

Keyboarding

About the Course

Learn typing skills with guided instruction. Includes games for practice and reinforcement. Students learn the position of each letter, number, and symbol on the keyboard and advance from typing individual letters to simple words, then paragraphs and documents. Fluency is encouraged through word-per-minute goals.

Placement & Combining Tips

The Typing.com website contains a placement test. Take this first, and then progress at your own pace.

Keyboarding

☐ Make sure students have an ergonomically friendly place to type. Proper posture improves speed while avoiding repetitive movement injury. Ideally, elbows should be bent at a 90-degree angle and should rest on the table/desk with the screen at eye level. To attain proper alignment, adjust the chair's height or have students sit on a pillow, use a footstool, and/or place the computer on a stand.

☐ Be sure to view Extra Helpings for ideas on how to integrate Typing into your days and to explore resources for extra practice (such as a website where students practice typing classic literature).

How To Teach

Prepare

Create (or have students create) a free account on [typing.com](https://www.typing.com), and have your student(s) take a few placement tests if they have any previous typing experience. You can find the site link in Quick Links.

Practice

Have students practice typing and ensure they use correct fingering.

Connect

As students gain fluency, they can start learning to type narrations. This may be especially helpful for students with learning differences.

Discuss

Let students share any thoughts or connections they have about the lesson.
