

Advanced Nature Study Lessons

About the Course

An elective in Environmental Science, Advanced Nature Study requires independent interest as it is designed to be personalized by the student and requires some flexibility in scheduling due to the amount of fieldwork required beyond the regular lesson time.

This topic is included in the following course(s): Science: Advanced Nature Study

Placement & Combining Tips

Students should have at least 3 years of nature study experience and be comfortable with their nature journal.

Term 1

WEEK 1

45m Advanced Nature Study Lessons - Lesson 1 Sections 1-3

Materials: Master of Field Arts, Journal

→ INTRO

As we start our nature journaling adventure, it is important to remember local, state, and federal laws about collecting and specific concerns when in the field. Look up any local or state laws that you need to be aware of.

→ READ

- ∞ Article Link: Leave No Trace (7 Principles)
- ∞ Article Link: Can I Keep This?

→ INTRO

As we begin working through our Master of Field Arts book, we will start with a look at various tools that Roseann recommends. You may already have some of these tools or a variation of them. You may already use some or all of these tools in your nature study. The goal is to gather new ideas for tools and practices. There is only one tool that you were required to purchase for this course, and that was the Perspex Palette (see the supply list), as we will be using it quite a bit. For the rest of the items, you are free to evaluate and decide what you want to add to aid you in further observation and study. You can look up items mentioned in the chapter, and there will be links to additional or similar items, at times included in the lesson.

→ READ

p.7-17

→ LOCATE

Check to see if you already own any of the items mentioned or something similar. If not, consider whether you want to purchase any items for further exploration. You may want to try out your phone's built-in magnifier. Search in your Apps to find the magnifier and look up how to use it.

→ VIEW

Take a look at some other interesting historical field notebooks.
∞ Article Link: Field Notebooks - Tumamoc Sketchbook

→ JOURNAL

If you have any time left, use some form of magnification like a loupe, magnifying glass, binoculars, microscope, or your phone to view something from nature and replicate it in your journal.

• EXTRA HELPINGS

If interested, take a look at a loupe and these binoculars.
∞ **Item Link:** 10x and/or 30x (good for plant parts) Loupe (This item is from Amazon, but also take a look at Roseann's Discovery Kit on her website, which includes a basic loupe. Don't forget about her generous discount code offering 25% off any products in her store, which you can use throughout this course.)
∞ **Item Link:** Close Focus Binoculars recommended by John Muir Laws

WEEK 1

45m Advanced Nature Study Lessons - Lesson 2 Sections 1-3

Materials: How to Teach Nature Journaling, Journal

→ INTRO

Today is a journaling day. A prompt from John Muir Laws' book, How to Teach Nature Journaling, will provide some focus for today's journaling. You will be introduced to one or two prompts each week to give you many observation tools to use in your nature study. Use the link in the quick links to download a free digital copy of the book or purchase a paperback copy if you prefer.

As you read the instructions each time, note the helps in teaching these skills to others. Be thinking about someone you could introduce nature journaling to, and/or share the joys of nature journaling with, and look for opportunities to show them what you are learning. It might be a family member, a neighbor, or a friend.

→ READ OR VIEW

- p.36-38 (in How to Teach Nature Journaling)
- ∞ Video Link: I Notice, I Wonder...

→ JOURNAL

Head outside or bring something inside to practice INIWIRMO on (I notice, I wonder, It reminds me of).

• EXTRA HELPINGS

If interested, take a look at Roseann's homemade leather nature journal cover. Maybe you want to make one for yourself!
∞ **Article Link:** Roseann's nature journal cover

WEEK 1

45m Advanced Nature Study Lessons - Lesson 3 Sections 1-3

Materials: Master of Field Arts

→ READ

p.18-26 skip p.25 as we will come back to this later. We will spend some dedicated time later in the course on collecting and drawing tracks in your journal

→ LOCATE

There are many measuring and collecting options mentioned in the reading. See what you can find at home to use. Then, think through what you might want to purchase to start using in the field.
A pocket knife may be in a kitchen drawer, or a family member may have one that you could use.

• EXTRA HELPINGS

If interested, here are a few links to a couple of the items mentioned in the reading.
∞ **Link:** Pocket Net
∞ **Link:** Kestrel weather stations
∞ **Link:** Morakniv Clipper
∞ **Link:** Nature Journaling Field Bag (Could be a great Christmas or birthday gift idea!)
∞ **Article Link:** Preserving skulls and insects

Term 1

Also, consider what options are on your phone for measuring heights and widths as well as angles. Find the Measure App and look up how to use it. Practice using it for heights as well as angles.

The End Notes start on p.159 and have many links for the items mentioned in the reading. You will need to figure out how you want to carry these items while you are in the field. See what bag options you have available and start taking your tools with you!

WEEK 1 45m Advanced Nature Study Lessons - Lesson 4

Materials: Journal

→ JOURNAL

Head outside and use the tools that you have collected to start investigating, observing, and journaling!

• EXTRA HELPINGS

If interested, here is a deep dive into choosing and using binoculars and scopes.

∞ **Video Link:** Binoculars

WEEK 1 45m Advanced Nature Study Lessons - Lesson 5

Materials: Journal

→ JOURNAL

Enjoy!

WEEK 2 45m Advanced Nature Study Lessons - Lesson 6

Sections 1-3

Materials: Master of Field Arts

→ INTRO

Let's step back for a moment to think about some term and school-year-long projects for this course. One of the joys of regular journaling is being able to see and observe seasonal changes. This is the study of phenology. Charlotte Mason had students create a Book of Firsts or add this component to their nature journals. Whenever you notice something for the first time in a season, such as the first frost, snowflakes, hurricane, plant blooms, bird, or butterfly, record the date on a perpetual calendar or in your nature journal. As you do this year after year, you start to notice patterns and deviations from patterns that are fascinating!

→ READ

p.157-158

→ PLAN

Take some time to think about what locations around you would make an interesting Phenology Study. Choose one or two places to visit each week for the whole school year. This might be in your yard, down the street, or somewhere not far from where you live. You want it to be accessible so that you will be sure to go there every week to record changes and capture what you are seeing. Record the changes observed via words, pictures, sketches, measurements, etc., in your journal. Follow the suggestions in your reading on p.158.

Then, choose a couple of items to do a term or single-season study, such as a single tree, plant, bird, or even a seed you grow in a pot. Take the time of year into account when choosing. This is described in your reading as a small or medium-scale study. But you are not limited to the examples in the book. Find something close to where you live that you are interested in studying. Choose when in the year you will do your studies. When you are ready, write down your plan for what you are studying and when in your week you will do your specific observations and journaling for your special studies. You might want to use a separate journal for your year-long study and term studies. It will be so interesting to read back over your journal entries for this one area or item and see the changes!

→ READ

Another aspect of advanced nature study that we want to be a part of now and perhaps into the future is some sort of citizen science project. Take some time to read about some potential studies that pertain to your area using the links provided. Find one that you want to participate in. Nature's Notebook might have a project that relates to what you chose for your phenological study. Sign up for the project that interests you and follow the directions to get set up to start. Your observations are important and valuable contributions to science!

- ∞ Article Link: 9 Citizen Science Projects
- ∞ Article Link: Citizen Science
- ∞ Article Link: 20 Citizen Science Projects
- ∞ Article Link: Nature's Notebook

• EXTRA HELPINGS

If you are interested in adding a Book of Firsts to your different journals, take a look at Nathaniel Wheelwright and Bernd Heinrich's beautiful notebook.

If nothing on the citizen science sites seemed interesting, try Project Squirrel!
∞ Link: Project Squirrel

WEEK 2 **45m Advanced Nature Study Lessons - Lesson 8** *Sections 1-3*

Materials: Master of Field Arts

→ INTRO

Roseann is a seasoned naturalist and describes her method of taking field notes, journaling, and organizing her notes for later scientific study and writing projects. Don't get bogged down in the details of Part One (p.27-33). Reading about her process is helpful to see how a naturalist documents all of their work. Part 2, starting on p.34, will have some more practical information about metadata that you may want to incorporate into your journal pages.

→ READ

p.27-40

There is no right way to keep a journal. The main idea is to work in your journal at least four times a week to grow in all the skills and wonder of seeing what God has made! Try out new ideas and see what works best for you.

WEEK 2 **45m Advanced Nature Study Lessons - Lesson 9**

Materials: How to Teach Nature Journaling, Journal

→ INTRO

Today is a journaling day. A prompt from John Muir Laws' book, How to Teach Nature Journaling, will provide some focus for today's journaling.

→ READ

p.88, 89, 91

→ JOURNAL

Use the 5 Ws and 1 H to observe and journal today.

• PLAN WEEKLY

- special study observations
- citizen science observations
- extended journaling time

WEEK 2 **45m Advanced Nature Study Lessons - Lesson 10**

Materials: Journal

→ VIEW

∞ Video Link: NJC Metadata

→ JOURNAL

If you aren't already in the practice of adding metadata to your page, start today to add the date, time, location, weather, and any other identifiers you want to add.

WEEK 3 **45m Advanced Nature Study Lessons - Lesson 11** *Section 1-3*

Materials: Master of Field Arts, Journal

→ INTRO

Today, we will start with the humble pencil!

→ READ

p.41-46

→ VIEW

Watch John Muir Laws explain other ways to use relative measurements to get the proportions right on your page.

∞ Video Link: NJC Measured Drawings

→ JOURNAL

Practice mapping out some objects with dots and using relative measurements to aid you in your sketches.

• EXTRA HELPINGS

If interested, watch how a pencil is made!

∞ Video Link: Pencils

Term 2

WEEK 1

45m Advanced Nature Study Lessons - Lesson 61

Materials: Links, paints, paint brushes, journal

→ INTRO

We will spend the next few weeks exploring the wonderful world of color! If you are new to adding color to your nature journal, Roseann's article will introduce you to the basics. If you are not new, consider trying out Roseann's palette of colors.

→ READ

∞ Article Link: Meet the Minimalist Paint Set

→ PRACTICE

If you haven't made a chart of how your particular colors work when mixing them, make a chart like in the article and experiment with your colors. It takes a while to get good at knowing your pigments and how to make the colors you need to match what you are looking at in nature. As Roseann points out, some paints are harder to use than others due to what is in them. If you are struggling, consider using the ones Roseann recommends.

Follow what Roseann has put together for working on secondary colors, too.

∞ PDF Link: Color worksheets

WEEK 1

45m Advanced Nature Study Lessons - Lesson 62

Sections 4-6

Materials: Master of Field Arts

Materials: Journal

→ JOURNAL

Enjoy!

WEEK 4 45m Advanced Nature Study Lessons - Lesson 76

Materials: Phenology Wheel Template, Journal

→ INTRO

Hopefully, your special studies and citizen science projects are going well. Even if it is fall or winter outside, there are interesting projects to be involved in and creative nature journaling opportunities available. One is a phenology wheel of monthly colors.

Building on the nature spots idea, try capturing more of the main colors outside during the month in your journal or on the wheel template, which you can paste into your journal. Then, you can continue the process all year. It might be the color of the sky, snow, and the green of an evergreen. Look around over several days and see what colors you notice.

∞ PDF Link: Phenology Wheel template

Look at other examples of interesting things to use a phenology wheel to record.

∞ Website Link: Phenology Wheels

WEEK 5

45m Advanced Nature Study Lessons - Lesson 81

Sections 4-6

Materials: Master of Field Arts, Journal

→ VIEW & READ

∞ Video Link: Weather 101 (Up to the 23:54 minute mark and then 1:12:51-1:39)
Roseann will walk through the reading for today, as well as how to make a cloud chart.
p.97-101

→ JOURNAL

Roseann used the Clouds by Altitude chart in the links as her guide for making a cloud chart for her journal. There is a video from another source that also has a version of a cloud chart. Choose a format you like and begin work on your cloud chart. You can use watercolor with wax paper or crayons to draw the clouds as Roseann did first. Or, you can use toned paper and white gouache to paint in the cloud types.

∞ Image Link: Clouds by Altitude

Examination

Term 1

- Take pictures of 10 of your favorite journaling pages from the term.
- Describe some of the new skills or tools you have been experimenting with this term, and what you think about them. What have you liked and not liked, and where do you want to grow?
- What was one of your most interesting findings or observations from the term? What are you wondering about?

Term 2

- Take pictures of 10 of your favorite journaling pages from the term.
- Describe some of the new skills or tools you have been experimenting with this term and what you think about them. What have you liked and not liked, and where do you want to grow?
- What was one of your most interesting findings or observations from the term? What are you wondering about?

Term 3

- Take pictures of 10 of your favorite journaling pages from the term.
- Describe some of the new skills or tools you have been experimenting with this term and what you think about them. What have you liked and not liked, and where do you want to grow?
- Describe your year-long study. What plants, animals, etc., did you discover? Describe some of the changes you saw. What were some of the highlights? What surprised you? What questions did it generate? Include a few pictures of your journal pages about your study. Any ideas for other longer-term studies you could do?
