

Art History

About the Course

This is a High School elective course. Students study Art History through hands-on projects. Each term will focus on a different breadth of history and the art that was important to that time, bringing together and putting in chronological order many of the art pieces we have studied during Picture Study. Each term, students will be assigned four to six projects based on the history they are surveying. The projects will range from sculpture to fresco to abstract painting. Students will need a variety of art materials on hand to successfully complete this course.

Placement & Combining Tips

Suitable for interested 8th graders, though concepts are better understood with greater age development. No prior Art Instruction or Picture Study experience is required to complete this course.

Scheduling

GRADE	SCHEDULE INFO.	BOOKS
9-12	Art History 2 times/week 45 min	The Arts: A Visual Encyclopedia Children's Book of Art

Planning & Prep

Permission to print for non-commercial use. See Alveary group use policy to use lessons in a group context.

LINKS: Click text or scan the QR code in the top corner of the lesson plan pages to view online resources associated with the lessons.

Responsibility for previewing all links rests with the teacher. All links were checked at the time of publication; however, websites change frequently and may contain objectionable content. Please report broken links by contacting us through our website.

Art History

This course assumes the student has been through several years of Art levels and handicrafts, as well as Lettering. While this course is beneficial to all students, regardless of their past with the Alveary, students who have been with the program longer will find it easier to understand the references and concepts. This course is geared towards the High School student as an elective after having gone through all of the Art Instruction Levels. There is also an assumption of independent learning and abilities, such as the freedom to use an X-Acto or utility knife.

Books & Resources

Art History

How To Approach

Prepare

Make sure your art supplies are organized and easily accessible. Look ahead to the upcoming lessons and gather supplies needed.

Recap

Connect back to the activities and ideas from last lesson. History is a story with a beginning and a trajectory toward an endpoint. Remember what you have learned before beginning a new art history period in order to recognize how one movement influenced and sparked another movement. Sometimes you may recognize that one movement swallowed up another movement transforming it into a new idea.

Introduce

Read about the new movement in your lesson plans or in your related text. Use the book or video resource in the lesson. Look at examples.

Practice

You will have opportunity to practice many of the art styles as you study and use many different media. Classtime is also set aside to linger over images. Slow down, look at the images referenced, read about the ideas presented and look at the images again. Find the details in the artwork. Try to apply knowledge you have gained through Picture Study. Use the observational skills you have honed over the years. Work to connect the dots of the history of humanity.

Discuss

If you have opportunity, share what you are learning with a teacher, friend or family member. The ideas we ingest become more concrete in our minds when we teach someone else what we have learned.

Term 1

WEEK 1 45m Art History - Lesson 1

Prehistoric Art

Materials: Charcoal, rock (to crush charcoal), white chalk stick, brown pastel (about an inch long), disposable plates, bowls or cups (to mix pigments on/in), sticks, concrete outside (in some form to work on), The Arts: A Visual Encyclopedia, Children's Book of Art (optional)

PREP: Students will need to do this project outside on some form of concrete: driveway, sidewalk, patio, garden paver, etc.

→ INTRO

Look at and read p.14-17, 172-173 in The Arts: A Visual Encyclopedia and p.12-13 in Children's Book of Art (optional)

→ PRACTICE

- Go outside on your driveway, sidewalk, or patio. You need concrete or something like a garden paver.
- Draw a picture of a hunting scene, a herd of animals, a farm, tribal dancing, etc., using the charcoal, white chalk, and brown pastel. Remember that the prehistoric people drew these images from memory as opposed to observation.
- Place what is left over of each into its own dish and crush it with the rock until it is powder. This becomes the pigment you will mix with water (or animal fat if you have it around).
- Add a small amount of water to each and mix until they are similar to paint.
- Add details to the drawings you created using your fingers dipped in the liquid charcoal, chalk, and pastel.
- You could also use sticks and rocks you find outside to "paint" with. Explore the natural materials you have around you. Maybe you have pine straw that could act like brush bristles, or you could use seed pods from trees as a painting utensil.
- Clean up by throwing away the dishes you mixed your pigments in and disposing of the found materials you used. Wash your hands.

→ DISCUSS

What was noticed or discovered?

Show someone your cave paintings and share the story you created.

WEEK 1 45m Art History - Lesson 2

Sumerian Art

Materials: The Arts: A Visual Encyclopedia, collage materials such as different types and colors of paper (can be scraps), glue sticks, gold leaf, 12"x18" black construction paper, fine point pens (such as Sharpie), scissors, pencil, ruler, colored pencils, crayons, etc., gallon-sized Ziplock bag

PREP: Students will have five class periods to do the assigned reading, watch the videos, and work on this project.

→ INTRO

Look at and read through p.18-19 in The Arts: A Visual Encyclopedia

→ VIEW, NARRATE, & DISCUSS

∞ Video Link: Standard of Ur

∞ Image Link: Google Arts Standard of Ur

∞ Video Link: How I Collage... (Start watching at 10:40. This is how you

Term 1

can make collages.)

→ PRACTICE

You will create your own Standard of Ur by creating a collage.

Think about the different layers of the Standard of Ur and divide your paper horizontally and equally into three sections using your pencil and ruler.

Create a design with different colors and shapes of paper that is about 1" wide around the outside of the paper and over the horizontal lines you just drew. This will create a frame similar to what you see on the Standard of Ur. You can add more detail to this design with drawing tools like crayons, pens, and pencils.

You can choose to do a peacetime scene or a wartime scene. If you finish your scene before the end of the five class times, you can create the other scene too.

Take a minute to think through and plan what each scene will look like.

Remember how the original standard was divided by social classes on the peace side. That is one way to organize your scenes, but you can choose to do it any way you would like.

Create the people, animals, and objects by cutting different kinds and colors of paper into shapes. Glue those pieces on your standard. You do not have to copy the Standard of Ur exactly. You are free to be creative. Think big shapes with your paper pieces, like the head and body. Then use a colored pencil or ink pen to add the details of the face or the designs on the clothing.

Clean up each day by gathering all of your scraps and placing them in a gallon-sized Ziplock bag.

You will have four more class periods to work on your Standard of Ur.

WEEK 2 45m Art History - Lesson 3

Sumerian Art

Materials: The Arts: A Visual Encyclopedia, collage materials such as different types and colors of paper (can be scraps), glue sticks, gold leaf, 12"x18" black construction paper, fine point pens (such as Sharpie), scissors, pencil, ruler, colored pencils, crayons, etc., gallon-sized Ziplock bag

→ PRACTICE

This is Day 2 of working on your Standard of Ur collage. Aim to finish at least one level today.

Use the gold leaf to add to special areas in the frame. You can also use it in other areas, but don't overuse it. You will have other assignments in Term 2 that take advantage of the gold leaf as well.

WEEK 2 45m Art History - Lesson 4

Sumerian Art

Materials: The Arts: A Visual Encyclopedia, collage materials such as different types and colors of paper (can be scraps), glue sticks, gold leaf, 12"x18" black construction paper, fine point pens (such as Sharpie), scissors, pencil, ruler, colored pencils, crayons, etc., gallon-sized Ziplock bag

→ PRACTICE

Continue working on your Standard of Ur collage. You will have two more classes after this to finish it.

Term 1

WEEK 3 45m Art History - Lesson 5

Sumerian Art

Materials: The Arts: A Visual Encyclopedia, collage materials such as different types and colors of paper (can be scraps), glue sticks, gold leaf, 12"x18" black construction paper, fine point pens (such as Sharpie), scissors, pencil, ruler, colored pencils, crayons, etc., gallon-sized Ziplock bag

→ PRACTICE

Continue working on your Standard of Ur collage. You will have one more class after this to finish it.

WEEK 3 45m Art History - Lesson 6

Sumerian Art

Materials: The Arts: A Visual Encyclopedia, collage materials such as different types and colors of paper (can be scraps), glue sticks, gold leaf, 12"x18" black construction paper, fine point pens (such as Sharpie), scissors, pencil, ruler, colored pencils, crayons, etc., gallon-sized Ziplock bag

→ NOTE

You will need a brown grocery bag or brown craft paper for the next lesson.

→ PRACTICE

Plan to finish your collage today. If you haven't added details with colored pencils, pens, or crayons, do that now.

WEEK 4 45m Art History - Lesson 7

Ancient Egyptian Art

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), pencils, brown paper bag (grocery bag or craft paper will work), black, silver and/or gold metallic pens (such as Sharpies), glue sticks, scissors, profile picture printed to 8.5x11, colored pencils, crayons, markers or tempera sticks (any of these will do for adding color).

PREP: You will need to take a picture of the student close enough to see their head, neck, and shoulders (bust). Students need to stand facing forward and turn their head either to the left or to the right. Their profile is what they will use for the project. (Think figures in traditional Ancient Egyptian art.) You will print this photo on regular copy paper in black and white.

→ NOTE

Students will have four class periods to complete this project, which includes reading, viewing, narrating, and working on the project.

→ INTRO

Read p.20-23 in The Arts: A Visual Encyclopedia and p.14-15 in Children's Book of Art.

→ PRACTICE

1. Read the assignment in INTRO.
2. Watch the tutorial video.
∞ Video Link: Egyptian Portraits
3. Take a photo of yourself, like in the tutorial, after cutting out and taping down your brown paper bag.
4. Carefully cut out your profile picture. Cut around your face, neck, and

Term 1

- shoulders. Cut your brown paper to be about 11x14".
5. Glue this to the brown paper background. Let the glue dry for a few minutes.
 6. Study the crowns and neck embellishments of Pharaohs and Queens of Egypt in the provided link.
∞ Image Link: Egyptian Portrait Examples
 7. Choose the crown you will place on your head and decide on the look of your neck embellishments. Look at the examples of completed projects to get an idea of what you can do.
 8. Clean up. Store your artwork in a safe place where it can lie flat.

WEEK 4 45m Art History - Lesson 8

Ancient Egyptian Art

□ Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), pencils, brown paper bag (grocery bag or craft paper will work), black, silver and/or gold metallic pens (such as Sharpies), glue sticks, scissors, profile picture printed to 8.5x11, colored pencils, crayons, markers or tempera sticks (any of these will do for adding color).

PREP: Pull together all of the necessary materials before beginning.

→ INTRO

Remember which crown you decided on from the last lesson.

→ PRACTICE

1. Use a regular pencil to draw the crown on the head of your profile. Think about how it would fit appropriately on your head. Be sure to draw it in proportion to your head!
2. Lightly sketch in your neck embellishments, beards, and/or earrings. Make all things in proportion. Remember that the traditional ancient Egyptian portrait is the head in profile, while the shoulders are facing perfectly forward.
3. Use whatever media (tempera sticks, colored pencils, crayons, markers) you have to add color to your crown, neck embellishments, and whatever else you have added to your photo.
4. You will have two more lesson times to complete this project. Work carefully.

∞ Video Link: Egyptian Portraits

∞ Image Link: Egyptian Portrait Examples

WEEK 5 45m Art History - Lesson 9

Ancient Egyptian Art

□ Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional) pencils, brown paper bag (grocery bag or craft paper will work), black, silver and/or gold metallic pens (such as Sharpies), glue sticks, scissors, profile picture printed to 8.5x11, colored pencils, crayons, markers or tempera sticks (any of these will do for adding color).

PREP: Pull together all of the necessary materials before beginning.

→ PRACTICE

Continue working on your Ancient Egyptian Pharaoh or Queen portrait. You have this lesson and one more to complete it.
If you have not yet, add metallic markers to your design. Use the black pen to apply eye makeup like an ancient Egyptian would have had.

Term 1

∞ Video Link: Egyptian Portraits
∞ Image Link: Egyptian Portrait Examples

WEEK 5 45m Art History - Lesson 10

Ancient Egyptian Art

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional) pencils, brown paper bag (grocery bag or craft paper will work), black, silver and/or gold metallic pens (such as Sharpies), glue sticks, scissors, profile picture printed to 8.5x11, colored pencils, crayons, markers or tempera sticks (any of these will do for adding color).

PREP: Pull together all of the necessary materials before beginning.

→ PRACTICE

Complete your Ancient Egyptian Pharaoh or Queen portrait.

∞ Video Link: Egyptian Portraits
∞ Image Link: Egyptian Portrait Examples

WEEK 6 45m Art History - Lesson 11

Greek Art

Materials: The Arts: A Visual Encyclopedia, flour, water, container for holding flour mixture (disposable is best; i.e., yogurt container, aluminum pan, etc.), balloon (8-12"), duct tape, scissors, newspaper, cardstock or cardboard (you can also recycle round oatmeal containers, toilet paper tubes, cereal boxes, etc.), paintbrushes, acrylic paints in terracotta, black and white (or use black sharpie after painting terracotta), water cup

→ NOTE

An alternative to using newspaper is recycled copy paper or tissue paper. The tissue paper may need a few additional layers.

→ NOTE

Students will have five lesson times to complete, reading, viewing, constructing, and finishing this project.

PREP: Rip newspaper into 1"x3" or longer strips. You will need a lot of newspaper. Make the flour paste by combining 1 cup of flour with two or three cups of water. It should be liquidy but opaque, not translucent. Watch this video if you need help understanding how to construct and paper mache.

∞ Video Link: How to Make Paper Mache Vase

→ INTRO

Read p.26-31, 174-175 in The Arts: A Visual Encyclopedia.

→ PRACTICE

1. View the Greek Vase examples.

∞ Image Link: Google Arts and Culture Greek Vases

2. Begin constructing your vase. Blow up your balloon to almost full, but do not blow it up completely. Cut cardboard or cardstock into 2 strips, each 1-3" wide, bend each one into a ring, and tape them together. Use these strips for the foot and the top of the vase. Tape them onto your balloon in the way you want your vase to look. (Wait to add handles.)
3. Put on your first layer of paper mache, being careful to completely cover the entire surface of your construction and paying careful

Term 1

attention to the places construction pieces touch. Let that layer dry completely.
4. Clean up.

WEEK 6 45m Art History - Lesson 12

Greek Art

Materials: The Arts: A Visual Encyclopedia, flour, water, container for holding flour mixture (disposable is best; i.e., yogurt container, aluminum pan, etc.), balloon (8-12"), duct tape, scissors, newspaper, cardstock or cardboard (you can also recycle round oatmeal containers, toilet paper tubes, cereal boxes, etc.), paintbrushes, acrylic paints in terracotta, black and white (or use black sharpie after painting terracotta), water cup

PREP: Make more flour and water paste and cut/tear more newspaper strips as necessary.

→ PRACTICE

1. If you are adding handles, construct them out of cardboard/cardstock strips and tape them on your dried paper mache vase. If you are not adding handles, then skip this step.
2. Add a second layer of paper mache, being sure to incorporate your handles. Wrap them in a layer of paper mache. Let this layer dry for at least ten complete minutes.
3. Add a third layer of paper mache. Let it dry.
4. Clean up.
5. If you have time left in your lesson, start planning your vase surface design on a scrap piece of paper.

WEEK 7 45m Art History - Lesson 13

Greek Art

Materials: The Arts: A Visual Encyclopedia, flour, water, container for holding flour mixture (disposable is best; i.e., yogurt container, aluminum pan, etc.), balloon (8-12"), duct tape, scissors, newspaper, cardstock or cardboard (you can also recycle round oatmeal containers, toilet paper tubes, cereal boxes, etc.), paintbrushes, acrylic paints in terracotta, black and white (or use black sharpie after painting terracotta), water cup

PREP: Make more flour and water paste and cut/tear more newspaper strips as necessary.

→ PRACTICE

1. Add a fourth layer of paper mache. Let it dry for at least ten minutes.
2. Add a fifth layer of paper mache.
3. Clean up.
4. If you have time left in the lesson, you can look at more examples of Greek vases and work on planning your surface design.

Term 1

WEEK 7 45m Art History - Lesson 14

Greek Art

Materials: The Arts: A Visual Encyclopedia, flour, water, container for holding flour mixture (disposable is best; i.e., yogurt container, aluminum pan, etc.), balloon (8-12"), duct tape, scissors, newspaper, cardstock or cardboard (you can also recycle round oatmeal containers, toilet paper tubes, cereal boxes, etc.), paintbrushes, acrylic paints in terracotta, black and white (or use black sharpie after painting terracotta), water cup

PREP: Prepare your work surface for painting.

→ INTRO

If you have not already planned your surface design, look through p.26-31 in The Arts: A Visual Encyclopedia to get some ideas.

→ PRACTICE

1. Paint your entire vase a terracotta color. (You could mix brown with orange if you did not find a terracotta color, or you could mix a little blue in the orange). Let it dry completely.
2. If your vase needs a second coat of the terracotta color, complete that.
3. Use white and black to add the surface design to your vase. You have this lesson time and one more to complete the vase.

WEEK 8 45m Art History - Lesson 15

Greek Art

Materials: The Arts: A Visual Encyclopedia, flour, water, container for holding flour mixture (disposable is best; i.e., yogurt container, aluminum pan, etc.), balloon (8-12"), duct tape, scissors, newspaper, cardstock or cardboard (you can also recycle round oatmeal containers, toilet paper tubes, cereal boxes, etc.), paintbrushes, acrylic paints in terracotta, black and white (or use black sharpie after painting terracotta), water cup

PREP: Prepare your work surface for painting.

→ PRACTICE

This is your last lesson time. Complete the vase by the end of the time.

WEEK 8 45m Art History - Lesson 16

Mayan Art

Materials: 6×6×1 slab of air-dry clay, clay tools, water and sponge, plastic bag and paper towels (for storing your project between lessons), paper plate, piece of cardboard or other surface to place your clay slab on while working and storing.

PREP: Roll out an air-dry clay slab to measure 6 inches by 6 inches and 1 inch deep. You may need to cover your work surface before getting started.

→ NOTE

Students will have three lesson times to view, narrate, and work on this project.

→ INTRO

Watch the Mayan video to learn about the Mayan culture. Look through the images on the link. Choose one of the images to copy. Students will be creating a relief sculpture in the Mayan art style. Students will be carving in the way they learned in "Stone Carving" handicrafts, if they have tried

Term 1

that in the past. Watch the "Stone" Carving tutorial for a refresher on relief carving.

∞ Video Link: Exploring Mayan Civilizations for Kids

∞ Image Link: Ancient Mayan Examples

∞ Video Link: "Stone" Carving (optional)

→ PRACTICE

1. Beginning with your 6×6×1 square of clay, lightly sketch your chosen design on the surface of the clay with any tool.
2. Decide which parts of your design you will leave and which parts you will carve away.
3. Begin carefully carving. Remember that you can always take away more clay, but if you cut too deeply at first, it will be difficult to correct.
4. You will have 2 more lesson times to work on this project.
5. Clean up in the same way you do with Clay Modeling handicrafts. Wrap your slab in damp paper towels, place it in the plastic bag, and tuck the bag under your project to keep the air from getting in.

→ NOTE

If you are using cardboard to store your slab on, place a plastic bag around the cardboard before placing your clay on top. Cardboard will pull the moisture out of the clay and cause it to dry too fast.

WEEK 9 45m Art History - Lesson 17

Mayan Art

□ Materials: 6×6×1 slab of air-dry clay, clay tools, water and sponge, plastic bag and paper towels (for storing your project between lessons), paper plate, piece of cardboard or other surface to place your clay slab on while working and storing.

→ PRACTICE

Continue working on taking clay away from your slab in order to reveal your design. Clean up at the end of your lesson time and wrap up your slab in damp paper towels and a plastic bag.

WEEK 9 45m Art History - Lesson 18

Mayan Art

□ Materials: 6×6×1 slab of air-dry clay, clay tools, water and sponge, plastic bag and paper towels (for storing your project between lessons), paper plate, piece of cardboard or other surface to place your clay slab on while working and storing.

→ NOTE

This is the last lesson time to view, narrate, and work on this project.

→ PRACTICE

Continue working on taking clay away from your slab in order to reveal your design. Finish your project by the end of this lesson. Clean up.

WEEK 10 45m Art History - Lesson 19

Roman Art

□ Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), pencils, colored tape, a piece of construction paper in any color, picture reference to work from

→ INTRO

Read p.32-33 in The Arts: A Visual Encyclopedia and p.22-23 in Children's Book of Art.

View the video link to see how to create a tape mosaic.

Term 1

- ∞ Video Link: Tape Mosaic Example (mosaic pieces overlap each other)
- ∞ Article Link: Another Tape Mosaic Example (mosaic pieces are consistently spaced from each other)

→ PRACTICE

1. Sketch out your design with a pencil on your construction paper. Use a reference photo to copy if you need help, or create from your own imagination.
2. Either cut or tear your tape into 1/2" pieces as you fill in your picture. Remember to either leave a consistent space between each mosaic piece or have the pieces overlap each other slightly.
3. You will have this lesson time and one more to complete this project.

WEEK 10 □ 45m Art History - Lesson 20

Roman Art

□ Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), pencils, colored tape, a piece of construction paper in any color, picture reference to work from

→ PRACTICE

Finish your mosaic by the end of this lesson. Remember to either leave a consistent space between each mosaic piece or have the pieces overlap each other slightly.

- ∞ Video Link: Tape Mosaic Example
- ∞ Article Link: Another Tape Mosaic Example

WEEK 11 □ 45m Art History - Lesson 21

Asian Art

□ Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), bamboo brush (or bushy round #12 brush), loose white paper (i.e., drawing paper, rice paper, copy paper, newsprint), black India ink (or neutral watercolor), Styrofoam or porcelain plate for palette, paper towels, water containers

PREP: You may want to prepare your work surface, as the ink is likely to bleed through the paper.

→ INTRO

Read p.34-35, 176-177 in The Arts: A Visual Encyclopedia and p.28-29 in Children's Book of Art.

→ VIEW, NARRATE, & DISCUSS

Sumi-e painting began in ancient China and made its way all over eastern Asia as an art form. Each country has a slightly different technique. In Japan, it is called Sumi-e. This is the style we will be creating. It is traditionally painted with ink on rice paper with a bamboo brush. The brush strokes are very similar to our brush drawing lessons and incorporate the strokes, techniques (i.e., dry brush, wet on wet, etc.), and brush forms that you have practiced many times before. Try to call those strokes out when you see them in the videos.

Watch the Introduction to Sumi-e Painting video

- ∞ Video Link: Intro to Sumi-e Painting

→ PRACTICE

Create a few bamboo stalks and some leaves based on what the video showed.

Term 1

WEEK 11 45m Art History - Lesson 22

Asian Art

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), bamboo brush (or bushy round #12 brush), loose white paper (i.e., drawing paper, rice paper, copy paper, newsprint), black India ink (or neutral watercolor), Styrofoam or porcelain plate for palette, paper towels, water containers,

PREP: You may want to prepare your work surface, as the ink is likely to bleed through the paper.

→ PRACTICE

Watch the following videos and try the techniques that the artists are using.

- ∞ Video Link: Bamboo with Leaves
- ∞ Video Link: Sumi-e Ink Poppy
- ∞ Video Link: How to Paint an Orchid

WEEK 12 45m Art History - Lesson 23

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:
Art History

WEEK 12 45m Art History - Lesson 24

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:
Art History

Term 2

WEEK 1 45m Art History - Lesson 25

Byzantine Art

Materials: The Arts: A Visual Encyclopedia, Art book, pencil, watercolor or markers, gold leaf (and glue sticks) or gold markers

→ INTRO

Read p.36-41 in The Arts: A Visual Encyclopedia. Linger over the "avoiding Realism" section on p.36. Look through the images and notice the flat colors. Shading is applied, such as in fabric folds, but it does not succeed in creating a realistic look. Also, notice that objects have heavy outlines in Byzantine art.

→ PRACTICE

1. Look again at the icons on p.38-39. Choose one to replicate in your Art book. Sketch it out first in pencil.
2. Add color to your icon with either watercolors or markers.

WEEK 1 45m Art History - Lesson 26

Byzantine Art

Materials: The Arts: A Visual Encyclopedia, Art book, pencil, watercolor or markers, gold leaf or gold markers

→ PRACTICE

1. Look again at the icons on p.38-39. Once you finish adding color to your icon, apply a darker outline around all of your images.
2. Add gold in different areas of your icon, especially in the background.
3. Finish your icon by the end of this lesson.

→ EVALUATE

Do you have a preference for or an aversion to Byzantine art? Why? What is it that you are drawn to or repelled by?

WEEK 2 45m Art History - Lesson 27

Islamic Art

Materials: The Arts: A Visual Encyclopedia, Styrofoam or glass sheet (can use Styrofoam plate or sheet of glass or plexiglass from old picture frame), brayer, printing ink, watercolors, 8x8 square of multimedia paper (you can cut this out of your Art book), paintbrush, water container, paper towels, circle templates (optional), ruler (optional), compass (optional), ballpoint pen, stylus or awl/needle tool, plastic spoon (optional)

PREP: Cut a Styrofoam sheet into a 4" square for Lesson 28.

→ INTRO

- Read p.42-43 in The Arts: A Visual Encyclopedia.
 - Watch this video.
- ∞ Video Link: Islamic Tile Designs

→ PRACTICE

You will create an Islamic tile through printmaking.

1. Use your watercolors to color the entire 8x8" white paper. You can do this in any design.
2. Draw four 4" squares in your Art book. Sketch four different designs in each square, like the example in the video. Remember that each design must radiate from the corner. Use the circle templates, rulers, or compass if you need help with lines and arches.
3. Clean up.

Term 2

WEEK 2 45m Art History - Lesson 28

Islamic Art

Materials: The Arts: A Visual Encyclopedia, 4" Styrofoam sheet for printing on (you can cut this out of the bottom of a Styrofoam plate), glass sheet (can use Styrofoam plate or sheet of glass or plexiglass from old picture frame), brayer, printing ink, watercolors, 8x8" square of multimedia paper (cut this out of your Art book), paintbrush, water container, paper towels, ballpoint pen, stylus or awl/needle tool, plastic spoon (optional)

PREP: You may want to cover your work surface. Students will be doing printmaking during this lesson.

→ INTRO

If you need to, re-watch the video before beginning the next steps.

∞ Video Link: Islamic Tile Designs

→ PRACTICE

1. Choose your favorite tile design. Carefully cut it out of your Art book.
2. Lay your cut-out tile design on top of your 4" Styrofoam square. Trace over your drawing, pushing down more than usual but not ripping your drawing. The purpose is to transfer the design from the paper onto the Styrofoam square.
3. Put printing ink on the glass sheet and brayer it out like in the video.
4. Roll the ink-loaded brayer over your Styrofoam design, covering the entire square, but not forcing ink into the lines.
5. Print your design in one corner of your pre-painted 8" square. Rub the back of the Styrofoam with the palm of your hand or the bottom of a plastic spoon.
6. Repeat this in each quarter of the 8" square.
7. Clean up!

WEEK 3 45m Art History - Lesson 29

Illuminated Manuscripts

Materials: The Arts: A Visual Encyclopedia, Art book, ruler, gold markers, watercolor or colored pencils, black permanent ink pen, pencil

→ INTRO

Read p.44-45 in The Arts: A Visual Encyclopedia. View the examples of the project. Watch the making of manuscripts video.

∞ Image Link: Illuminated Manuscripts

∞ Video Link: Making Manuscripts

→ PRACTICE

You will create your own illuminated manuscript based on the Book of Kells.

1. Using your ruler, draw a 1" thick frame around the edge of the paper.
2. Look at the designs of the Celtic knots in the images in The Arts: A Visual Encyclopedia. Create your own designs inside the frame you drew.
3. Draw the first letter of your first or last name inside the frame. Make it large. Take up the space inside the frame. Also, make the letter thick so that you can add decoration or color inside of it. You can create the letter in any style you would like; i.e., bubble, block, Times New Roman, cursive, calligraphy, etc. Think of all of the styles of lettering you learned when working through the lettering lessons. (You will only have the letter of your first or last name. You will not add other words.)

Term 2

4. Add flourishing designs in and around your letter that give meaning to who you are, i.e., if you love baseball, add bats and balls as elements of your design.

WEEK 3 45m Art History - Lesson 30

Illuminated Manuscripts

Materials: The Arts: A Visual Encyclopedia, Art book, ruler, gold markers, watercolor or colored pencils, black permanent ink pen, pencil

→ INTRO

Look through the examples again to refresh your memory of your plan and think about the colors you will add.

∞ Image Link: [Illuminated Manuscripts](#)

→ PRACTICE

Continue working on your illuminated manuscript. Add color to your design during this lesson. Use the black pens to outline and emphasize certain parts, but not all parts. You will have one more lesson time to complete your illuminated manuscript.

WEEK 4 45m Art History - Lesson 31

Illuminated Manuscripts

Materials: The Arts: A Visual Encyclopedia, Art book, ruler, gold markers, watercolor or colored pencils, black permanent ink pen, pencil

→ INTRO

Look through the examples again to refresh your memory of your plan and think about the colors you will add.

∞ Image Link: [Illuminated Manuscripts](#)

→ PRACTICE

Continue working on your illuminated manuscript. Add gold as you see fit. Finish by the end of the lesson.

WEEK 4 45m Art History - Lesson 32

Gothic Art

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), pastels to crush for pigment (it is best to use the basic color wheel + black, brown and white), egg, water, plastic spoon, plastic fork, old muffin tin, plastic egg carton or paint palette for mixing in, bowl, rock, paintbrush, Art book or loose mixed media paper, old bowl or plate for grinding pastels, paper towels

PREP: You need to separate the yolk from the egg white. We will use the yolk but discard the whites. Beat the yolk with a few tablespoons of water until it is frothy.

→ INTRO

Read p.46-47 in The Arts: A Visual Encyclopedia and p.30-31 in Children's Book of Art. If you have ever wondered why the colors are the tones they are in Gothic and pre-Renaissance art, now you know. They come from natural objects like plant roots and heavy metals. Chemistry in art!

∞ Video Link: [Homemade Egg Tempera](#)

→ PRACTICE

1. Grind each pastel into fine powder with the rock. Pour the powder into its own container or well in your palette. Wipe the rock off with a paper

Term 2

towel before moving on to the next color.

2. Once you have all of the pigments ground and separated, divide the watered-down egg yolk into each container. Use a spoon to thoroughly stir each mixture, wiping the spoon on a paper towel before moving on to the next color.

3. Create a painting of whatever you would like with your homemade tempera colors.

4. Clean up!

WEEK 5 45m Art History - Lesson 33

Romance and Reality

 Materials: Computer

PREP: Students will watch Kenneth Clark's Civilization Episode 3 for their lesson. Kenneth Clark was a renowned history scholar who died in 1983. These episodes were originally aired on the BBC in the 1960s and 1970s.

→ NOTE

The episode is 42 minutes long. The purpose of watching the video is to see artworks in their natural settings and to see the landscape of that region of Earth. As a bonus, students will glean Kenneth Clark's passion for the connectivity of history.

→ PRACTICE

Watch Kenneth Clark's Civilization Episode 3: Romance and Reality. This will give you a sense of the physical surroundings of the artists working in this part of the world during the Gothic through the Renaissance periods. You will also see many works of art videoed in their proper settings; i.e., frescoes on walls, mosaics on floors, etc. It will give you a sense of proportion and scale of the art pieces.

∞ Video Link: Civilization: Romance and Reality. The episode ends at 42:20. Do not watch past that.

WEEK 5 45m Art History - Lesson 34

Gothic Art

 Materials: The Arts: A Visual Encyclopedia, cardboard, acrylic paints, gold leaf, glue sticks, paintbrushes, water container, paper towels, craft glue, scissors, box cutter or X-Acto knife, Art book, pencil

PREP: Students will need two sheets of cardboard measuring 11x14". You can recycle cardboard from boxes or packaging.

→ NOTE

Students will have a total of four lesson times to complete this collage.

→ INTRO

Read p.48-49 in The Arts: A Visual Encyclopedia. Spend time lingering over the paintings, looking closely at the people and the details. You will choose one person to "zoom in" on, creating a collage and painting a portrait over the collage with acrylic paints. Watch the tutorial video and view the examples before beginning.

∞ Image Link: Cardboard Collage Examples

∞ Video Link: Cardboard Collage

→ PRACTICE

After choosing your favorite figure in one of the paintings on p.48-49 in The Arts: A Visual Encyclopedia, make a sketch of this figure. You will need to make it larger than what is in the book and even larger still when you paint it on your cardboard collage.

Term 2

WEEK 6 45m Art History - Lesson 35

Gothic Art

Materials: The Arts: A Visual Encyclopedia, cardboard, acrylic paints, gold leaf, glue sticks, paintbrushes, water container, paper towels, craft glue, scissors, box cutter or X-Acto knife, Art book, pencil

→ INTRO

You may need to watch the tutorial video or view the examples again before getting started.

∞ Image Link: Cardboard Collage Portrait Examples (to come)

∞ Video Link: How to Make a Gothic Collage Portrait (to come)

→ PRACTICE

1. You should have two cardboard sheets measuring about 11x14." Set one sheet aside. With the other sheet, carefully cut it into 1/2" strips. It does not matter which way you cut it- horizontal or vertical.
2. Cut each of those 1/2" strips into 2" long strips. You should have a lot of strips!
3. Bring back the uncut sheet of cardboard. Arrange the cardboard strips into a circle, like in the tutorial video, in two places on your cardboard sheet. Make layers of the circle, thinking about the circle radiating. Once you are satisfied with your placement of strips, glue them down with craft glue.
4. Clean up.

WEEK 6 45m Art History - Lesson 36

Gothic Art

Materials: The Arts: A Visual Encyclopedia, cardboard, acrylic paints, gold leaf, glue sticks, paintbrushes, water container, paper towels, craft glue, scissors, box cutter or X-Acto knife, Art book, pencil

PREP: Students will paint during this lesson. Prepare your work surface.

→ INTRO

Bring your original sketch out. Look back at the image that you chose in The Arts: A Visual Encyclopedia. Study it for a few minutes, noticing the coloring and shadows. Remember that Gothic Art has many of the same paintings and images as Christian Art, but they are more realistic-looking.

→ PRACTICE

1. Lightly sketch your image onto your cardboard collage.
2. Begin painting your image using acrylic paint. (Acrylic paint will sit on the surface of the cardboard as opposed to soaking in like other paint mediums will do. This will cause the finished project to look as if it were painted on a wooden structure as opposed to cardboard. Put your paint on thick.
3. Work for the entire lesson time. You will have one more lesson time. You will add the gold leaf during the last lesson time.
4. Clean up. Wash your brushes with soap and cool water until the soap no longer changes color. Lay them flat to dry.

∞ Image Link: Cardboard Collage Example

∞ Video Link: Cardboard Collage

Term 2

WEEK 7 45m Art History - Lesson 37

Gothic Art

Materials: The Arts: A Visual Encyclopedia, cardboard, acrylic paints, gold leaf, glue sticks, paintbrushes, water container, paper towels, craft glue, scissors, box cutter or X-Acto knife, Art book, pencil

PREP: Students will paint during this lesson. Prepare your work surface.

→ PRACTICE

Finish your painting if you have not yet. While the paint is tacky, you can add the gold leaf to it. If it is completely dry, use a glue stick to apply the gold leaf.

∞ Image Link: Cardboard Collage Example

∞ Video Link: Cardboard Collage

Clean up!

WEEK 7 45m Art History - Lesson 38

Stained Glass

Materials: Computer

PREP: Students will need a glass sheet or jar (Mason or recycled clear jar) for the next project.

→ INTRO

Students will spend the lesson time watching videos on how to make stained glass and its history. Watch the videos in order.

→ VIEW, NARRATE, & DISCUSS

∞ Video Link: Primitive Glassmaking (Learn how hard it is to make glass to begin with!)

∞ Video Link: How Was It Made?

∞ Video Link: Secrets of How to Make Stained Glass Windows

∞ Video Link: 1,000 Years of Stained Glass

WEEK 8 45m Art History - Lesson 39

Stained Glass

Materials: glass sheet (from a cheap 8x10" picture frame) or jar, scrap paper the same size as the glass, pencil, black marker (Sharpie), photos for ideas (optional), Gallery Glass black leading, craft brushes (optional), water container (optional if you choose to use brushes), paper towels

PREP: Prepare your work surface.

→ NOTE

Students will have three lesson times to complete this project.

→ INTRO

Students will create a faux stained glass.

∞ Video Link: Faux Stained Glass

→ PRACTICE

1. Prepare your cartoon (remember this is what your pattern is called, not that you are to draw a cartoon) on the scrap paper. Once you have sketched it out, trace over all pencil lines with a black marker.

2. Place your scrap paper under your glass sheet or fit it into your jar and tape it carefully in place. You do not want the tape to be in the way of the "leading" lines.

Term 2

3. Carefully trace over all of your lines with the black leading. You may want to try to draw a line on a scrap piece of paper to get the feel of how to work with the bottle. Do not use a lot- you need it for your project!
4. Set your leaded glass in a safe place to dry until your next lesson.
5. Clean up!

WEEK 8 45m Art History - Lesson 40

Stained Glass

Materials: glass sheet (from a cheap 8x10" picture frame) or jar, scrap paper the same size as the glass, pencil, black marker (Sharpie), photos for ideas (optional), Gallery Glass black leading, craft brushes (optional), water container (optional if you choose to use brushes), paper towels

PREP: Prepare your work surface.

→ PRACTICE

1. Check your black leaded lines and touch up any that might need it.
2. Begin adding color in the spaces between the leading lines as you decided when planning your cartoon. You could squeeze the glass paint straight from the tube to fill the entire space, or you could squeeze a dollop in the space and use a craft brush to move it around where you need it.
3. Work for your entire lesson time. You will have one more lesson time to complete this project.
4. Clean up! Be sure to wash the brushes (if you used them) with cool, soapy water.

∞ Video Link: Faux Stained Glass

WEEK 9 45m Art History - Lesson 41

Stained Glass

Materials: glass sheet (from a cheap 8x10" picture frame) or jar, scrap paper the same size as the glass, pencil, black marker (Sharpie), photos for ideas (optional), Gallery Glass black leading, craft brushes (optional), water container (optional if you choose to use brushes), paper towels

PREP: Prepare your work surface.

→ PRACTICE

Finish your stained glass project by the end of this lesson. You could wrap the edges of your glass sheet with a metallic tape or place it back into the original frame and place it in a window. If you created your stained glass on a jar, you could place a candle inside or put flowers in it.

∞ Video Link: Faux Stained Glass

WEEK 9 45m Art History - Lesson 42

Northern Renaissance Art

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional)

→ INTRO

Read and narrate p.50-51, 74-81, and 178-179 in The Arts: A Visual Encyclopedia and p.32-33 and 38-39 in Children's Book of Art.

→ PRACTICE

Term 2

Take the entire lesson time to linger over the works of art represented in the pages you are reading through. Next, we will learn about the Italian Renaissance and linger there for a while.

WEEK 10 45m Art History - Lesson 43

Italian Renaissance Art

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional)

→ INTRO

Read and narrate p.52-73 in The Arts: A Visual Encyclopedia and p.36-37 in Children's Book of Art.

→ PRACTICE

Take the entire lesson time to linger over the works of art represented in the pages you are reading through.

WEEK 10 45m Art History - Lesson 44

Italian Renaissance Art

Materials: The Arts: A Visual Encyclopedia, Art book, pencil, ruler, and any coloring materials (watercolor, colored pencils, crayons, tempera sticks, etc.)

→ INTRO

Flip back through the paintings on p.50-67 in The Arts: A Visual Encyclopedia. Pay attention to the architectural elements in the paintings. The Renaissance was the beginning of perspective in art, which is a mathematical concept. View the tutorial video.

∞ Video Link: Perspective

→ PRACTICE

In your Art book, create a scene of people interacting with each other within an architectural element similar to Raphael's The School of Athens on p.66 or Lippi's The Annunciation on p.54. It's okay to create your own version of the Last Supper or the Madonna and Child, or you could create a modern scene.

WEEK 11 45m Art History - Lesson 45

Italian Renaissance Art

Materials: The Arts: A Visual Encyclopedia, Art book, pencil, ruler, any coloring materials (watercolor, pastels, colored pencils, crayons, tempera sticks, etc.)

→ PRACTICE

Spend this lesson time working on your Renaissance Drawing. You will have one more lesson time after this.

WEEK 11 45m Art History - Lesson 46

Italian Renaissance Art

Materials: The Arts: A Visual Encyclopedia, Art book, pencil, ruler, any coloring materials (watercolor, pastels, colored pencils, crayons, tempera sticks, etc.)

→ PRACTICE

Complete your Renaissance drawing by the end of the lesson. What did you learn about fitting humans into an architectural element? Was it a struggle, or did the frame of the structure help you position your human figures?

Term 2

WEEK 12 45m Art History - Lesson 47

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:
Art History

WEEK 12 45m Art History - Lesson 48

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:
Art History

Term 3

WEEK 1 45m Art History - Lesson 49

Mannerism

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), watercolors, acrylics, colored pencils, tempera sticks, etc. (any media similar to these would work), loose paper (any size but larger is better, you may pull a sheet out of your art notebook), tape, dining table (or other large table you can lay under)

→ INTRO

Mannerism is the artistic style that bridged the span between the Renaissance and modern art. The colors were garish, and the figures were distorted by elongating them. Stretching out arms, legs, torsos, and necks made figures seem larger than life and was a visual means to communicate drama or importance, such as in Madonna With the Long Neck by Parmigianino on p.82 of The Arts: A Visual Encyclopedia. Michelangelo shifted into Mannerism towards the end of his artistic career. We can see this in his artwork on display in the Sistine Chapel. Looking up at the ceiling, you mostly see the influence of the Renaissance, but looking at his The Last Judgment on the altar wall, you see his shift to mannerism. Observe and discuss the similarities and differences between the Ceiling of the Sistine Chapel and The Last Judgment. Notice in the ceiling frescoes that figures are painted within architectural elements, and in The Last Judgment, there are no such elements.

∞ Image Link: The Ceiling of the Sistine Chapel by Michelangelo

∞ Image Link: The Last Judgment by Michelangelo

∞ Image Link: The Last Judgment at the end of the Sistine Chapel

→ READ

p.82-83 in The Arts: A Visual Encyclopedia

→ PRACTICE

While unconventional, we are going to marry two of Michelangelo's famous works into one project.

1. Tape a piece of paper underneath a table that you can easily fit under.
2. Use any of the listed coloring media to create an image of elongated figures in action, such as a basketball game or children on a playground.

Make arms, legs, torsos, and necks longer than normal. Use colors that wouldn't normally match next to each other.

3. At the end of your lesson, untape the painting and view it from a normal angle. How did you do with your mannerist style?
4. Clean up.

WEEK 1 45m Art History - Lesson 50

Mannerism

Materials: The Arts: A Visual Encyclopedia, black construction paper (in any size), pastels

PREP: Students will have three lessons to complete this assignment.

→ INTRO

Another Mannerist artist who has resurfaced in the recent past is Giuseppe Arcimboldo. Re-read the section titled Fruity Compositions on p.83 in The Arts: A Visual Encyclopedia, then watch the following videos. As you watch the video, notice the variety of the artwork that he created, and that he was quite gifted in his ability to render people, animals, and things in a realistic way. He spent many years honing his artistic skills before venturing into surrealism. You will find this with the great masters throughout modern art. Artists do not begin with abstract or nonobjective

Term 3

artwork. They spend many years building skills and paying close attention to their surroundings.

∞ Video Link: Arcimboldo: Nature and Fantasy

→ PRACTICE

We are going to make a portrait in the manner of Giuseppe Arcimboldo. Choose to think of fruit, vegetables, books, animals, etc. to create the human face.

1. Decide on which objects you will think of and begin drawing your face. It is best to start with the mass of the objects to lay out the face, neck, and shoulders before focusing on the details of the individual objects. You will have two more lesson times to work.

2. Clean up.

WEEK 2 45m Art History - Lesson 51

Mannerism

📖 Materials: The Arts: A Visual Encyclopedia, black construction paper, pastels

→ PRACTICE

1. Continue adding colors in shading, texture, and other details of the individual objects. Step back and look at your work. Are you seeing a person?

2. Work for the remainder of the lesson.

3. Clean up.

WEEK 2 45m Art History - Lesson 52

Mannerism

📖 Materials: The Arts: A Visual Encyclopedia, black construction paper, pastels

→ INTRO

Before beginning to work, watch this video on Giuseppe Arcimboldo.

∞ Video Link: This Fruity Painting is Very Weird

→ PRACTICE

- Plan to finish your portrait in the mannerist surrealist style of Giuseppe Arcimboldo by the end of the lesson.

- Clean up. Share your portrait with family and friends.

WEEK 3 45m Art History - Lesson 53

Baroque and Rococo

📖 Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional)

PREP: Please have your teacher preview the video "How to Recognize Baroque Art" to make sure it is appropriate.

→ INTRO

Baroque Art began in Europe in the late 1500s, following on the heels of the Mannerist style. It was full of life, drama, and detail. Many famous master artists are from this time period, such as Vermeer, Gentileschi, Fragonard, Diego Velázquez, Peter Paul Rubens, and Caravaggio. Though the Baroque style originated in Italy for the Catholic Church, King Louis XIV of France was a huge fan of the dramatic, ornate detail of the period, decorating palaces and summer homes in this style. Baroque gave way to an even more ornate and decorative style called Rococo. Rococo originated in France but spread throughout Europe as well. While Baroque was meant to glorify God, Rococo strove to glorify man.

★ TEACHER NOTE

You may want to preview the video "How to Recognize Baroque Art" at timestamp 1:30-2:26. It shows Michelangelo's David, which has male nudity.

Term 3

→ VIEW AND NARRATE

- ∞ Video Link: How to Recognize Baroque Art
- ∞ Video Link: Introducing the Rococo

→ READ

p.84-93 in The Arts: A Visual Encyclopedia and p.44-49 in Children's Book of Art. Take time to linger over the artwork. Notice the differences and similarities in the style.

WEEK 3 45m Art History - Lesson 54

Baroque and Rococo

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), camera, lamp, flashlight or spotlight, people, optional other props such as ornate costumes, hats, fabrics, jewelry, etc.

PREP: Students will need other people in order to complete this project. Students will need to use elaborate costuming and may need to rearrange furniture. They will be using cameras for this project as well.

→ INTRO

Look back through the images on p.84-93 in The Arts: A Visual Encyclopedia. What are the people doing? How are they standing or sitting? What do their clothes, hair, and accessories look like? What does the room in which they are in look like? What other details do you notice?

→ PRACTICE

You will need to enlist the help of family members and friends for this project! We will be exploring photography as our medium of choice.

1. Choose one or more of the paintings on those pages to re-create and photograph. Share the artwork with the people you have enlisted to help you. Decide on makeup, hair, clothing, and surroundings.
2. Set up your room as necessary. (Be sure to ask permission before using valuable objects or moving furniture around. Always clean up after yourself and put your objects away!)
3. Position your helpers appropriately and explain the facial expressions they will need to have for the photo.
4. Set up extreme lighting with the use of lamps, flashlights, or spotlights. Think about the dramatic lighting in Caravaggio's paintings, for example. The light is usually shining on the focal point of the painting.
5. Once you have all of the props and people in place, take a few photos of the scene. You can use editing tools to further intensify dramatic lighting in your finished photos.

Never share photos of yourself or others on social media or with friends unless you have the express permission of your parents and those in the photo.

WEEK 4 45m Art History - Lesson 55

Dutch Golden Age

Materials: The Arts: A Visual Encyclopedia, computer

→ INTRO

The Dutch Golden Age crossed over the Baroque period of art, but because Holland had such a force in art during this time, it stands out as its own genre. You will notice in your reading assignment that you will read again about Jan Vermeer. It is important to remember that he was a Baroque artist during the Dutch Golden Age. This genre included many celebrated women such as Rachel Ruysch, Maria Sibylla Merian, Judith Leyster, Maria van Oosterwijck, and many others who became very wealthy from their artistic and observational abilities. Rachel Ruysch outsold Rembrandt in paintings and success. It's important to note that

Term 3

Holland was a Protestant nation after the Reformation, and so they did not think it appropriate to paint Biblical scenes and actually whitewashed many churches, covering over frescoes from the past. Signs of the Reformation are visible throughout Europe now, as many churches are removing layers of plaster to reveal the art underneath. The focus of works of art became still life's and everyday scenes.

→ PRACTICE

Read p.94-101 in The Arts: A Visual Encyclopedia and then read through the link.

∞ Link: Discover The Work of The Dutch Golden Age Painters

WEEK 4 45m Art History - Lesson 56

Neoclassicism - Romanticism

Materials: The Arts: A Visual Encyclopedia, computer

→ INTRO & PRACTICE

Art movements tend to pick up speed at this point in history, the mid-1700s. We will begin to rapidly bounce from one movement to the next. Watch closely to see how each movement influences another and how different countries interact with or outright reject certain movements, as the English did when they developed the Pre-Raphaelite movement.

→ READ

p.104-113 and 180-181 in The Arts: A Visual Encyclopedia.

→ VIEW

View this video on the power of portraiture during the 18th century.

∞ Video Link: The Power of Portraits

WEEK 5 45m Art History - Lesson 57

19th Century Landscapes

Materials: The Arts: A Visual Encyclopedia, computer

→ INTRO

Landscapes became a prominent genre in Western Art in the 1800s. Before this time, landscapes were not usually a subject by themselves in a painting. Many schools of painting popped up during the 19th century throughout the western world that had their own distinct characteristics in rendering landscapes, for example, the Hudson River School in the United States, and almost 100 years later, the School of Seven came together in Canada. Notice the crossover in your reading of JMW Turner being considered both a landscape painter and a Romantic painter. Art Genres were changing so fast that labels became muddled, and many artists began to span many genres, as we will see later in artists like Pablo Picasso.

→ READ

Read p.114-119 in The Arts: A Visual Encyclopedia.

→ VIEW

View, read, and linger over the artwork on this link.

∞ Image Link: Ten Historical Landscape Painters to Get You Inspired

Term 3

WEEK 5 45m Art History - Lesson 58

19th Century Landscapes

Materials: The Arts: A Visual Encyclopedia, Art book, pastels or watercolors, photos of dynamic landscapes as reference (optional)

→ INTRO

Students will have the opportunity to create a dynamic landscape of their own.

→ PRACTICE

Either work from a photo reference or en plein aire (outside). Students will spend this lesson creating a dynamic landscape painting in either watercolors or pastels. Allow the paintings you have looked at to influence your choice of landscape. Try to push yourself to make it dramatic or vast. Don't forget to clean up at the end of your lesson!

Watch the tutorial if you need help figuring out how to paint a landscape.

∞ Video Link: How to Draw a Winter Landscape

WEEK 6 45m Art History - Lesson 59

Realism - Pre-Raphaelites and Global Influences

Materials: The Arts: A Visual Encyclopedia, computer

→ INTRO

As we have noted before, the periods of art history are moving fast, with one genre affecting the next. There is also an unmistakable global influence on Western art as travel becomes more commonplace.

→ PRACTICE

Read p.120-131 and look again at the sculpture on p.181 in The Arts: A Visual Encyclopedia.

WEEK 6 45m Art History - Lesson 60

Ukiyo-e Japanese Printmaking

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional), 4x6" linoleum block, Lino carving tools, 4x6" scrap paper to sketch out design, pencil, printing ink, brayer, wooden or plastic spoon, ink plate (recycle glass sheet from old frame), loose sheets of 4x6" paper for printing

PREP: Students will have four lessons to complete this

→ INTRO

Read p.132-133 in The Arts: A Visual Encyclopedia and p.58-59 in Children's Book of Art.

View this video on traditional Japanese printmaking.

∞ Video Link: Woodblock Printing Process- A Japan Journey

→ PRACTICE

Students will create linoleum prints. While this is not exactly the same as wood block printing, it is similar and more accessible to the classroom not outfitted with printmaking equipment. For the remainder of this lesson time, work on a design on your 4x6" scrap paper. You could make any kind of image- a portrait, cityscape, landscape, sailboat, or any other object(s) that you can think of. It is better if you keep your design more simplified and less detailed.

Term 3

WEEK 7 45m Art History - Lesson 61

Printmaking

Materials: 4x6" linoleum block, Lino carving tools, 4x6" scrap paper to sketch out design, pencil, printing ink, brayer, wooden or plastic spoon, ink plate (recycle glass sheet from old frame), loose sheets of 4x6" paper for printing

→ INTRO

Students will begin working on their linocuts.

→ PRACTICE

1. Watch the tutorial on how to create a linocut.
∞ Video Link: Block Printing - Linocuts
2. Begin your linocut by rubbing graphite from your pencil all over the back of your sketch.
3. Transfer your sketch to your Lino block as in the tutorial.
4. Slowly begin carving away the parts that you want to remain white in your prints. Work for the duration of the lesson time.
5. Clean up.

WEEK 7 45m Art History - Lesson 62

Printmaking

Materials: 4x6" linoleum block, Lino carving tools, 4x6" scrap paper to sketch out design, pencil, printing ink, brayer, wooden or plastic spoon, ink plate (recycle glass sheet from old frame), loose sheets of 4x6" paper for printing

→ PRACTICE

Continue working on your linocut. Try to finish your carving today so that you can focus on printing in the next lesson.

Re-watch or work along with the tutorial video if you need to.

∞ Video Link: Block Printing - Linocuts

WEEK 8 45m Art History - Lesson 63

Printmaking

Materials: 4x6" linoleum block, Lino carving tools, 4x6" scrap paper to sketch out design, pencil, printing ink, brayer, wooden or plastic spoon, ink plate (recycle glass sheet from old frame), loose sheets of 4x6" paper for printing

PREP: Students will be printing during this lesson. You may want to cover your work surface.

→ PRACTICE

Finish carving your Lino block and pull three or four prints. Today is the last lesson for working on this. Re-watch the video if you need to, or work along with the tutorial.

∞ Video Link: Block Printing - Linocuts

WEEK 8 45m Art History - Lesson 64

Impressionism - Expressionism

Materials: The Arts: A Visual Encyclopedia, Children's Book of Art (optional)

→ INTRO

Today's reading will give you an overview of several visual art movements that happened in rapid succession. Many of the artists within and across these movements were very close friends, spending a lot of time together

Term 3

and even living together as roommates or in artists' communes. You will also see the same scene painted by several artists, either at the same time or in response to another's work.

→ PRACTICE

Read p.134-151 in *The Arts: A Visual Encyclopedia*, p.60-73 in *Children's Book of Art*, and the article in the link.

∞ Link: Becoming modern in 19th-century Europe

WEEK 9 45m Art History - Lesson 65

Pointillism

Materials: computer, acrylic paint, brushes, water container, 12x18" paper (any color but thick enough for acrylic paint), pencil for sketching, Q-tips, new pencil with eraser for making dots,

PREP: Students will be painting. Prepare your work surface.

→ INTRO

Students will have two lessons to slow down from our mad dash through art history to create a pointillist painting based on Georges Seurat's *The Seine Seen from La Grande Jatte*. Students will follow along with the video tutorial.

→ PRACTICE

Follow along with the video tutorial. You can start and stop the video as needed while you work.

∞ Video Link: Pointillism Painting Tutorial

∞ Image Link: *The Seine Seen from La Grande Jatte*

Remember to clean up when your lesson time is over.

WEEK 9 45m Art History - Lesson 66

Pointillism

Materials: computer, acrylic paint, brushes, water container, 12x18" paper (any color but thick enough for acrylic paint), pencil for sketching, Q-tips, new pencil with eraser for making dots,

PREP: Students will be painting. Prepare your work surface.

→ INTRO

This is your last lesson on Pointillism.

→ PRACTICE

Follow along with the video tutorial. You can start and stop the video as needed while you work. Plan to finish your work by the end of this lesson.

∞ Video Link: Pointillism Painting Tutorial

∞ Image Link: *The Seine Seen from La Grande Jatte*

Remember to clean up when your lesson time is over.

WEEK 10 45m Art History - Lesson 67

Cubism - Georgia O'Keeffe

Materials: *The Arts: A Visual Encyclopedia*, *Children's Book of Art* (optional), computer

→ INTRO

It is overwhelming to take in all of the art movements that happened in the 20th century. Not only because they were ever-changing at the speed of light, but also because there were so many things happening globally that were intertwined as never before. There were two world wars, and many countries had civil wars, such as Russia, Spain, and China. These wars had great impacts on artists who processed life visually, but they also

Term 3

impacted the everyday way of life for people, which in turn impacted artists and their work. For example, the invention of the bicycle and then the automobile and subway systems impacted a movement called Futurism. The mass production of food and objects impacted art movements such as Dadaism, De Stijl, and Pop Art.

WEEK 10 45m Art History - Lesson 68

Abstract Expressionism - Contemporary Art

Materials: *The Arts: A Visual Encyclopedia*, *Children's Book of Art* (optional)

→ INTRO & PRACTICE

Read p.162-169, 182-185, and also look through the section on photography in *The Arts: A Visual Encyclopedia* and p.92-109 in *Children's Book of Art*, and look through the Sculpture section. Linger over the art, but be sure to get through the assignment. What are your thoughts on the state of the visual arts today? Do you have a clearer understanding of how we have gotten to where we are?

WEEK 11 45m Art History - Lesson 69

Your Art

Materials: *The Arts: A Visual Encyclopedia*, *Children's Book of Art* (optional), various media based on your choice

PREP: Students will need to communicate what media they will choose to do their final project in.

→ INTRO & PRACTICE

You have seen many works of art in all that you have studied this term. How have they impacted you? Has the art that you have studied changed your thoughts toward or about something? During this lesson and the next, choose your favorite work from this term to replicate or to work in the same style as. Maybe you were really moved by Futurism, and you want to create your own art based on that movement, or maybe you really loved Dali's *The Persistence of Memory*. Use the media that you have already worked with but still have leftover, in order to be a good steward of your supplies.

WEEK 11 45m Art History - Lesson 70

Your Art

Materials: *The Arts: A Visual Encyclopedia*, *Children's Book of Art* (optional), various media based on your choice

→ INTRO & PRACTICE

Continue to work on your chosen project. Remember to use the media that you have already worked with but still have left over in order to be a good steward of your supplies. Plan to finish your project by the end of the lesson. As always, remember to clean up at the end of the lesson.

WEEK 12 45m Art History - Lesson 71

Exam Week

→ EXAMS

Answer question(s) related to the course.

Term 3

Questions will come from:
Art History

WEEK 12  **45m Art History - Lesson 72**
Exam Week

→ **EXAMS**
Answer question(s) related to the course.

Questions will come from:
Art History

Art History

Examination

- Term 1**
- Describe the physical position of the body of a person in the Ancient Egyptian tradition and explain why.
 - Write about the ancient art period that was most interesting to you and why you were impacted by it. What did you learn by completing the art project?
- Term 2**
- Tell all that you remember about stained glass and why it was important when it was first created.
 - What new mathematical drawing technique was created during the Renaissance, and what was its purpose in paintings?
 - What new type of paint was made during the Gothic period, and how was it made?
- Term 3**
- Put these Art Movements in order from earliest (1700s) to latest (20th century):
Dadaism, Realism, Cubism, Impressionism, Surrealism, Pre-Raphaelism, Neoclassicism, Futurism, Fauvism, Romanticism, Expressionism, Dutch Golden Age, Contemporary, Baroque, Pointillism, Rococo, Mannerism.
 - Tell all that you can remember about the art movement of your choice and why it was important in history. What movements influenced it, and what did it influence? Who were some major artists in that movement?
