

Natural History

About the Course

Students learn to observe a variety of creatures through their Nature Reader, including insects, insect larvae, mammals, and some aquatic species. Coordinating afternoon activities are provided in Outdoor Work.

This topic is included in the following course(s): Science: Grade 2

About Science: Grade 2

In level 2, learners are developing familiarity and friendship with Creation through a broader scope of Things, more challenging text, and slightly more abstract concepts.

Science: Grade 2

The Big Picture:

To accomplish the goal of supporting a relationship with the Things of the Universe, a Mason science program consists of nature lore, natural history, and general science. Nature immersion, inquiry, community connection, and supportive literature are woven into each of these three parts. Form 1 learners in grades 1-3 are at the beginning of this relationship: developing familiarity and friendship with Creation. Their sense of community is primarily focused on their immediate environment at this stage, but they are curious about others. The familiarity with foundational knowledge grown and nurtured in Form 1 prepares them for greater curiosity and personal interest in Form 2.

Nature lore is timeless knowledge that is passed through a community, much like a grandmother passes on how to make that special bread when the dough just 'feels right.' Like Mason, we strive to pass on this knowledge primarily through outdoor work. Group nature walks, seasonal readings, and topics in scouting are provided as an Outdoor Work resource in the Quick Links. If desired, literature suggestions to support lore can be found in the Community Read Alouds resource (in Literature Grades 1-3).

Placement & Combining Tips

About Science: Grade 2

In level 2, learners are developing familiarity and friendship with Creation through a broader scope of Things, more challenging text, and slightly more abstract concepts.

Scheduling

GRADE	SCHEDULE INFO.	BOOKS
2	Natural History: Grade 2 1 time/week 10 min	Walks with a Naturalist: Living Nature Reader Volume 2

General Science: Grade 2 Nature Notebook: Grade 2		Natural History: Grade 2 Nature Walks & Scouting: Grades 1-8		

Planning & Prep

Permission to print for non-commercial use. See Alveary group use policy to use lessons in a group context.

LINKS: Click text or scan the QR code in the top corner of the lesson plan pages to view online resources associated with the lessons.

Responsibility for previewing all links rests with the teacher. All links were checked at the time of publication; however, websites change frequently and may contain objectionable content. Please report broken links by contacting us through our website.

Science: Grade 2

- ☐ Obtain any supplies indicated on the science or grade-level supply lists.
- ☐ Download any apps and shortcut any desired links.

Nature Lore:

- ☐ Bookmark your Outdoor Work Quick Link, so that you have it available on your weekly outing. Outdoor Work is generally flexible for your location and season and can be moved around in the schedule to incorporate or substitute Natural History Club outings.
- ☐ Print or bookmark grade-specific nature notebook suggestions to support natural history and general science. Notebooking can be done on a walk, during occupations, or as a field trip, as appropriate.

Special Topics & Field Trips

Science: Grade 2

- ☐ Learn a few of your local species on these special topics using the internet, field guides, or your local nature preserve, conservancy, or state/national park.
- ☐ Note whether there are particular locations nearby for the student to easily notice the special topics on walks or during afternoon occupations.

Natural History: Grade 2

- Term 1: insects, especially larvae, and trees
- Term 2: animal sign, twigs, marine creatures
- Term 3: insects, birds, spring ephemerals

Term Prep & Teacher Tips

Science: Grade 2

Object lesson prompts are woven into the lessons, as appropriate, but teachers are encouraged to read corresponding Handbook of Nature Study (HoNS) selections each term:

Natural History: Grade 2

- ☐ Term 1: insects p.294-300, trees p.618-623
- ☐ Term 2: tree winter work p.624, choose 1-2 mammals from p.214-293
- ☐ Term 3: wildflower intro and 1-2 spring ephemerals from p.460-487, aquatic insects and dragonflies p.400-408

Natural History: Grade 2

How To Teach

Introduce

- Begin each lesson with learners' existing knowledge. If the book or activity is new or unfamiliar, then look at the title, a picture, or guidance in the lesson plan to help discuss what students think, drawing on previous experience. If continuing or revisiting a topic or activity, then recap. The lesson plans often help with this.
- Some learners may benefit from using pictures or looking back briefly.
- Allow them time to share any concerns and come alongside, as needed.

Complete

- Read, or do, as instructed in the lessons, noting any Teacher Tips provided. Learners should always have their nature journal or some other notebook/paper available in case they need to draw or diagram during the lesson.
- When reading to pre-readers, point to the words as you read, even if it seems like they aren't paying attention.
- If learners do not understand a word or concept, do not worry. Try to show them with a picture or connect the idea to something they have seen in real life. They are learning much by the way and will likely build understanding over the term, the year, or beyond.

Narrate

- Process the ideas of the lesson by retelling the events in sequence, describing a scene or setting, explaining a concept, etc.
- Learners may use words, pictures, Legos, dolls, etc., to process and convey ideas in the manner most natural to them.
- Teachers may take turns to model.

Discuss

- Consider together any thoughts, confusion, or concerns about the passage.
- Questions/topics for further discussion are often provided in the lesson plans to help. There are no right or wrong answers to these. If teachers want to keep ideas active in the mind, these can also be used at other times to keep the ideas in the working memory.

Connect

- Follow any extra links, examine any sidebars in the text, look at pictures, etc., depending on learner interest.
- These can also be viewed as alternative ways to engage.

Term 1

WEEK 1 10m Natural History: Grade 2 - Lesson 1

Night Visitors

Materials: Walks with a Naturalist 2

PREP: Read Teacher Tip

→ INTRO

What do you recall about insects? Briefly share in word or picture. Our naturalist friend, Melissa, is going to introduce us to some of the creatures she sees after dark. Look at the picture on p.1. Have you ever seen such a brightly painted moth? Who else do you think we might meet after dark?

→ READ, NARRATE, & DISCUSS

p.1-5 "One summer night" - "after dark?"

Read the definitions and notes at the end of each reading, as desired.

- What have you seen or heard when you've been outside after dark? Tell what you have noticed.

→ SUPPLEMENTAL

∞ Video Link: 7 Spectacular Moths in Slow Motion (5:23)

∞ Video Link: Why moths are obsessed with lamps (2:06)

★ TEACHER TIP

Supplemental links for optional support are provided at the END of the lesson. They can be used at any point to help generate interest during the introduction, to enliven the lesson itself, or to add to discussion later. They are NOT required and should NOT take away from the narration and discussion. Experiment and see what works best for your student(s).

★ TEACHER NOTE

The second video is from an evolutionary perspective. Teachers might choose to allow it to pass by the way, provide additional commentary, or skip this one.

• OUTDOOR WORK

Weekly walks and daily outdoor time are vital! Resources in Quick Links.

WEEK 2 10m Natural History: Grade 2 - Lesson 2

Caterpillar Hunting

Materials: Walks with a Naturalist 2

PREP: Read Teacher Tip

→ INTRO

Tell me about some of the creatures we met last week. All of those creatures were adults, the grown-up animals. Today we're going to look for some baby insects, called caterpillars. Have you ever found a caterpillar? Briefly tell what you noticed.

→ READ, NARRATE, & DISCUSS

p.7-9 "One afternoon" - "a caterpillar?"

- The caterpillars that Melissa found hatched from eggs and would someday turn into adult moths. Draw each of these stages on separate index cards or pieces of paper. Can you put them in order? Which comes first, middle, or last in the life of the insect? (egg -> caterpillar/larva -> adult/moth) Keep these in your book for next week!

→ SUPPLEMENTAL

∞ Video Link: Luna Moth (1:39)

∞ Video Link: Ceanothus Silk Moth (0:38), a West Coast moth sometimes confused for a luna

★ TEACHER TIP

If students need support drawing or diagramming, the teacher may do any activities with them in tandem or act as their scribe.

• OUTDOOR WORK

Weekly walks and daily outdoor time are vital! Resources in Quick Links.

WEEK 3 10m Natural History: Grade 2 - Lesson 3

My Pet Spike

Materials: Walks with a Naturalist 2

PREP: Read Teacher Tip

→ INTRO

★ TEACHER TIP

Notice that any prompt to recall or think about can be done verbally, in picture, or in any other way that suits the student(s). Apply this flexibility to all lessons.

• OUTDOOR WORK

Weekly walks and daily outdoor

Natural History: Grade 2

[Click THIS text or scan the QR code for links.](#)

Term 1

Tell me what you recall from our last reading. The caterpillar begins life as an egg and turns into a moth or butterfly. Today we're going to read about another caterpillar - up close!

→ **READ, NARRATE, & DISCUSS**
p.11-16 "One summer" - "life cycle!"

- Last week we ordered egg -> caterpillar -> moth. Did you notice the step we missed in this week's reading? Draw the pupa and add it to your collection. Where does it go? (egg -> caterpillar/larva -> pupa -> adult/moth)

→ **SUPPLEMENTAL**
∞ Video Link: Watch this caterpillar turn into a moth! (3:36)

time are vital! Resources in Quick Links.
