day

 Materials: model in a pan or tray that will hold water, water source

→ RECAP

What kind of model did you make last time?

→ MODEL

Get the model from the last lesson. Choose a high spot and allow the water to pour very slowly over it. Where does the water flow? Try other spots to see if the results are the same or different.

→ DISCUSS

What did you observe? What conclusions did you draw?

WEEK 3

15m Geography: Grade 1 - Lesson 53

Rain

→ NOTE

Don't forget to use opportunities when it rains to observe the flow of water outside, noting which directions it travels, what it must go around, etc.

→ RECAP

What did we discuss last time?

→ DISCUSS

Have you seen water flowing from your home as a result of rain? Where did it go? Did it flow down? Spend a few minutes talking about your observations. Draw a picture of what you saw, if that is helpful.

→ DISCUSS

- Did you notice that water is always flowing, sometimes as a trickle, sometimes as a rush?
- It can start as a trickle in a yard, join a flow in a street gutter, join a rushing stream, river, etc.

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) QR

Term 3

- Sometimes it stops completely or for a bit, collecting in a puddle, pond, or lake, but sometimes it keeps flowing out on the other end.
- One thing that I hope you noticed was that it was always going to a lower place.

WEEK 3

15m Geography: Grade 1 - Lesson 54

Water Cycle, Rain to Sea

Materials: Down Comes the Rain

→ RECAP

What did we discuss last time?

→ READ, NARRATE, & DISCUSS

p.4-17 "Rain comes" - "droplets make clouds."

★ TEACHER TIP

Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

WEEK 4

15m Geography: Grade 1 - Lesson 55

Moving Water, Going Down

Materials: Elementary Geography

→ NOTE

This chapter goes into much more depth than Down Comes the Rain, but the foundation of the last lesson is helpful in picturing it and understanding the downward flow of the water cycle.

→ RECAP

What did you read last time?

→ READ, NARRATE, & DISCUSS

Lesson 37 p.121-124 "Have you ever - "waters flow fast."

WEEK 4

15m Geography: Grade 1 - Lesson 56

Model Day

Materials: kinetic sand

→ RECAP

What did you read last time?

→ MODEL

Spend time recreating the things you read about in the last lesson. (a river with low banks, a river with high banks, a lake with hills surrounding it, a delta)

→ DISCUSS

Discuss as you build, wondering together what a low versus a high bank would do, a deep valley versus a shallow valley, etc. Be careful not to supply answers; let the student draw their own conclusions.

WEEK 5

15m Geography: Grade 1 - Lesson 57

Water Cycle, Sea to Rain

Materials: Down Comes the Rain

→ RECAP

What kind of model did you make last time?

→ READ, NARRATE, & DISCUSS

p.18-32 "When clouds are" - "it is raining."

WEEK 5

15m Geography: Grade 1 - Lesson 58

Water Vapor

Materials: The Fairy-land of Science, pot or tea kettle

PREP: Reading today is from an old book. The language will be a little unfamiliar, so it could be good to pre-read, but the descriptions are more in-depth and will hopefully lead to a better understanding.

→ RECAP

What did you read last time?

→ DEMONSTRATION

Fill the pot or tea kettle with water. Heat it over the eye of the stove. Wait until the steam begins to rise. Explain that this steam is water that has been heated up and is rising into the air. We don't see it after a while, but it is still there, spreading out into the air. This steam is like the mist you read about in Down Comes the Rain. But, in the ocean, where does the heat come from? It is not from a stove or fire below. (The sun).

Term 3

→ READ, NARRATE, & DISCUSS

p.76-81 "Now, although" - "have the same effect."
∞ Book Link: Fairy-land of Science

WEEK 6

15m Geography: Grade 1 - Lesson 59

Make a Simple Rain Gauge

Materials: mason jar (wide mouth is best), ruler

→ RECAP

What did you read last time?

→ SET UP

1. Place your mason jar outside in an open spot.
2. Every time it rains, check the rain by placing the ruler in the jar to measure the height of the water.
3. Record your observation.
4. Empty the jar after observation so that you can check it again the next time it rains.
5. Feel free to do this several times and compare how much it rained each time.

WEEK 6

15m Geography: Grade 1 - Lesson 60

Mapping Routes

Materials: paper, pencil/colored pencils/markers/crayons

→ RECAP

What activity did we do last time?

→ DISCUSS

Discuss with your child that they will be making a map of a route they do very regularly over the next several lessons. This could be a ride or walk to school, the grocery store, a park, someone's home, etc.

→ DRAW

- Draw a picture of each end of your route (for example, your home, your local grocery store).
- Draw yourself going there (for example: riding in a car or walking on a sidewalk).
- Draw several places from memory that you see on the way.
- Keep these drawings for the next lesson.

WEEK 7

15m Geography: Grade 1 - Lesson 61

Mapping Routes cont'd

Materials: long art paper or paper taped together for the route map, glue or tape, scissors

→ RECAP

What kind of map did you make last time?

→ DRAW

- Gather drawings from the last lesson.
- Offer the opportunity to draw something new if they want to.

→ ACTIVITY

- Cut out the drawings and lay them out in order from the beginning to the end of your route.
- Glue or tape your beginning and ending pictures on opposite ends of the paper.
- Thinking about how you travel, draw roads/sidewalks, and attach each new picture as you come to it.
- Save the map for the next lesson.

WEEK 7

15m Geography: Grade 1 - Lesson 62

Mapping Routes cont'd

Materials: route map from last lesson

→ RECAP

What activity did we do last time?

→ NARRATE

Using the map from the last lesson, narrate to someone about your route, using the map you drew to help describe it.

→ ACTIVITY

Take the map with you on your route, noting what things you had on the map and what things you might add later.

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) 

Term 3

WEEK 8

15m Geography: Grade 1 - Lesson 63

I Spy Game

 Materials: globe, world wall map

→ **RECAP**

What did we discuss last time?

→ **PLAY**

Using a globe, wall map, or both, play these games, taking turns, to grow familiarity with continents and oceans.

I Spy a Continent

- "I spy on the world map a continent that is oval-shaped up top and skinnier at the bottom."
- "I spy on the globe a continent near the bottom of the globe that has water all around it." Use descriptive language.

I Spy an Ocean

- With the globe or world wall map in view, take turns saying, "I spy an ocean that..." Here are some starters:
- ...spans between North America and Europe. (Atlantic)
- ...touches North America, Europe, and Asia. (Arctic)
- ...touches more of the Equator than the other oceans. (Pacific)
- ...does not touch the Equator. (Arctic)

WEEK 8

15m Geography: Grade 1 - Lesson 64

The Oceans and Their Parts

 Materials: Elementary Geography, globe or world wall map, kinetic sand

→ **RECAP**

What activity did we do last time?

→ **MAP QUESTIONS**

 Map Resource: globe or world wall map

1. Locate the Arctic Ocean.
2. Locate the ocean surrounding Antarctica.
3. Locate the Pacific Ocean.
4. Locate where the Pacific Ocean and the Arctic Ocean meet, between Russia and Alaska. What strait connects the Pacific and Arctic Oceans? (Bering Strait)

→ **READ, NARRATE, & DISCUSS**

Lesson 41 p.141-142 "The ocean waters" - "called a strait."

→ **MODEL**

Based on your reading, build a strait with the sand.

WEEK 9

15m Geography: Grade 1 - Lesson 65

The Oceans and Their Parts cont'd

 Materials: Elementary Geography, globe or world wall map, kinetic sand

→ **RECAP**

What did you read last time?

→ **MAP QUESTIONS**

 Map Resource: globe or world wall map

1. Locate the Pacific Ocean.
2. Locate 5 islands in the Pacific Ocean. (many to choose from)
3. On the west coast of North America, there is a long, narrow opening where the ocean "goes into" the land. What gulf is this? (Gulf of California)
4. On the southeast edge of the United States, locate another gulf. (Gulf of Mexico)

→ **READ, NARRATE, & DISCUSS**

Lesson 41 p.142-143 "The high parts" - "called a gulf."

→ **MODEL**

Based on your reading, build an island, a group of islands, and a gulf.

WEEK 9

15m Geography: Grade 1 - Lesson 66

The Oceans and Their Parts cont'd

 Materials: Elementary Geography, globe or world wall map

→ **RECAP**

What did you read last time?

→ **MAP QUESTIONS**

 Map Resource: globe or world wall map

★ **TEACHER TIP**
Students should also be encouraged to narrate using Legos, puppets, or by acting out the scene.

Term 3

1. Locate the Pacific Ocean.
2. Locate the continent of Asia.
3. Locate 3 islands in the Pacific Ocean, along the eastern edge of Asia. (several to choose from)
4. On the east of Asia, locate at least 3 seas. (Sea of Japan, South China Sea, East China Sea, Yellow Sea, Philippine Sea, Sea of Okhotsk) What do you notice about these seas? (They are connected to the Pacific, but separated slightly by islands.)

→ READ, NARRATE, & DISCUSS

Lesson 41 p.143 "It has made" - "east of Asia."

→ MAP WORK

Spend a few minutes locating other seas around the globe.

WEEK 10

15m Geography: Grade 1 - Lesson 67

The Oceans and Their Parts cont'd

Materials: Elementary Geography, globe or world wall map

→ RECAP

What did you read last time?

→ MAP QUESTIONS

Map Resource: globe or world wall map

1. Locate the Atlantic Ocean. How does it compare in size to the Pacific? (smaller)
2. The Pacific has many islands scattered throughout. What do you notice in regard to islands in the Atlantic? (They are not scattered, but some are large.)
3. Where in the Atlantic are most islands located? (wanting the student to notice that many are very close to the mainland)
4. Locate a large island in the Atlantic Ocean. (The largest island is Greenland, which extends from the Arctic Ocean into the North Atlantic Ocean. Other islands are listed in the next question.)
5. Can you locate any more islands in the Atlantic Ocean? (Possibilities include Iceland, Ireland, Great Britain, Newfoundland, and the Falklands, among others.)
6. Some islands in the Pacific Ocean are isolated, while others exist in groups. Can you locate a group of islands in the Pacific Ocean? (Possibilities include the Aleutian Islands, Hawaii, Galápagos Islands, Japan, Philippine Islands, Northern Mariana Islands, Marshall Islands, Micronesia, Solomon Islands, Cook Islands, French Polynesia, and New Zealand, among many others.)
7. Can you locate standalone islands in the Pacific that are not part of a group? (This question is more of a scavenger hunt, and the student may only name Vancouver Island and Taiwan. Searching for individual islands in the Pacific Ocean makes it apparent that almost all islands in this ocean are part of a larger group.)

→ READ, NARRATE, & DISCUSS

Lesson 41 p.143-144 "The Atlantic Ocean" - "hottest of the oceans."

→ MAP WORK

In the northeast of Canada, find the wide body of water that flows into the land. (Hudson Bay) Spend a few minutes locating other bays around the globe.

WEEK 10

15m Geography: Grade 1 - Lesson 68

Map Drill

Materials: Elementary Geography, globe

→ RECAP

What did you read last time?

→ NOTE

Today will be spent doing a little map drill on the globe. The questions will be based on the previous lessons.

→ READ

Map Questions p.147-148 #1-11

(Feel free to add your own questions to the drill or have your student come up with some questions.)

→ NOTE

Next week, set aside time for two geography walks. Look at the lesson plans so you can plan these, either next week or exam week.

WEEK 11

15m Geography: Grade 1 - Lesson 69

Geography Walk

→ TAKE A GEOGRAPHY WALK

This week, set aside time for two geography walks.

Walk 1- Find moving water and follow it. If it is raining, you can put on rain gear and follow water from around your home. Note where it pools, where it runs quickly, slowly, how it drains away from your house, and where it flows from there. (If it is not a time of year when it rains, possibly use a hose to see where the water would go if it were raining.)

Geography: Grade 1

[Click THIS text or scan the QR code for links.](#) 

Term 3	
WEEK 11 15m Geography: Grade 1 - Lesson 70 Geography Walk → TAKE A GEOGRAPHY WALK This week, time should have been set aside for two geography walks. Walk 2- Find a pond or lake and walk around it to find its source and possibly its "exit." If you cannot find a source, could it be a spring?	
WEEK 12 15m Geography: Grade 1 - Lesson 71 Exam Week → EXAMS Answer question(s) related to course. Questions will come from: Elementary Geography	
WEEK 12 15m Geography: Grade 1 - Lesson 72 Exam Week → EXAMS Answer question(s) related to course. Questions will come from: Down Comes the Rain and models done during the term	

Geography: Grade 1

Examination

Term 1

- Elementary Geography: Tell what happens when you try to flatten out something that is round, like the Earth or an orange. (How does the Earth's roundness make it hard to draw a flat map?)
- Me on the Map: Build a model of a room in your home.

Term 2

- Elementary Geography: Explain how to find directions outside and how to add a compass rose to a map.
- The Reason for Seasons: Explain or act out what makes the seasons.

Term 3

- Elementary Geography: Tell about the oceans and their different parts. You may use drawings to describe different parts. (Parent note: oceans, bays, gulfs, etc.)
- Down Comes the Rain: Tell what you can about the water cycle. How does water change form and travel around our world?
