Grammar Concept: Subject pronouns

French subject pronouns replace nouns to indicate who or what is performing an action, similar to English ("I," "you," "he/she"). However, unlike English pronouns, they account for gender and levels of formality as well. "He/she" in English also are used to replace all nouns, not just people like in English. (This is just an introduction, there is more to learn about French pronouns.)

### Grammar Concept: Adjectives & Agreements

In French, adjectives must agree with the nouns to which they refer. We look at the endings of the adjective to determine whether it is masculine or feminine, singular or plural. Adjectives that are masculine singular stay as they are. Adjectives that are feminine singular have an -e added to them unless there is already an e. Masculine and feminine adjectives when plural had an -s added to them.
