Sloyd: Level 3

☐ View the "Sloyd Introduction Video" for an overview of materials and resources used in Sloyd (see Quick Links)

☐ Purchase supplies and organize them so they are easily accessible.

☐ Keep the page of images for each of the second-year models for reference while working on models (see Appendix).

☐ Allow time for loading and viewing videos. We recommend teachers preview tutorials and work a model before teaching it.

- ☐ Before each lesson, gather needed materials as listed at the beginning of each day's lesson plan.
- ☐ Introduce students to their Sloyd tools (discuss their care and safe use). Refresh students on how to use a ruler (note where "0" starts) and how to use the edge to draw a straight line.

Sloyd: Level 3

How To Teach

Overview

Lessons will go much more smoothly if you prepare thoroughly. As students gain experience, develop fine motor skills, and practice habits of precision they will need less support.

Prepare

Watch video tutorials or make the model yourself. Gather supplies and materials needed.

Recap

Connect back to previous lesson and skills learned.

Read

Read the instructions one step at a time. Model each step and make sure students complete it with precision before moving to the next step.

Practice

When a project is complete, students may repeat it as many times as they wish to give as gifts or create original patterns similar to the project.
