

Natural History

About the Course

Students learn methodically about the variety of creatures around them, including insects, birds, and reptiles. Coordinating afternoon activities are provided in Outdoor Work.

This topic is included in the following course(s): Science: Grade 3

About Science: Grade 3

In level 3, learners are developing familiarity and friendship with Creation through a broader scope of Things, more challenging text, and more abstract concepts.

Science: Grade 3

The Big Picture:

To accomplish the goal of supporting a relationship with the Things of the Universe, a Mason science program consists of nature lore, natural history, and general science. Nature immersion, inquiry, community connection, and supportive literature are woven into each of these three parts. Form 1 learners in grades 1-3 are at the beginning of this relationship: developing familiarity and friendship with Creation. Their sense of community is primarily focused on their immediate environment at this stage, but they are curious about others. The familiarity with foundational knowledge grown and nurtured in Form 1 prepares them for greater curiosity and personal interest in Form 2.

Nature lore is timeless knowledge that is passed through a community, much like a grandmother passes on how to make that special bread when the dough just "feels right." Like Mason, we strive to pass on this knowledge primarily through outdoor work. Group nature walks, seasonal readings, and topics in scouting are provided as an Outdoor Work resource in the Quick Links. If desired, literature suggestions to support lore can be found in the Community Read Alouds resource (in Literature Grades 1-3).

Placement & Combining Tips

About Science: Grade 3

In level 3, learners are developing familiarity and friendship with Creation through a broader scope of Things, more challenging text, and more abstract concepts.

Scheduling

GRADE	SCHEDULE INFO.	BOOKS

Planning & Prep

Permission to print for non-commercial use. See Alveary group use policy to use lessons in a group context.

LINKS: Click text or scan the QR code in the top corner of the lesson plan pages to view online resources associated with the lessons.

Responsibility for previewing all links rests with the teacher. All links were checked at the time of publication; however, websites change frequently and may contain objectionable content. Please report broken links by contacting us through our website.

Science: Grade 3

- ☐ Obtain any supplies indicated on the science or grade-level supply lists.
- ☐ Download any apps and shortcut any desired links.

Nature Lore:

- ☐ Bookmark your Outdoor Work Quick Link, so that you have it available on your weekly outing. Outdoor Work is generally flexible for your location and season and can be moved around in the schedule to incorporate or substitute Natural History Club outings.
- ☐ Print or bookmark grade-specific nature notebook suggestions to support natural history and general science. Notebooking can be done on a walk, during occupations, or as a field trip, as appropriate.

Special Topics & Field Trips

Science: Grade 3

- ☐ Learn a few of your local species on these special topics using the internet, field guides, or your local nature preserve, conservancy, or state/national park.
- ☐ Note whether there are particular locations nearby for the student to easily notice the special topics on walks or during afternoon occupations.

Natural History: Grade 3

- ☐ Term 1: insects and birds
- ☐ Term 2: birds and trees
- ☐ Term 3: turtles, fish, birds, tree buds, includes special excursions to a pond and a natural history museum

Term Prep & Teacher Tips

Science: Grade 3

Object lesson prompts are woven into the lessons, as appropriate, but teachers are encouraged to read corresponding Handbook of Nature Study (HoNS) selections each term:

Natural History: Grade 3

- ☐ Term 1: moths p.310-328
- ☐ Term 2: crows p.124-127
- ☐ Term 3: turtles p.204-210

Natural History: Grade 3

How To Teach

Introduce

- Begin each lesson with learners' existing knowledge. If the book or activity is new or unfamiliar, then look at the title, a picture, or guidance in the lesson plan to help discuss what students think, drawing on previous experience. If continuing or revisiting a topic or activity, then recap. The lesson plans often help with this.
- Some learners may benefit from using pictures or looking back briefly.
- Allow them time to share any concerns and come alongside, as needed.

Complete

- Read, or do, as instructed in the lessons, noting any Teacher Tips provided. Learners should always have their nature journal or some other notebook/paper available in case they need to draw or diagram during the lesson.
- When reading to pre-readers, point to the words as you read, even if it seems like they aren't paying attention.
- If learners do not understand a word or concept, do not worry. Try to show them with a picture or connect the idea to something they have seen in real life. They are learning much by the way and will likely build understanding over the term, the year, or beyond.

Narrate

- Process the ideas of the lesson by retelling the events in sequence, describing a scene or setting, explaining a concept, etc.
- Learners may use words, pictures, Legos, dolls, etc., to process and convey ideas in the manner most natural to them.
- Teachers may take turns to model.

Discuss

- Consider together any thoughts, confusion, or concerns about the passage.
- Questions/topics for further discussion are often provided in the lesson plans to help. There are no right or wrong answers to these. If teachers want to keep ideas active in the mind, these can also be used at other times to keep the ideas in the working memory.

Connect

- Follow any extra links, examine any sidebars in the text, look at pictures, etc., depending on learner interest.
- These can also be viewed as alternative ways to engage.

Term 1

WEEK 1 10m Natural History: Grade 3 - Lesson 1

The Bumblebee

Materials: Christian Liberty Nature Reader 4

PREP: Read Teacher Tip

→ INTRO

Look at the picture on p.87. What do you notice, or what do you already know about the bumblebee? In our reading today, the author states that bumblebees are the only bee native to North America, but that's not quite true. They are the only social bee, but there are some 3600 other native North American bees! Let's read and try to learn something new about this one today.

→ READ, NARRATE, & DISCUSS

p.86-90 "Sometimes" - "worker or queen."

- You may have read about or noticed before that some creatures depend on each other, like a butterfly and their host plants. Based on what you read, what other plants or animals could you say the bumblebee depends on? What plants or animals depend on the bumblebee?

→ SUPPLEMENTAL

∞ Video Link: Bumblebee in Slow Motion (1:40)

★ TEACHER NOTE

This author states that bumblebees are the only native bee in North America, but this is false. Teachers can strike the third sentence (if reading aloud) or advise students as noted in the introduction.

★ TEACHER TIP

Supplemental links for optional support are provided at the END of the lesson. They can be used at any point to help generate interest during the introduction, to enliven the lesson itself, or to add to discussion later. They are NOT required and should NOT take away from the narration and discussion. Experiment and see what works best for your student(s).

• OUTDOOR WORK

Weekly walks and daily outdoor time are vital! Resources in Quick Links.

WEEK 2 10m Natural History: Grade 3 - Lesson 2

The Ladybug

Materials: Christian Liberty Nature Reader 4

→ INTRO

Recall what we read about the bumblebee. Look at the picture on p.91. What do you notice? What insect family do you think the ladybug belongs to?

→ READ, NARRATE, & DISCUSS

p.91-94 "Although there" - "outdoors again."

- Who in this chapter would you say is dependent on whom?

→ SUPPLEMENTAL

∞ Video Link: Ladybugs in Slow Motion (2:11)

• OUTDOOR WORK

Weekly walks and daily outdoor time are vital! Resources in Quick Links.

WEEK 3 10m Natural History: Grade 3 - Lesson 3

Aphids

Materials: Christian Liberty Nature Reader 4

PREP: Read Teacher Tip

→ INTRO

Tell me about the ladybug and why everyone likes them so much. Today we read about those aphids.

→ READ, NARRATE, & DISCUSS

p.95-98 "Aphids are" - "by eating aphids."

- The author describes the problem of aphids harming plants, but everything has a purpose in Creation. Can you think of some reason to

★ TEACHER TIP

It can sometimes be unnerving for students to not get an immediate answer to a question, so encourage them to sit with big questions, like the one in today's suggested discussion, while they continue to make observations.

• OUTDOOR WORK
