Sloyd: Level 4

☐ View the "Sloyd Introduction Video" for an overview of materials and resources used in Sloyd (see Quick Links)

☐ Allow time for loading and viewing videos. We recommend teachers preview tutorials and work a model before teaching it.

☐ Refresh students on how to use a ruler (note where "0" starts) and how to use the edge to draw a straight line.

☐ Purchase supplies and introduce students to their Sloyd tools (discuss their care and safe use). Organize them so they are easily accessible.

How To Teach

	Overview Lessons will go much more smoothly if you prepare thoroughly. As students gain experience, develop fine motor skills, and practice habits of precision they will need less support.
	Prepare Watch video tutorials or make the model yourself. Gather supplies and materials needed.
	Recap Connect back to previous lesson and skills learned.
	Read Read the instructions one step at a time. Model each step and make sure students complete it with precision before moving to the next step.
	Practice When a project is complete, students may repeat it as many times as they wish to give as gifts or create original patterns similar to the project.
