

# Astronomy Labs

## About the Course

Labs/fieldwork are an essential part of science in which students engage with the Things they are reading about and practice the scientific method.

This topic is included in the following course(s): Science: Astronomy

## Scheduling

| GRADE | SCHEDULE INFO.                       | BOOKS |
|-------|--------------------------------------|-------|
| 11-12 | Astronomy Labs<br>1 time/week 60 min |       |

### Sample Weekly View

| Day 1                                                        | Day 2             | Day 3             | Day 4                                                | Day 5                               |

# Astronomy Labs

## How To Approach

### Introduce

- Regardless of how many days are required to complete a particular activity, every Science Lab has the same flow, which follows the scientific method.
- Relevant concept(s) are introduced in the text.
- Your notebook entry begins with the introductory/prelab narration, including relevant information that you have read or previously experienced, what you plan to do in the lab, and any hypothesis or anticipated result.

### Lab Procedure

- Perform the procedure according to the instruction, recording in your notebook what you do as it happens. This can be a challenge, but is an extremely important skill.
- Record all data and observations in the lab notebook.

### Analysis & Conclusions

- After all data is collected, analyze the results by considering how the data reflects the introduced concepts and whether the hypothesis is supported by the data.
- If the data and observations do not support the hypothesis, reflect on why and what further testing would be interesting or helpful.

## Term 1

|               |                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                       |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>WEEK 1</b> | <b>60m Astronomy Labs - Lesson 1</b><br><div>Materials: journal, star finder</div> <p>→ <b>OBSERVE</b><br/> Simply notice on this first night of observing. What are your first impressions? Or are you able to relocate any objects previously found? Do you notice anything new based on your use of the star finder or Quick Links? Keep a record of what you observe.</p> |                                                                                                                       |
| <b>WEEK 2</b> | <b>60m Astronomy Labs - Lesson 2</b><br><div>Materials: journal, star finder</div> <p>→ <b>OBSERVE</b><br/> Notice any objects that are or are becoming familiar. In what directions do they currently lie? Using your hands, measure their locations in the sky. Do these locations change during the evening? Keep a record of what you observe.</p>                        | ★ <b>STUDENT &amp; TEACHER TIP</b><br>Note that next week's fieldwork should be done in one or more daytime sessions! |
| <b>WEEK 3</b> | <b>60m Astronomy Labs - Lesson 3</b><br><div>Materials: journal, binoculars, paper, tripod/stand for binoculars</div> <p>→ <b>OBSERVE</b><br/> Use your hands to measure locations and your binocular set-up to observe the sun's projection. <b>DO NOT LOOK DIRECTLY AT THE SUN!</b> Keep a record of what you observe.</p>                                                  |                                                                                                                       |
| <b>WEEK 4</b> | <b>60m Astronomy Labs - Lesson 4</b><br><div>Materials: journal, star finder, binoculars/telescope</div> <p>→ <b>OBSERVE</b><br/> Use your hands to measure locations of the moon and other objects noted with your star finder and/or Quick Links. Use your binoculars/telescope to view the moon up close. Keep a record of what you observe.</p>                           |                                                                                                                       |
| <b>WEEK 5</b> | <b>60m Astronomy Labs - Lesson 5</b><br><div>Materials: journal, star finder, binoculars/telescope</div> <p>→ <b>OBSERVE</b><br/> Use your hands to measure locations of the moon, planets, and other objects noted with your star finder and/or Quick Links. Use your binoculars/telescope, as desired, to magnify. Keep a record of what you observe.</p>                   |                                                                                                                       |
| <b>WEEK 6</b> | <b>60m Astronomy Labs - Lesson 6</b><br><div>Materials: journal, star finder, binoculars/telescope</div> <p>→ <b>OBSERVE</b><br/> Use your hands to measure locations of the moon, planets, and other objects noted with your star finder and/or Quick Links. Use your binoculars/telescope, as desired, to magnify. Keep a record of what you observe.</p>                   |                                                                                                                       |
| <b>WEEK 7</b> | <b>60m Astronomy Labs - Lesson 7</b><br><div>Materials: journal, star finder, binoculars/telescope</div> <p>→ <b>OBSERVE</b><br/> Use your hands to measure locations of the moon, planets, and other objects noted with your star finder and/or Quick Links. Use your binoculars/telescope, as desired, to magnify. Keep a record of what you observe.</p>                   |                                                                                                                       |
| <b>WEEK 8</b> | <b>60m Astronomy Labs - Lesson 8</b><br><div>Materials: journal, star finder, binoculars/telescope</div> <p>→ <b>OBSERVE</b><br/> Use your hands to measure locations of the moon, planets, and other objects noted with your star finder and/or Quick Links. Use your binoculars/telescope, as desired, to magnify. Keep a record of what you observe.</p>                   |                                                                                                                       |
| <b>WEEK 9</b> | <b>60m Astronomy Labs - Lesson 9</b><br><div>Materials: journal, star finder, binoculars/telescope</div> <p>→ <b>OBSERVE</b><br/> Use your hands to measure locations of the moon, planets, and other objects noted with your star</p>                                                                                                                                        |                                                                                                                       |

| Term 1  |                                                                                                                                                                                                                                                                                                                                                                          |

## Term 2

### WEEK 1 ☐ 60m Astronomy Labs - Lesson 13

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of Ursa Major, Ursa Minor, and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Has the location of Ursa Major changed from your last viewing? Do the locations change during your session? Keep a record of what you observe.

### WEEK 2 ☐ 60m Astronomy Labs - Lesson 14

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 3 ☐ 60m Astronomy Labs - Lesson 15

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 4 ☐ 60m Astronomy Labs - Lesson 16

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 5 ☐ 60m Astronomy Labs - Lesson 17

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 6 ☐ 60m Astronomy Labs - Lesson 18

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 7 ☐ 60m Astronomy Labs - Lesson 19

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 8 ☐ 60m Astronomy Labs - Lesson 20

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

# Astronomy Labs

[Click THIS text or scan the QR code for links.](#)

## Term 2

### WEEK 9

#### 60m Astronomy Labs - Lesson 21

Materials: journal, star finder

##### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 10

#### 60m Astronomy Labs - Lesson 22

Materials: journal, star finder

##### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 11

#### 60m Astronomy Labs - Lesson 23

Materials: journal, star finder

##### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 12

#### 60m Astronomy Labs - Lesson 24

Exam Week

##### → EXAMS

Answer question(s) related to the course.

# Astronomy Labs

[Click THIS text or scan the QR code for links.](#)

## Term 3

### WEEK 1 ☐ 60m Astronomy Labs - Lesson 25

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 2 ☐ 60m Astronomy Labs - Lesson 26

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 3 ☐ 60m Astronomy Labs - Lesson 27

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 4 ☐ 60m Astronomy Labs - Lesson 28

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 5 ☐ 60m Astronomy Labs - Lesson 29

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 6 ☐ 60m Astronomy Labs - Lesson 30

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 7 ☐ 60m Astronomy Labs - Lesson 31

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 8 ☐ 60m Astronomy Labs - Lesson 32

☐ Materials: journal, star finder

#### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

# Astronomy Labs

[Click THIS text or scan the QR code for links.](#)

## Term 3

### WEEK 9

#### 60m Astronomy Labs - Lesson 33

Materials: journal, star finder

##### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 10

#### 60m Astronomy Labs - Lesson 34

Materials: journal, star finder

##### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 11

#### 60m Astronomy Labs - Lesson 35

Materials: journal, star finder

##### → OBSERVE

Use your hands to measure locations of constellations and associated stars, as well as the moon, planets, and other objects noted with your star finder and/or Quick Links. Keep a record of what you observe.

### WEEK 12

#### 60m Astronomy Labs - Lesson 36

Exam Week

##### → EXAMS

Answer question(s) related to the course.
