

Art

High School Fast Track

About the Course

These High School Fast Track for Art lessons are designed for students with minimal background in Art and/or just beginning Alveary during the high school years. Students will complete all previous eight levels of art lessons in a fast-paced sequence. Students will need a variety of art materials on hand to successfully complete this course.

Placement & Combining Tips

Students can slow down the pace of lessons to their own pace and spread the course over multiple years if desired. Because of this flexibility, younger students interested in art could also choose to take this course instead of the Fast Track for lower grades.

Scheduling

GRADE	SCHEDULE INFO.	BOOKS
9-12	Art: High School Fast Track 2 times/week 45 min	Drawing, Design, and Craft-Work Color: A Course in Mastering the Art of Mixing Colors Brush Drawing as Applied to Natural Forms and Common Objects Brushwork: Elementary Brush-Forms

Planning & Prep

Permission to print for non-commercial use. See Alveary group use policy to use lessons in a group context.

LINKS: Click text or scan the QR code in the top corner of the lesson plan pages to view online resources associated with the lessons.

Responsibility for previewing all links rests with the teacher. All links were checked at the time of publication; however, websites change frequently and may contain objectionable content. Please report broken links by contacting us through our website.

Art: High School Fast Track

Students will need to gather a live flower in Term 2 and still life objects in term 3. This may require a trip to a florist or the floral department of your local grocer. The still life objects can and should be simple objects like a cup and saucer, tissue box, roll of toilet paper (offers a great grey scale to look at and work from), a bowl of fruit, etc.

Art: High School Fast Track

How To Approach

Prepare

Make sure your art supplies are organized and easily accessible. Look ahead to the upcoming lessons and gather supplies needed.

Recap

Connect back to the activities and ideas from last lesson.

Introduce

Teach students the new skill (model it yourself and use the book or video resource in the lesson). Look at examples.

Practice

Give students time to practice the new skill. Keep the "Guiding Questions" document (see Appendix) for reference when practicing observational skills.

Discuss

Have students discuss, observe, and self-evaluate their work.

Art: High School Fast Track

[Click THIS text or scan the QR code for links.](#)

Term 1

WEEK 1 45m Art: High School Fast Track - Lesson 1

Understanding & Preparing Supplies

Materials: watercolors, paper towels, water cup, round #6, 8, 10, or 12 paint brush (using the largest brush you have is the best), spray bottle, watercolor palette, Quinacridone Pink, Prussian Blue, and Hansa Yellow, water, cloth, Art book, waterproof pen

PREP: Students will watch the teacher tutorials to be self-sufficient throughout this course.

→ INTRO

- Students will begin by watching tutorials on preparing their palettes by labeling, proper brush care, and cleaning "dirty" paint from their palettes.
- Read the names of the watercolors on the tubes (Quinacridone pink, Prussian blue, & Hansa yellow). These three colors are primary colors. Prepare the watercolor palette with the three primary colors. Watch the tutorial on how to do this.
- ∞ Video Tutorial: Preparing and Cleaning Your Palette
- Be sure to clean your brush thoroughly between colors. It is important to keep your paints clean!
- ∞ Video Tutorial: Brush Care
- Watch the tutorial on how to label your palette.
- ∞ Video Tutorial: Label Your Palette

→ PRACTICE

- Label your palette with a waterproof pen such as an Extra-Fine Sharpie.
- Mix secondary colors in clean wells between the primary colors that create them. Orange goes between red and yellow. Purple between blue and red. And green between yellow and blue. You will be using these colors throughout the year, so try to mix a significant amount. We will begin painting primary and secondary colors in the next lesson.

→ DISCUSS

What was noticed or discovered?

→ NOTE

Students should clean up at the end of each lesson. Clean, dry, and store the brush. Leave the palette open to dry.

★ Student TIP

Use the skills and techniques learned in art lessons anytime you paint or do nature study. This will help you develop good habits and the ability to draw and paint whatever you'd like.

TERMINOLOGY

Medium refers to the art tools used, such as graphite, pastel, watercolor, etc. Media is the plural of medium.

Pastels are called "crayons" in Drawing, Design, and Craft-Work by Glass. Our modern crayons are not equivalent, as they have wax as a binder. Pastels are considered a painting medium and can be referred to as either painting or drawing, just as watercolors can be called painting or brush drawing.

Art books refer to mixed media books that accept dry and wet media without wrinkling or bleeding.

Term 1

WEEK 1 45m Art: High School Fast Track - Lesson 2

Color Theory- Primary & Secondary Colors

Materials: spray bottle, watercolor palette, brushes, water, cloth, Art book, printed color wheel

PREP: Print the color wheel on white cardstock. You will refer back to this color wheel throughout the term. It is a good idea to glue or tape it to the inside of your Art book.

∞ Link: Basic Color Wheel

→ RECAP

- Recall the names of the watercolors. (Quinacridone pink, Prussian blue & Hansa yellow)
- Recall what those three colors are. (Primary colors)
- Recall what mixing two primaries together makes. (Secondary colors).
- Recall how to mix each of the secondaries.
- Recall how to clean "dirty" paints.
- Recall what to do between colors. (CLEAN YOUR BRUSH!!) It is important to keep your paints clean!!

→ INTRO

After watching tutorial videos, you will fill in your color wheel with primary and secondary colors.

→ VIEW, NARRATE, & DISCUSS

- ∞ Video Tutorial: Watercolor Color Wheel Primary L1 L53
- ∞ Video Tutorial: Watercolor Color Wheel Secondary L1 L54

→ PRACTICE

- Students will paint each primary color in the appropriate place on their color wheel. The placement of each color is exact. If the student accidentally places a color in the wrong section, throw away that color wheel and print a new one to begin again.
- Next, students will paint each secondary color in the appropriate place on their color wheel. The placement of each color is exact. If the student accidentally places a color in the wrong section, throw away that color wheel and print a new one to begin again.
- Set it aside to dry.
- Students will refer back to this color wheel, so it is a good idea to keep it in a handy place. Perhaps, cut it out and paste it into the cover of the students' Art book.

Term 1

WEEK 2 45m Art: High School Fast Track - Lesson 3

Color Theory with Pastels

Materials: color wheel, red, blue & yellow pastel (try to get close to the primaries you have in watercolor), paper towels, hair spray, or other pastel fixative

PREP: Print the color wheel on white cardstock. You will refer to this color wheel for the term. Glue or tape it to the inside of your Art book. One idea is to have your watercolor color wheel in the front of your book and your pastel color wheel in the back of your Art book.

∞ Link: Basic Color Wheel

→ NOTE

It is important to understand that color theory is basically the same throughout all media. You will learn to mix your colors in pastels just as you will learn to mix them in watercolors. You will have this knowledge to apply for the entirety of your life, whether painting houses, cars, nails, plastic models, or being an artist.

→ RECAP

- Recall the names of the primary colors.
- Recall what mixing two primaries together makes. (Secondary colors).
- Recall how to mix each of the secondaries.

→ INTRO

You will learn to clean dirty pastels just as you must clean dirty watercolors. It is important to clean your fingers as you work with pastels, just as you must clean your paintbrush in order to keep from accidentally mixing colors. You will need to choose three primaries from your pastels. Try to find colors that are the reddest red, bluest blue, and most true yellow, but don't spend too much time stressing over it, as you will learn that different primaries equal different rainbows.

→ PRACTICE

- Watch the tutorial on creating a pastel color wheel and then fill in your color wheel in the same way.
- ∞ Video Tutorial: Color Theory with Pastels L2 L1 & L3 L25
- Watch the tutorial on making different rainbows with different primaries.
- ∞ Video Tutorial: Different Primaries = Different Rainbows L7 L1

WEEK 2 45m Art: High School Fast Track - Lesson 4

Color Theory- Adding Tertiary Colors

Materials: spray bottle, watercolor palette, brushes, water, cloth, Art book, printed color wheel

PREP: Print out your expanded color wheel to fill in. Spray your watercolor palette before beginning so that your paints have time to

Term 1

loosen up before you need them.

∞ Link: Color Wheel

→ NOTE

This color wheel has 12 places for adding colors. Use the color wheel example to help you place your colors in their proper triangles. Your color wheel will be wrong if you get off one color.

∞ Image Link: Example of Expanded Color Wheel

→ RECAP

- Recall the names of the watercolors. (Quinacridone pink, Prussian blue & Hansa yellow)
- Recall what those three colors are. (Primary colors)
- Recall what mixing two primaries together makes. (Secondary colors).
- Recall how to mix each of the secondaries.
- Recall how to clean "dirty" paints.
- Recall what to do between colors. (CLEAN YOUR BRUSH!!) It is important to keep your paints clean!!

→ INTRO

In this lesson, we are going to create an expanded color wheel. When you mix a primary color with a secondary color, you get a tertiary (ter*she*air*ee) color. These are red-purple, red-orange, yellow-orange, yellow-green, blue-green, and blue-purple. Notice that you always list the primary color and then the secondary color.

→ PRACTICE

Follow along with the tutorial video. You will mix the six new colors in your palette and paint all of your colors in the proper space on your color wheel.

∞ Video Tutorial: Create an Expanded Color Wheel L4 L49, L5 L1, & L6 L25

WEEK 3 45m Art: High School Fast Track - Lesson 5

Color Theory: Complementary Colors

Materials: glue stick, Art book, scissors, 1/8th of a sheet of construction paper in red, orange, yellow, green, blue, and purple, Color by Betty Edwards (optional)

PREP: In order to get one eighth of a sheet of paper, cut a normal size (either 8 1/2 x 11" or 9 x 12") in half, cut a half in half- that gives you a quarter, and then cut the quarter in half, and you have 1/8th of the paper.

→ INTRO

We will work with complementary colors of construction paper for this lesson. Take time to think through and linger over what you are seeing when you do the work until you get to a place of understanding. In the

Term 1

tutorial, the mention is made of someone giving a compliment to another, and how that is like the colors complementing each other. Notice the spelling of each word. Compliment is what one person may give to another, while complements are what colors are to each other. The word, complement, actually means "to make complete." The analogy is made in order to help you remember that complementary colors look good together. Complements go well together because they complete the trio of primary colors. For example, blue and orange, which is red+yellow or purple, which is blue+red, and yellow, etc. However, if you mix these colors together in equal proportions, as we will see in the next lesson, you will end up with brown. If you have the book Color by Betty Edwards, read about complementary colors on p.25-26.

→ PRACTICE

Follow along with the video as you work in your Art book.
∞ Video Tutorial: Complementary Colors L2 L6
Don't forget to clean up.

WEEK 3 45m Art: High School Fast Track - Lesson 6

Color Theory- Mixing Browns

 Materials: Art book, pencil, watercolors, brush, water, cloth, spray bottle

PREP: Spray your watercolors at the beginning, before you start, so they have time to soften.

→ INTRO

We will continue to work with complementary colors. You will be practicing mixing your complements in equal proportions to get 12 different browns. You will watch the tutorial video, but recognize that the primaries you are working with are different from the primaries in the tutorial. However, the concepts are exactly the same. Your yellow is yellow whether it is Hansa yellow or quinacridone gold, etc.

→ PRACTICE

1. Watch the tutorial all the way through before beginning your work.
∞ Video Tutorial: Mixing Browns L7 L5
2. Set up 6 swatches on one page in your Art book.
3. Mix red + green in equal proportions and paint the resulting brown in the first square. Label the square with the colors you used.
4. Mix red-orange with blue-green in equal proportions and paint the resulting brown in the next box. Label the box with the colors you used.
5. Mix orange and blue in equal proportions and paint the resulting brown in the next box. Label the box.
6. Continue in this way until you have mixed brown from each of the 6 sets of complements in your expanded color wheel. Label everything

Term 1

so that when you need to mix a color while creating a work of art, you will have a color chart to refer to and know how to get that color again.
7. Don't forget to clean up.

WEEK 4 45m Art: High School Fast Track - Lesson 7

Color Theory- Mixing Browns

Materials: Art book, pencil, pastels, paper towels

→ INTRO

It is important to practice the same color theory skills in multiple media. For this lesson, you will go through the same exercise of mixing browns. You will likely have two or maybe three browns in your pastel box, but you are not limited to only using those browns when pastel painting. You have so many browns at your fingertips if you know how to properly use your pastels.

→ PRACTICE

First, you will need to pick out your 12 colors in your color wheel from your pastels. You will need a red, red-orange, orange, yellow-orange, yellow, yellow-green, green, blue-green, blue, blue-purple, purple, and red-purple. If you do not have one of the colors, then you will need to mix it from other primaries and secondaries when you need it. For example, if you do not have a red-purple color to mix with your yellow-green, then mix red and purple together first, and then mix yellow-green with it. Draw six swatches on a new page in your Art book. Remember to label your page as "Mixing Browns with Pastels." In the first box, mix your red pastel with your green pastel and label the box. Next, mix red-orange with blue-green and label the box. Continue mixing the complements in equal proportions to get different browns. When you have mixed all of your browns using your pastels, look back at your watercolor browns and compare the same browns. Notice the subtle differences and the similarities. Don't forget to clean up.

WEEK 4 45m Art: High School Fast Track - Lesson 8

Color Theory- Complementary Colors

Materials: watercolors, Art book, water, cloth, pencil, brushes

PREP: Spray your watercolors before getting started.

→ INTRO

You will begin a project using complementary colors that will take two lessons to complete. The first lesson you will complete in watercolor, and the next lesson you will do the same painting but in pastels. (So you are doing the same painting twice. Your subject matter can be anything that you can think of, as long as the foreground and background or positive and negative space are complementary colors. For example, a field of strawberries- the strawberries are red, and the grass/leaves around it are green. Or blue flowers in a blue vase with an orange background. Or a yellow-green bike set against a red-purple sunset.

Art: High School Fast Track

[Click THIS text or scan the QR code for links.](#)

Term 1

Whatever you can think of will work. Look at the images to get some ideas.

∞ Image Link: Complementary Color Schemes

→ PRACTICE

To begin this project, sketch out your drawing. When you have it sketched the way you want it, you will fill it in with watercolors for the first lesson. You will use complementary colors to paint it. Once you have your painting complete, leave it to dry for the next lesson. Watch the video for clarity and an example. Don't forget to clean up.

∞ Video Link: Complementary Colors

WEEK 5 45m Art: High School Fast Track - Lesson 9

Color Theory- Complementary Colors

📋 Materials: pastels, paper towels, painting from the last lesson

→ INTRO

Remember that we are using complementary colors. The colors that are across from each other on the color wheel.

→ PRACTICE

Now you will paint the same painting with complementary colored pastels. (Pastels are a form of dry painting.) Re-sketch your drawing in the same way you did the first time and add color with pastels. Watch the video for clarity and an example.

∞ Image Link: Complementary Color Schemes

∞ Video Link: Complementary Colors

WEEK 5 45m Art: High School Fast Track - Lesson 10

Color Theory- Complementary Colors

📋 Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You have seen what happens when you add complementary colors together in equal proportions- you get different browns. In this lesson, we will see that adding just a touch of a complement to a color will darken the color, and adding more will dull it down. This is helpful as you begin to shade objects in watercolor and other painting mediums. You may think that to darken a color, you just add a little black. While this does work, black has a stark effect as opposed to a subtle effect. Complements will have a more subtle effect and allow you to keep more of the color shining through. We will do this lesson for two lesson times.

→ PRACTICE

1. You will want to watch the tutorial to see how to set up your Art

Term 1

book page. You will divide your page into 12 value scales, with each color having five values. Do this freehand. If your lines are a little wobbly or your spaces slightly uneven, that is okay. In the tutorial, you will see that the primaries are a different set than what you are working with. The concepts are still the same.

2. You will begin each value scale with the full-powered color in the first box. Add a tiny touch of the complement to that color and paint it in the second box of the same value scale. Keep adding a touch of the complement until you have filled each box in a value scale. You will do a total of 12 value scales. If you mix brown, then you are mixing too much of the complement. Start again.

3. Mix your colors in your palette away from the original color. For example, don't mix green into your actual red. Instead, pull red into a clean spot in your well and mix it there, just like we have done when mixing in other work.

4. Watch the tutorial as many times as you need to until you understand how to accomplish the task.

5. Make sure to label your value scales and your page.

6. Clean up when you have finished.

∞ Video Tutorial: Color Intensity Scales with Complementary Colors L7 L10

WEEK 6 45m Art: High School Fast Track - Lesson 11

Color Theory- Complementary Colors

📋 Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ PRACTICE

1. Finish your color intensity scales. Make sure you do a value scale for all 12 of your colors.

2. Watch the tutorial as many times as you need to until you understand how to accomplish the task.

3. Make sure to label your value scales and your page.

4. Clean up when you have finished.

∞ Video Tutorial: Color Intensity Scales with Complementary Colors L7 L10

What did you notice about the colors? How can you use this when painting with watercolor or pastel?

Term 1

WEEK 6 45m Art: High School Fast Track - Lesson 12

Color Theory- Split Complements and Analogous Colors

Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You have learned about mixing complements in equal proportions to get browns and how to mix a touch of a complement in order to darken or dull down a color. For this lesson, we will learn about split-complements and analogous colors.

→ PRACTICE

Watch the tutorial on split-complements.

∞ Video Tutorial: Split-Complements L8 L11

On a new page in your Art book, set up all 12 split complement sets.

They should look like what you see in the tutorial- one color with an arrow pointing to the side and up with a split, and one pointing to the side but down with the other split complement. When you have finished creating your split complement sets, watch the video on analogous colors.

∞ Video Tutorial: Analogous Colors L8 L14

Clean up.

WEEK 7 45m Art: High School Fast Track - Lesson 13

Color Theory- Split-Complements

Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

Complete this project to apply your knowledge of split-complements.

Look through the examples linked.

∞ Image Link: Split-Complements

→ PRACTICE

1. Watch the tutorial video.

∞ Video Link: Split-Complementary Project

2. Now divide a page in your Art book into three vertical rectangles.

3. Draw the same image in each of those boxes.

4. Label each box with the split-complement set that you have chosen.

5. Paint the image in the box with only those three colors.

6. Clean up.

Term 1

WEEK 7 45m Art: High School Fast Track - Lesson 14

Color Theory- Color Value

Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle, hair dryer (optional)

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You will learn two layering techniques to use with watercolor in this lesson. The first has you adding pigment to water, and the second has you layering equal consistencies on top of each other.

→ PRACTICE

1. Watch the tutorial.
∞ Video Tutorial: Watercolor Value Changes L3 L30 & L4 L54
2. Practice creating value scales with three different colors using this method.
3. Watch the second tutorial.
∞ Video Tutorial: Applying Value By Layering L5 L55
4. Create three different value scales on the same page in your Art book using the layering method.
5. Clean up.

WEEK 8 45m Art: High School Fast Track - Lesson 15

Color Theory- Warm & Cool Colors

Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle, hair dryer (optional)

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ NOTE

Work on this for two lessons. Take your time and pace yourself well.

→ INTRO

So far, you have learned that colors can be categorized into complements, split-complements, and analogous colors. They can also be divided into warm and cool colors. Warm colors are red, orange, and yellow. Sort of makes you think "fire." Cool colors are green, blue, and purple. If you are working with an expanded color wheel, then red-purple, red, red-orange, orange, yellow-orange, and yellow are the warm colors, and the cool colors are purple, blue-purple, blue, blue-green, green, and yellow-green. You will only focus on the three secondary colors and learn how to warm up and cool down green, purple, and orange. This is not exhaustive information on color temperature. The temperature of any color, whether warm or cool initially, can easily change. For example, while all reds are primary colors

Term 1

and we always think of red as a warm color, there are cool reds, and there are warm reds. We are simply learning the basics.

→ PRACTICE

1. Watch the tutorial.
∞ Video Tutorial: Warm and Cool Value Scales L7 L8
2. Sketch out three value scales- each with eleven boxes, with a pencil in your Art book.
3. Begin painting your green just as demonstrated in the video. You will add yellow to warm up the green and blue to cool it down.
4. Next, you will do purple. Use blue to cool purple down and red to warm it up. Remember to keep all the warms at one end and the cools at the other end, and always label your book.
5. Last, you will create an orange scale. This seems confusing because orange is made up of two warm colors. It does still have a range of temperatures that it can achieve. Use red to cool orange down and yellow to warm it up.
6. When you are finished, clean up.

WEEK 8 45m Art: High School Fast Track - Lesson 16

Color Theory- Warm & Cool Colors

 Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle, hair dryer (optional)

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ NOTE

This is the last lesson you will work on these value scales. Plan to finish by the end of the lesson.

→ PRACTICE

1. Watch the tutorial video on warm and cool value scales.
∞ Video Tutorial: Warm and Cool Value Scales L7 L8
2. Sketch out three value scales- each with eleven boxes, with a pencil in your Art book.
3. Begin painting your green just as demonstrated in the video. You will add yellow to warm up the green and blue to cool it down.
4. Next, you will do purple. Use blue to cool purple down and red to warm it up. Remember to keep all the warms at one end, and the cools at the other end, and always label your book.
5. Last, you will create an orange scale. This seems confusing because orange is made up of two warm colors. It does still have a range of temperatures that it can achieve. Use red to cool orange down and yellow to warm it up.
6. When you are finished, clean up.

Art: High School Fast Track

[Click THIS text or scan the QR code for links.](#)

Term 1

WEEK 9 45m Art: High School Fast Track - Lesson 17

Color Theory-Mixing Colors with Pointillism

Materials: pastels, Art book, pink pearl and kneaded erasers, pencil

→ NOTE

Work on this for two lessons. Take your time and pace yourself well.

→ INTRO

Study the painting by Georges Seurat. Notice how the artist used dots of primary colors next to each other. It's easiest to see around the edge of the painting. This is called pointillism.

∞ Image Link: A Sunday Afternoon on the Island of La Grande Jatte
You will mix colors with pointillism, aka stippling. Stippling is simply using your art tool to make dots.

→ VIEW, NARRATE, & DISCUSS

∞ Video Tutorial: Stippling to Mix Colors in Pastel L8 L37

→ PRACTICE

- Draw three 3" circles in your Art book.
- Stipple red & yellow in one, blue & red in the other, and blue & yellow in the last one. Apply the dots in equal measure in order to achieve the color you desire. If one color has become dominant, add more dots with the other color.

→ DISCUSS

What happened?

WEEK 9 45m Art: High School Fast Track - Lesson 18

Color Theory-Mixing Colors with Pointillism

Materials: pastels, Art book, pink pearl and kneaded erasers, pencil

→ PRACTICE

Finish creating your secondary colors by stippling the primary colors together. If you have more time in this lesson, also mix a few tertiary colors by stippling. For example, stipple a circle of yellow-green.

∞ Image Link: A Sunday Afternoon on the Island of La Grande Jatte
∞ Video Link: Stippling to Mix Colors in Pastel L8 L37
Clean up at the end of your lesson.

WEEK 10 45m Art: High School Fast Track - Lesson 19

Color Theory- Contrasting Colors

Materials: glue stick, Art book, construction paper, scissors

PREP: Cut a strip of black construction paper to be almost as long and only half as wide as your Art book page. Cut 2 squares of each of red,

Term 1

orange, yellow, green, blue, and purple. These squares should be about 2" large.

→ INTRO

You will put together colors on a black background and on a white background to gain an understanding of contrasting colors. These are colors that pop off the page. Think lime green and black. They are colors that create much tension between each other.

→ PRACTICE

- Watch the tutorial video on contrasting colors.
∞ Video Tutorial: Contrasting Colors L8 L3
- Put together a contrasting color chart in your Art book, like the ones in the video.
- Don't forget to clean up at the end of your lesson.

WEEK 10 45m Art: High School Fast Track - Lesson 20

Color Theory- Contrasting Colors

 Materials: Art book, watercolors, pencil, brush, water, cloth, spray bottle, hair dryer (optional)

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

For this lesson, you will practice contrasting colors with watercolor. It is important to let your first color dry completely before testing colors in the centers of the squares. You do not want your colors to mix.

→ PRACTICE

1. Watch the tutorial video on contrasting colors in watercolor.
∞ Video Tutorial: Contrasting Colors with Watercolor L8 L4
2. Put together a contrasting color chart in your Art book, like the one in the video. Draw 8 squares. Place a smaller square in the center of each square.
3. Paint the 8 outside, larger squares the same color. Let it dry completely.
Use a hair dryer to speed up the drying time if you have one.
4. Paint a variety of colors in the inside, smaller squares, as you saw in the video.
5. Do a set of another color if you have time remaining in your lesson.
6. Don't forget to clean up at the end of your lesson.

Term 1

WEEK 11 45m Art: High School Fast Track - Lesson 21

Color Theory- Monochromatic Art

Materials: Art book, watercolors or pastels, pencil, brush, water, cloth, spray bottle, hair dryer (optional), reference photo

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ NOTE

You will have two lessons to complete this project.

→ INTRO

Now that you have studied color temperatures and how to apply value, you are ready for a monochromatic painting.

This is a mostly self-directed painting of your choice. You can use watercolors or pastels. You may want to find a reference photo to work from, or you could design an image from your own imagination or from a story or poem you have recently read.

→ PRACTICE

- Look at the monochromatic images. Notice how many values and variations of one color are in each painting.
- ∞ Image Link: Monochromatic Art
- Sketch out your picture in pencil in your Art book. Fill in shading and color using variations of only one color.

WEEK 11 45m Art: High School Fast Track - Lesson 22

Color Theory- Monochromatic Art

Materials: Art book, watercolors or pastels, pencil, brush, water, cloth, spray bottle, hair dryer (optional), reference photo

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ NOTE

This is your last lesson time to work on this project. Plan to finish by the end of your lesson time.

→ PRACTICE

- Look again at the monochromatic images. Notice how many values and variations of one color are in each painting. How many more do you still need to add to your picture?
- ∞ Image Link: Monochromatic Art
- Finish filling in shading and coloring using variations of only one color.
- Don't forget to clean up.

Art: High School Fast Track

Term 1

WEEK 12 45m Art: High School Fast Track - Lesson 23

Color Theory

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:

Art: High School Fast Track

WEEK 12 45m Art: High School Fast Track - Lesson 24

Color Theory

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:

Art: High School Fast Track

Term 2

WEEK 1 ☐ 45m Art: High School Fast Track - Lesson 25

Brush Drawing

☐ Materials: graph paper, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, Brushwork by Marion Hudson, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You have been using your watercolors and brushes for an entire term and are probably wondering why you are just now learning about how to apply brush forms. This is because color theory is an important concept to understand to learn how to control most art media, but you don't necessarily have to know how to control a brush or watercolors specifically in order to learn color theory. It is difficult to isolate visual art concepts because, like most of life, they are constantly intertwined with each other. As you learn color theory, brush drawing and watercolor skills, drawing and design, and art appreciation through picture study, you will have a more complete understanding of the visual arts. This will hopefully cause you to be more confident in creating your ideas and stories and enjoying beauty, which glorifies God. Brush forms are important to learn because they build muscle memory in your hands and help you to learn to control your brush. Just like with any practice, a sport, an instrument, a job, etc., building muscle memory allows you to recall movements without having to think much about them and also allows you to master movements so that you can recall them at the exact moment you need them with confidence. The first few lessons of this term will be spent in perfecting brush forms. You will practice repeatedly.

Read p.8-9 in Brushwork by Marion Hudson.

→ PRACTICE

1. Watch the vertical brush forms tutorial.
∞ Video Tutorial: Vertical Brush Forms L1 L26 & L3 L1
2. Practice the vertical brush going from up to down. Fill as many lines of your graph paper as is necessary to get a consistent form.
3. Watch the second vertical brush forms tutorial
∞ Video Tutorial: Vertical Brush-forms #2 L1 L27
4. Practice the vertical brush form from down to up for the rest of your lesson time. Remember that you are going for consistency in your forms.
5. Clean up. Clean and reshape your brush and lay it flat to dry.

Term 2

WEEK 1 45m Art: High School Fast Track - Lesson 26

Brush Drawing

Materials: graph paper, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, Brushwork by Marion Hudson, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You will continue practicing brush forms in different directions.
Read p.10-11 in Brushwork by Marion Hudson.

→ PRACTICE

- Watch the horizontal brush forms tutorial
∞ Video Tutorial: Horizontal Brush Forms L1 L28
- Spend the remainder of your lesson time practicing horizontal brush forms, going from left to right and from right to left. Use as many lines of graph paper as you need to get consistent forms.
- Clean up. Clean out your brush, reshape it, and lay it flat to dry.

WEEK 2 45m Art: High School Fast Track - Lesson 27

Brush Drawing

Materials: graph paper, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, Brushwork by Marion Hudson, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You will continue practicing brush forms in different directions.
Read p.12-13 in Brushwork by Marion Hudson.

→ PRACTICE

Watch the oblique brush forms #1 tutorial and then practice the up-left to down-right stroke until you get a consistent form.
∞ Video Tutorial: Oblique Brush Forms #1 L1 L31 & L2 L26 & L3 L2
Watch the second oblique brush forms video.
∞ Video Tutorial: Oblique Brush-forms #2 L1 L31
In this video, you saw the other three oblique brush forms demonstrated. For the remainder of your lesson time, only practice the down-right to up-left brush form.
Clean up.

Term 2

WEEK 2 45m Art: High School Fast Track - Lesson 28

Brush Drawing

Materials: graph paper, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, Brushwork by Marion Hudson, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You will continue practicing brush forms in different directions.
Read p.12-13 in Brushwork by Marion Hudson.

→ PRACTICE

You may need to watch the second oblique brush forms tutorial again in order to remember how to accomplish the bottom left to up right form and the top right to bottom left form.

∞ Video Tutorial: Oblique Brush Forms #2

Continue to practice the remaining two oblique brush forms until you have gained consistency.

Clean up.

WEEK 3 45m Art: High School Fast Track - Lesson 29

Brush Drawing

Materials: graph paper, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, Brushwork by Marion Hudson, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

It's important to continue practicing the brush forms until your muscle memory is good.

→ PRACTICE

Look at the designs on p.10, 14 & 16 in Brushwork by Marion Hudson.
Work through each of these designs on your own graph paper. You will need at least three pieces of graph paper so that you can put one design per page. Count the boxes on the example and on your own paper so that you lay out the design the same. However, if your paper has more boxes than the example, then center your design on your graph paper.
Clean up.

Term 2

WEEK 3 45m Art: High School Fast Track - Lesson 30

Brush Drawing

Materials: graph paper, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, Brushwork by Marion Hudson, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

It's important to continue practicing the brush forms until your muscle memory is good.

→ PRACTICE

Flip through Brushwork by Marion Hudson to understand ways in which you can use brush forms to make different objects.

Decide on one or two designs in the book to work on on your own graph paper for the remainder of the lesson time.

Clean up.

WEEK 4 45m Art: High School Fast Track - Lesson 31

Brush Drawing

Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You have worked for three weeks on brush forms, which has helped you to gain control over your paintbrush. Now you will focus on how to make brush strokes with your brush. You will reference Brush Drawing by May Mallam from this point forward.

Read Plate I.

→ PRACTICE

- Watch the tutorial on beginning brush strokes.
- ∞ Video Tutorial: Beginning Brushstrokes L4 L25, L5 L49, & L6 L1
- Practice the brush strokes on Plate I in your Art book for the remainder of your lesson time.
- Clean up.

Term 2

WEEK 4 45m Art: High School Fast Track - Lesson 32

Brush Drawing

Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You have practiced brush forms and brush strokes; now you will use those strokes to draw with your paintbrush.

→ PRACTICE

- Look at Plate II in Brush Drawing by May Mallam.
- Watch the tutorial video on curved brush strokes.
∞ Video Tutorial: Curved Brushstrokes L4 L31, L5 L50, & L6 L2
- Spend the lesson time practicing the images on Plate II.
- Clean up.

WEEK 5 45m Art: High School Fast Track - Lesson 33

Brush Drawing

Materials: Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle, salt

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

We will now transition into watercolor techniques. You will practice these techniques for two lessons.

→ PRACTICE

- Watch the watercolor techniques tutorial completely through before trying the techniques yourself.
∞ Video Tutorial: Watercolor Techniques L6 L17 & L8 L49
- Begin to practice these techniques in your Art book. Watch the tutorial as many times as you need.
- Clean up.

Term 2

WEEK 5 45m Art: High School Fast Track - Lesson 34

Brush Drawing

Materials: Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle, salt, tape, white crayon, Q-tips

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

Continue to practice watercolor techniques.

→ PRACTICE

- Finish practicing watercolor techniques based on the tutorial video. Watch the video as many times as you need.
- ∞ Video Tutorial: Watercolor Techniques
- Watch the tutorial on lifting and masking.
- ∞ Video Tutorial: Lifting & Resist (Masking) L6 L17 & L7 L37
- Practice these new techniques in your Art book.
- Clean up.

WEEK 6 45m Art: High School Fast Track - Lesson 35

Brush Drawing

Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

Read Plate VI in Brush Drawing by May Mallam. Monochromatic means one color. You will work on this Plate for two lessons

→ PRACTICE

- Using your watercolor techniques like wash, graduated wash, wet on wet, and wet on dry, practice making monochromatic paintings of the leaf images on Plate IV in Brush Drawing.
- ∞ Video Tutorial: Monochrome Leaf Watercolor Painting L5 L56
- Clean up.

Art: High School Fast Track

[Click THIS text or scan the QR code for links.](#)

Term 2

WEEK 6 45m Art: High School Fast Track - Lesson 36

Brush Drawing

Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ PRACTICE

Continue applying your skills by practicing the leaves on Plate VI for the duration of this lesson.

∞ Video Tutorial: Monochrome Leaf Watercolor Painting

Clean up by washing and reshaping your brush, and then let it dry flat before storing it in an upright position.

WEEK 7 45m Art: High School Fast Track - Lesson 37

Brush Drawing

Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

Read Plate VII in Brush Drawing by May Mallam. Remember that monochromatic means one color. However, in this lesson, you will recall color theory by applying complementary colors and layering to add value. Also, use lifting or masking techniques to bring out highlights in your work.

You will work on this Plate for two lessons.

→ PRACTICE

- You will be applying your watercolor skills while painting objects similar to the objects on Plate VII.

- Watch the tutorial on shaded monochrome objects.

∞ Video Tutorial: Shaded Monochrome Objects L5 L60

- Find objects around your classroom that are similar to the objects on Plate VII to paint.

Term 2

WEEK 7 45m Art: High School Fast Track - Lesson 38

Brush Drawing

Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

Read Plate VII in Brush Drawing by May Mallam. Remember that monochromatic means one color. However, in this lesson, you will recall color theory by applying complementary colors and layering to add value. Also, use lifting or masking techniques to bring out highlights in your work.

This is the last lesson you will work from Plate VII.

→ PRACTICE

You will be applying your watercolor skills while painting objects similar to the objects on Plate VII.

Watch the tutorial on shaded monochrome objects.

∞ Video Tutorial: Shaded Monochrome Objects L5 L60

Find different objects around your classroom that are similar to the objects on Plate VII to paint.

WEEK 8 45m Art: High School Fast Track - Lesson 39

Brush Drawing

Materials: photo of a simple landscape to reference, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

A simple landscape isn't cluttered with lots of objects. You will notice in the tutorial that the photo has a barn, fence, and some trees in addition to the sky and grass, but it is not full of people, cars, animals, rocks, etc. It's best to have a simple, not complicated, landscape when you are beginning. This underpainting technique is similar to the color theory project you did in Term 1 when you painted the picture with the complement first in watercolor and then painted the proper colors on top with pastels. Try to apply watercolor techniques such as wash, graduated wash, wet on wet, etc. You will have two lessons to work on your landscape painting.

→ PRACTICE

- Watch the tutorial on underpainting.

Term 2

∞ Video Tutorial: Underpainting L4 L29 & L6 L8

- Complete the underpainting of your landscape from your reference photo.
- Clean up.

WEEK 8 45m Art: High School Fast Track - Lesson 40

Brush Drawing

 Materials: photo of a simple landscape to reference, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You will complete your landscape in this lesson.

→ PRACTICE

Now that your underpainting is dry, you will use the watercolor technique of wet on dry in order to complete your landscape painting. You are also able to use all of the other watercolor techniques you have learned.

WEEK 9 45m Art: High School Fast Track - Lesson 41

Brush Drawing

 Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You will apply your watercolor knowledge and skills.
Read Plate XVI in Brush Drawing by May Mallam.

→ PRACTICE

Work through the images in Plate XVI by painting them in your Art book. Notice that there are color swatches beside each flower.
Clean up.

Term 2

WEEK 9 45m Art: High School Fast Track - Lesson 42

Brush Drawing

Materials: Brush Drawing by May Mallam, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ NOTE

You will need a live or cut flower to work from for Lessons 43 & 44. It can be any kind of flower. If you do not have immediate access to one, then you may need to purchase one in the floral department of your grocery store.

→ INTRO

You will apply your watercolor knowledge and skills.
Read Plate XX in Brush Drawing by May Mallam.

→ PRACTICE

Work through the images in Plate XX by painting them in your Art book.
Notice that there are color swatches beside each object.
Clean up.

WEEK 10 45m Art: High School Fast Track - Lesson 43

Brush Drawing

Materials: a cut or live flower, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ NOTE

It is important to work from a live or cut flower for this and the next lesson.

→ INTRO

You have been working from someone else's painting in a book. For the remainder of the lessons, you will work from direct observation of the actual object. You will paint flowers for this lesson and the next, applying all of your brush drawing and watercolor skills. It is okay, even great, if your flowers begin to fade between lessons and even if they dry out completely. Paint whatever is before you. Make sure you are trying to paint what you see and not a glorified version of what you think a flower should look like.

→ PRACTICE

1. Watch the tutorial video.

Term 2

∞ Video Tutorial: Observational Brush Drawing of a Flower L1 L39, L2 L40, & L7 L26

2. Look at your flower, paying close attention to how and where the petals overlap and the color variations where it overlaps.
3. Mix the colors you will need in your paint palette before beginning. Paint swatches on your paper to be sure of your color matching.
4. Paint your flower from observation. What it actually looks like, not what you think it should look like.
5. When you are finished, clean up.

WEEK 10 45m Art: High School Fast Track - Lesson 44

Brush Drawing

 Materials: a cut or live flower, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ PRACTICE

Paint the same or a different flower from observation in your Art book. When you are finished, clean up.

WEEK 11 45m Art: High School Fast Track - Lesson 45

Brush Drawing

 Materials: a shoe, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ INTRO

You will observe a shoe and paint it using all of your brush drawing and watercolor skills and knowledge. It can be any kind of shoe. It can also be the left or the right shoe.

→ PRACTICE

1. Watch the tutorial video on painting your shoe from observation.
∞ Video Tutorial: Watercolor Shoe Painting L5 L15
2. Set up your chosen shoe in front of you.
3. Mix your colors in your palette and paint swatches.
4. Paint your shoe from observation.
5. Clean up at the end of the lesson.

Art: High School Fast Track

[Click THIS text or scan the QR code for links.](#)

Term 2

WEEK 11 45m Art: High School Fast Track - Lesson 46

Brush Drawing

Materials: a shoe, Art book, watercolors, paper towels, water cup, round #8, 10, or 12 paint brush, spray bottle

PREP: Spray your watercolors before you begin so that they will begin to soften.

→ PRACTICE

You can finish your shoe painting from observation from the last lesson, or paint a different shoe from observation for this lesson. Apply all of the knowledge and skills you have gained. Remember to layer your paints for value changes or add a little of the complement to darken values. Clean up at the end of your lesson.

WEEK 12 45m Art: High School Fast Track - Lesson 47

Brush Drawing

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:
Art: High School Fast Track

WEEK 12 45m Art: High School Fast Track - Lesson 48

Brush Drawing

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:
Art: High School Fast Track

Term 3

WEEK 1 45m Art: High School Fast Track - Lesson 49

Drawing

 Materials: chalkboard, white chalk, chalkboard eraser

PREP: You will need a chalkboard for the first few lessons of Drawing. If you have not yet set one up, watch these tutorials on how to do that.

∞ Video Tutorial: Preparing Your Chalkboard

→ INTRO

For the last two terms, you have been drawing, but you have not been focusing on your drawing skills as much as you have been focusing on the science of color, watercolor, and brush skills. This term, we will focus on drawing techniques and skills. You will continue to use the knowledge you have gained in color theory and brush drawing, and add to that skills with additional media. The lessons will reference tutorial videos that begin in Level 1 and go through Level 8. The skills are the same regardless of age, but you will be moving through these skills at a much faster pace. We will work at the chalkboard and in our Art book. While you are drawing, you should focus on being an arm's length away from the board, whether it's the chalkboard or your drawing board. To do this with your drawing board, you should push your chair away from the table, place your drawing board in your lap, and let it lean towards the table. It should be closer to your knees than your waist so that your arm can be extended. Having this space between you and your drawing will help you to focus on drawing with your shoulder muscles as opposed to drawing with your fingers, wrists, or elbows. This will feel uncomfortable for a while until you get used to it. Remember, muscle memory is what you are aiming for in learning visual art skills and techniques. To draw in your Art book this way, you will need to clip your book to your drawing board and sit with your drawing board angled against the table.

- Look at the image of how to set up your drawing board. From now on, you should set your drawing board in your lap and lean it against the table. Clip your book somewhere on your board to draw.

∞ Image Link: How to Set Up a Drawing Board

- Watch the tutorial on drawing from your shoulder.

∞ Video Tutorial: Drawing From Your Wrist and Shoulders (YouTube)

→ PRACTICE

- Watch the tutorials on line drawing at the board with the chalk on its point and with the chalk on its side.

∞ Video Tutorial: Drawing Circles Art L1 L2

∞ Video Tutorial: Drawing Spirals L1 L3

- Practice at the board, drawing circles going to the right and switching to draw towards the left, concentrating on using your shoulder muscles to draw. Do this for the remainder of your lesson time.

Term 3

WEEK 1 45m Art: High School Fast Track - Lesson 50

Drawing

Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, chalkboard, chalk, eraser, Art book (optional), charcoal (optional)

→ INTRO

You will continue to practice drawing at the board from your shoulder.

Remember to space yourself about an arm's length from the board, whether you are sitting or standing at the board.

Read p.10 ("Thought and Expression") through p.12 ("...for the sake of its freedom.")

→ PRACTICE

1. Begin by practicing circles from as small as you can get, using your shoulder muscles, to as large as you can get. Practice in both directions.
2. Practice drawing spirals in the same way.
3. Watch the tutorial on how to draw trilliums.
∞ Video Tutorial: Trilliums L1 L6
4. Now practice trilliums on the chalkboard. Practice drawing them in different directions and starting at different points of the trillium.
5. When you have mastered the trillium draw squares, rectangles, triangles, stars, etc., using the same muscle group to draw. Draw them at different sizes, from as small as you can to as large as you can. Try starting in different places on the shape and drawing in different directions. For example, if you are drawing a square, start at the top left corner and draw toward the right. The next time you draw a square, start at the bottom right corner and draw up and toward the left.
6. Look at Plate 1 on p.11 for ideas on what to draw on the board for practice.
7. Practice this for the remainder of the lesson time. You can move to your Art book and draw with charcoal if you'd prefer. Just remember to set up your drawing board when using your Art book.

WEEK 2 45m Art: High School Fast Track - Lesson 51

Drawing

Materials: Art book, pastels, paper towels, cloth (old towel) for your lap (optional)

→ INTRO

You will put into practice what you have learned about trilliums

→ PRACTICE

1. Watch the tutorial on drawing trilliums.
∞ Video Tutorial: Drawing Trilliums L1 L7
2. Study the Trilliums & Lilies document.
∞ Image Link: Trilliums & Lilies

Art: High School Fast Track

[Click THIS text or scan the QR code for links.](#)

Term 3

3. Spend your lesson time drawing a lily in your Art book. Apply your knowledge of drawing trilliums.
4. Clean up.

WEEK 2 45m Art: High School Fast Track - Lesson 52

Drawing

 Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, chalkboard, chalk, eraser

→ INTRO

Read p.12 ("The aim in the object drawing lesson...") through p.14 (...objects for these lessons.")

→ PRACTICE

- After reading the assignment, watch the tutorial on proportion.
∞ Video Tutorial: Proportion L2 L58 & L3 L49
- Spend your lesson time drawing the objects in Plate 2 on p.15 at the chalkboard.
- Focus on drawing from your shoulder muscles and getting the correct proportions in the objects you are drawing.

WEEK 3 45m Art: High School Fast Track - Lesson 53

Drawing

 Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, drawing board, clips, Art book, charcoal, paper towels

→ INTRO

You will transfer the skills from the chalkboard to your Art book. Remember to sit away from the table with your drawing board properly in your lap and leaning against the table. Clip your Art book to the board and draw from your shoulder.

→ PRACTICE

Spend your lesson time drawing the objects in Plate 2 on p.15 in your Art book. Focus on drawing from your shoulder muscles and getting the correct proportions in the objects you are drawing.

WEEK 3 45m Art: High School Fast Track - Lesson 54

Drawing

 Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, chalkboard, chalk, eraser

→ INTRO

Read p.14 ("Ellipses:...") through p.18 (...too square or too pointed.")

→ PRACTICE

- Watch the tutorials on ellipses.
- ∞ Video Tutorial: The Ellipse Lesson L3 L51

Term 3

- ∞ Video Tutorial: Horizontal Ellipses L3 L53
- ∞ Video Tutorial: Vertical Ellipses L3 L55
- Practice drawing ellipses on the board for the remainder of your lesson time.

WEEK 4 45m Art: High School Fast Track - Lesson 55

Drawing

Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, drawing board, clips, Art book, charcoal, paper towels

→ INTRO

Recall what you read on p.14 ("Ellipses:...") through p.18 (...too square or too pointed.")

→ PRACTICE

- Spend time drawing ellipses as you see in Plate 3 on p.16 in Drawing, Design, and Craft-Work by Frederick J. Glass. Draw them and other ellipses in your Art book with charcoal.
- Rewatch the videos on ellipses if you need to.
- ∞ Video Tutorial: The Ellipse Lesson
- ∞ Video Tutorial: Horizontal Ellipses
- ∞ Video Tutorial: Vertical Ellipses

WEEK 4 45m Art: High School Fast Track - Lesson 56

Drawing

Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, chalkboard, chalk, eraser

→ INTRO

Read p.18 ("Cylindrical Objects:...") through p.24 (... as they occur in future lessons.")

→ PRACTICE

- Watch the tutorial on cylindrical objects.
- ∞ Video Tutorial: Cylindrical Objects L2 L64 & L3 L54
- Look at and draw the objects from Plates 4, 5, 6, and 7 on the chalkboard.
- Apply what you have learned about ellipses as well as cylinders.

WEEK 5 45m Art: High School Fast Track - Lesson 57

Drawing

Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, drawing board, clips, Art book, charcoal, paper towels

→ INTRO

You will transfer your skills and knowledge of cylinders from the chalkboard to your Art book.

Art: High School Fast Track

[Click THIS text or scan the QR code for links.](#)

Term 3

→ PRACTICE

- Re-watch the tutorial on cylindrical objects if you need to.
∞ Video Tutorial: Cylindrical Objects L2 L64 & L3 L54
- Look at and draw the objects from Plates 4, 5, 6, and 7 in your Art book with charcoal.
- Clean up.

WEEK 5 □ 45m Art: High School Fast Track - Lesson 58

Drawing

□ Materials: Canned good, pastels, Art book, chalk, chalkboard

PREP: Students will need a can to observe in this lesson. Any canned good will do.

→ INTRO

- Spend about three minutes drawing horizontal and vertical ellipses on the chalkboard.
- View the tutorial to learn how to set up the prop for the lesson.
∞ Video Tutorial: Setting Objects at Eye Level L2 L61, L3 L52, & L5 L27

→ PRACTICE

- Set the can in front of the student below eye level. (Setting it on the table is usually enough to get it below eye level. You need to be able to see the side of the can and the top of the can.)
 - Spend time studying and discussing what you see.
 - Draw what you see with pastels in your Art book. Don't forget what we've learned about drawing cylinders.
- Move the can so that it is farther away and then closer to you. Draw what you observe each time.

WEEK 6 □ 45m Art: High School Fast Track - Lesson 59

Drawing

□ Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, Charcoal, Art book, cloth, or paper towels

PREP: You will need a glass sheet from an old picture frame and masking or painter's tape, a dry-erase marker or Sharpie, and a road that is safe to stand on or a sidewalk for the next lesson.

→ INTRO

You will learn about drawing rectangular objects in perspective.
Read p.24 ("Rectangular Objects:") through p.31 ("...and is far too often neglected.")

→ PRACTICE

1. Watch the tutorial videos on rectangular prisms.
∞ Video Tutorial: Horizontal Rectangular Prisms L4 L11
∞ Video Tutorial: Vertical Rectangular Prisms L4 L12
2. Apply what you have learned in the tutorial videos by practicing in

Term 3

- your
- Art book.
- 3. Look at Plates 8 & 9 to draw from.
- 4. Clean up.

WEEK 6 45m Art: High School Fast Track - Lesson 60

Drawing

 Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, glass sheet (from an old picture frame, any size but comfortable to hold), painter's tape, dry-erase marker or sharpie, a non-busy road that is safe to stand in or a sidewalk with a clear view for a long distance.

PREP: You will need to prepare your glass sheet before beginning, and you will need to take it along with your marker outside to work. You will need to be able to see at least a quarter of a mile. A neighborhood road that has very little traffic is the best option, but if you don't have access to that, then a city or neighborhood sidewalk will work.

Watch the tutorial to know how to set up your glass sheet.

∞ Video Tutorial: How to Prepare a Glass Sheet L4 L4

→ INTRO

It is important that you read your assignment and watch the tutorial video before heading outside.

- Read p.24 ("Rectangular Objects:") through p.31 ("...and is far too often neglected.")
 - Watch the tutorials on how to use the looking glass outside and how to measure distances and size relationships.
- ∞ Video Tutorial: Looking Glass L4 L4
- ∞ Video Tutorial: Measuring with the Eye and Drawing Tool

→ PRACTICE

1. Go outside to the place you have predetermined and stand in a way that you can see both edges of the road or sidewalk.
2. Look as far into the distance in front of you as you can. Do you notice the trees getting smaller and shorter as they get farther from you? Or maybe you see light poles or buildings doing that. Do you notice how the two sides of the road or sidewalk seem to converge in the distance? Those objects don't in reality get smaller or closer together, but this phenomenon is called one-point perspective.
3. Hold up your glass at eye level and, using your marker, trace the objects that you see.

Term 3

WEEK 7 □ 45m Art: High School Fast Track - Lesson 61

Drawing

□ Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, pastels, Art book, cloth or paper towels, ruler, hair spray or other fixative

→ INTRO

For this lesson, you will apply the knowledge you have gained in rectangular prisms and the looking glass outside, and add a new concept- perspective.

→ PRACTICE

1. Watch the tutorial on perspective all the way through.
∞ Video Tutorial: Perspective L4 L6
2. Now practice what you saw in the tutorial in your Art book.
3. Think about how the objects in Plate 9 on p.28 could fit into a landscape like this.
4. Don't forget to spray your drawing with a fixative when you are finished.
5. Clean up.

WEEK 7 □ 45m Art: High School Fast Track - Lesson 62

Drawing

□ Materials: Pastels, Art book, cloth or paper towels, ruler, hair spray or other fixative

→ PRACTICE

Spend your lesson time creating your own drawing in one-point perspective. It can be a drawing of anything inside or outside. You could turn those boxes you drew into buildings by drawing in roads, sidewalks, windows, doors, etc., or you could turn them into tables and chairs. Don't forget to spray your drawing with a fixative when you are finished and to clean up.

WEEK 8 □ 45m Art: High School Fast Track - Lesson 63

Drawing

□ Materials: Art book, charcoal, pastels, pencil, cloth or paper towels, fixative, pink pearl and kneaded eraser

→ INTRO

We have spent the last seven weeks focused on drawing skills. We will now turn our attention to shading techniques. You will need to understand how to use your eraser as a drawing tool to apply value appropriately.

- Watch the tutorial on using your eraser properly.
- ∞ Video Tutorial: Using Erasers As Drawing Tools L5 L31

→ PRACTICE

Term 3

1. Watch the tutorial on tonal value scales in charcoal and pastels.
∞ Video Tutorial: Value Scales in Pastel and Charcoal L4 L7
2. Set up two value scales with a pencil. Have at least 6 boxes in each value scale.
3. Shade the first one with any one color of pastel. You need to attain 6 different values like in the tutorial.
4. Use your erasers to help you achieve value.
5. Next, shade the other value scale with charcoal as in the tutorial.
6. Clean up.

WEEK 8 □ 45m Art: High School Fast Track - Lesson 64

Drawing

□ Materials: Art book, charcoal, pencil, cloth or paper towels, fixative

→ INTRO

You will learn how to apply value by hatching and cross-hatching in charcoal.

→ PRACTICE

1. Watch the tutorial on hatching in charcoal.
∞ Video Tutorial: Hatching with Charcoal L8 L25
2. Create two value scales on one page with a pencil.
3. Apply a hatching value scale with charcoal in the first value scale.
4. Watch the tutorial on cross-hatching in charcoal.
∞ Video Tutorial: Cross-Hatching in Charcoal L8 L28
5. Apply a cross-hatching value scale in the second value scale that you sketched in pencil.
6. Spray your work with a fixative and clean up.

WEEK 9 □ 45m Art: High School Fast Track - Lesson 65

Drawing

□ Materials: Art book, pastels, pencil, cloth or paper towels, fixative

→ INTRO

You will learn how to apply value by hatching and cross-hatching in pastel.

→ PRACTICE

1. Watch the tutorial on hatching in pastel.
∞ Video Tutorial: Hatching in Pastel L8 L27
2. Create two value scales on one page with a pencil.
3. Apply a hatching value scale with pastel in the first value scale.
4. Watch the tutorial on cross-hatching in pastel.
∞ Video Tutorial: Cross-Hatching in Pastel L8 L30
5. Apply a cross-hatching value scale with pastel in the second value scale that you sketched in pencil.
6. Spray your work with a fixative and clean up.

Term 3

WEEK 9 □ 45m Art: High School Fast Track - Lesson 66

Drawing

□ Materials: Art book, pencil

→ INTRO

You will learn how to apply value by hatching and cross-hatching in pencil.

→ PRACTICE

1. Watch the tutorial on value in pencil.
∞ Video Tutorial: Value Scale with Pencil (aka Graphite) L7 L57
2. Create three value scales on one page.
3. Apply a tonal value scale with a pencil in the first value scale.
4. Watch the tutorial on hatching in pencil.
∞ Video Tutorial: Hatching in Pencil L8 L26
5. Apply a hatching value scale with a pencil in the second value scale.
6. Watch the tutorial on cross-hatching in pencil.
∞ Video Tutorial: Cross-Hatching in Pencil L8 L29
7. Apply a cross-hatching value scale in pencil in the third value scale.
Clean up.

WEEK 10 □ 45m Art: High School Fast Track - Lesson 67

Drawing

□ Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, charcoal, Art book, cloth or paper towels, fixative, 3-4 objects of different sizes and shapes, lamp or spotlight, pink pearl and kneaded eraser

PREP: You will need to gather 3-4 objects in different shapes and sizes from around your classroom. These items can be anything from a stapler to a tissue box, but try not to use something flat, like a piece of paper, as one of your objects.

→ INTRO

You will learn about composition. Composition is the way the elements are arranged on your paper or canvas.

Read p.117 ("Pictorial Composition:") through p.120 ("... or circle is best.").

→ PRACTICE

1. Watch the tutorial video on composition.
∞ Video Tutorial: Composition L7 L50
2. Arrange the objects you gathered in a pleasing way. Watch the tutorial video on setting up a still life if you need help on how to do that.
∞ Video Tutorial: Setting Up a Still Life L1 L10 & L5 L26
3. Draw thumbnails on a page in your Art book and practice setting up

Term 3

different compositions from your still life in the thumbnails, as you saw in the tutorial video.

4. Clean up.

WEEK 10 45m Art: High School Fast Track - Lesson 68

Drawing

Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, pencil, Art book

→ INTRO

Read p.120 ("Line:...") through p.131 ("... the balance of the lines.")

→ PRACTICE

- Watch the tutorial on lines.
- ∞ Video Tutorial: Line in Pictorial Composition L7 L56
- Set up six thumbnails on a new page in your Art book. Draw line designs in those boxes. Recall what you learned in the video, but do not copy the same designs.
- Clean up.

WEEK 11 45m Art: High School Fast Track - Lesson 69

Drawing

Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, charcoal, Art book, cloth or paper towels, fixative, 3-4 objects of different sizes and shapes, lamp or spotlight, pink pearl and kneaded eraser

→ NOTE

You will have two lessons to complete this drawing.

→ INTRO

This has been a whirlwind of a course, and you have learned so much! We will finish the last two lessons by focusing on light source and applying those value and composition techniques you learned to add shading to objects.

Read p.98 ("Light and Shade...") through p.107 (... and less of a convention than an outline.")

→ PRACTICE

1. Watch the tutorial on shading and light source.
- ∞ Video Tutorial: Shading and Light source L5 L26
2. Set up an interesting still life with your objects. Set it up in a place it can stay for this lesson and the next, as you will continue this drawing in the next lesson.
3. Control the light in the room with the lamp or spotlight.
4. Decide on a composition by doing a few thumbnails.
5. Once you have chosen your favorite composition, begin drawing your finished version on a new page in your artbook. (You may need to wait

Art: High School Fast Track

Term 3

until the next lesson to begin your final drawing if your lesson time has come to an end.)

6. Clean up at the end of your lesson time, but do not put your still life away. You need it to continue drawing.

WEEK 11 45m Art: High School Fast Track - Lesson 70

Drawing & Design

 Materials: Drawing, Design, and Craft-Work by Frederick J. Glass, charcoal, Art book, cloth or paper towels, fixative, 3-4 objects of different sizes and shapes, lamp or spotlight, pink pearl and kneaded eraser

→ RECAP

- Recall how to set up your drawing board.
- Recall shading, light source, shadows, and highlights.
- Recall how to create values with charcoal.
- Recall how to use your pink pearl and kneaded erasers as drawing tools.

→ PRACTICE

- Finish drawing your still life with charcoal and erasers.
- Spray your finished work with a fixative and clean up.
- You have learned so much on this fast-track journey. Great job! Apply what you have learned to nature journaling and illustrated narrations, but also use this knowledge as a gift to rest and bring glory to God.

WEEK 12 45m Art: High School Fast Track - Lesson 71

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:

Art: High School Fast Track

WEEK 12 45m Art: High School Fast Track - Lesson 72

Exam Week

→ EXAMS

Answer question(s) related to the course.

Questions will come from:

Art: High School Fast Track

Art: High School Fast Track

Examination

Term 1

- Explain contrasting colors. List six pairs of contrasting colors. (You can be general with hue names; i.e., yellow as opposed to Hansa yellow.)
- Describe fully what stippling is. How can you use it to mix colors?

Term 2

- Demonstrate and explain three watercolor techniques you have learned.
- Explain why it is important to do repetitive assignments in art.

Term 3

- Explain what tonal value is and how to appropriately use your erasers in a tonal drawing.
- Tell all you know about setting up a composition for art.
