

Geography

Canada

About the Course

Explore each region of Canada, its geological features, cultural geography, symbols, and varied ecosystems. Along the way, students practice their mapping skills by making models and drawing places local to them, such as their neighborhood.

Placement & Combining Tips

This course progresses chronologically over two years (Grades 2 and 3), studying half of Canada's provinces and territories each year. This course is intended to follow Grade 2; however, the levels may be reversed in order to combine students. Students who did not take Geography Foundations may wish to incorporate those lessons into the afternoons.

Scheduling

GRADE	SCHEDULE INFO.	BOOKS

Geography: Grade 3 (Canada)

How To Teach

Overview

The steps below are generally true for most geography lessons. Sometimes several lessons might build together or focus on a particular area (like Map Work).

Introduce

Through questions, observations, an activity, or recalling the last lesson, introduce the topic for the day.

Map Questions

Answer questions on the map or on making your own maps.

Read

Read the day's passage out loud or have the student read independently.

Narrate

Have students retell the passage either orally or in writing. They may want to use maps or pictures to tell back.

Map Work

The lesson may contain more map work as students make their own maps or add to ongoing maps.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

WEEK 1 20m Geography: Grade 3 (Canada) - Lesson 1

Introduction

Materials: atlas, globe, or wall map showing North America; My Canada; geography journal

PREP (if required): Print Blank World Map, Blank North America Map, Blank Outline Map of Canada.

∞ Map Link: Blank World Map

∞ Map Link: Blank North America Map

∞ Map Link: Blank Outline Map of Canada (download the first option under "Maps of Canada")

→ INTRO

In geography this year, we will continue our two-year journey across Canada. What do you remember from last year's readings? (You can read the titles of sections or show a few illustrations from last year's readings to help.) Let's look at the map in the front of the My Canada book. What do you notice or remember?

→ MAP QUESTIONS (REVIEW)

Map Resource: atlas, globe, or wall map showing North America

1. Find North America.
2. Find the equator. Is Canada north or south of the equator?
3. What is to the west of Canada? (Pacific Ocean) To the east? (Atlantic Ocean) To the north? (Arctic Ocean) To the south? (United States of America)

Map Resource: My Canada

1. Find Ottawa and discuss what it means to be a capital city.
2. Identify the following provinces and capital cities that were studied in Grade 2: British Columbia (Victoria), Alberta (Edmonton), Saskatchewan (Regina), Manitoba (Winnipeg), Ontario (Toronto), Quebec (Quebec City), and New Brunswick (Fredericton).

→ NOTE

The following activities are for students who did not do them in Grade 2. Students who already have these maps can review them and add any information that might be missing. Students can also work on these activities gradually over the next several lessons.

→ MAP WORK

Add the Blank World Map (referred to moving forward as "My World Map"), the Blank North America Map (referred to moving forward as "My North America Map"), and the Blank Outline Map of Canada (referred to moving forward as "My Canada Map") to your geography journal.

Map Resource: My World Map

1. Add the title "My World Map."
2. Colour in Canada.

Map Resource: My North America Map

1. Add title "My North America Map."
2. Label the borders of Canada. (Pacific Ocean, Atlantic Ocean, Arctic Ocean, United States of America)
3. Label any other countries of interest, using a North American map or atlas as a reference (Greenland, Mexico, etc.).

Map Resource: My Canada Map

1. Add title "My Canada Map."
2. Add Ottawa (with a star inside a circle) to the map and label it.
3. Label the provinces and their capital cities: British Columbia (Victoria),

★ TEACHER NOTE

If your student completed Geography: Grade 2 (Canada) last year, please continue using their World, North America, and Canada maps from that course. Otherwise, links are provided for you to print new blank maps.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

Alberta (Edmonton), Saskatchewan (Regina), Manitoba (Winnipeg), Ontario (Toronto), Quebec (Quebec City, and New Brunswick (Fredericton).

WEEK 1 20m Geography: Grade 3 (Canada) - Lesson 2

Nova Scotia

Materials: The Kids Book of Canada, geography journal

PREP: (Optional) Print off a blank map of Nova Scotia for more detailed mapping.

∞ Map Link: Outline Maps of Canada and Provinces (These maps have rivers and lakes.)

∞ Map Link: Completely Blank Map of Nova Scotia

→ INTRO

For the next few lessons, we will learn more about the province of Nova Scotia.

→ MAP QUESTIONS

∞ Map Link: Map of North America

What bodies of water form natural borders for Nova Scotia? (Gulf of St. Lawrence, Atlantic Ocean)

Map Resource: The Kids Book of Canada "Canada" p.4-5

1. Find the province of Nova Scotia on the map. What does it border? (New Brunswick)

2. How many different geographical regions do we find in Nova Scotia? Each one has a number and a separate colour. (There is one: Appalachian Region.)

3. From this region, what might the climate be like in Nova Scotia?

→ READ, NARRATE, & DISCUSS

p.36-37 "Nova Scotia means" - "western coast."

→ MAP WORK

Map Resource: My Map of Canada

1. Label Nova Scotia.

2. Label Halifax with a star to show it is a capital city.

3. Label the Bay of Fundy (will likely need to use an arrow or a symbol).

4. Draw in and label any other features or illustrations of interest (bodies of water, cities, landmarks, natural features, etc.).

★ TEACHER NOTE

For students who have an extra interest in mapping, there will be an optional blank provincial or territorial map provided. Students can decide whether to do all their map work on "My Map of Canada," or, if they want to add extra details and illustrations, they may wish to have one map for each province/territory.

★ TEACHER TIP

Lesson plans will include some Extra Helping links and suggestions connected to the places on the map. However, as the students spend time looking at the images in My Canada, take some additional time to look up any of the places, animals, natural features, or landmarks that are of interest.

● EXTRA HELPING

Watch the tide come in and out at the Bay of Fundy.

∞ Video Link: World's Highest Tides (Time-Lapse)

WEEK 2 20m Geography: Grade 3 (Canada) - Lesson 3

Nova Scotia, cont.

Materials: The Kids Book of Canada, geography journal

→ RECAP

What did you learn about Nova Scotia in the previous lesson?

→ READ, NARRATE, & DISCUSS

p.38-39 "The schooner *Bluenose*" - "beauty and history."

• Spend some time today entering an item of interest into your Picture Timeline. Students could also continue to decorate their map of Nova Scotia.

● EXTRA HELPING

Learn more about the Acadian people.

∞ Video Link: Who are the Acadians?

Watch footage of the Bluenose racing schooner and learn more about this Canadian symbol, now memorialized on the Canadian dime.

∞ Video Link: Canada 150: The Bluenose

Take a virtual tour of the historically reconstructed Fortress of Louisbourg and experience its living museum.

∞ Video Link: Fortress of Louisbourg National Historic Site

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

Hear Anne Murray sing Snowbird.
∞ **Audio Link:** Snowbird

★ TEACHER NOTE

There are many options for how students can record their learning about each province and territory in their geography journal. Some students might want to record relevant facts (population, size, motto, capital, provincial symbols, etc.); others may want to spend extra time mapping rivers, mountains, and cities on blank maps; still others may wish to colour blank flags and draw pictures. Choose what would appeal most to your individual student(s), and extra work could be done during afternoon occupations.

WEEK 2 20m Geography: Grade 3 (Canada) - Lesson 4 *Nova Scotia, cont.*

📄 **Materials:** My Canada, Canada Wild

→ RECAP

What did you learn about Nova Scotia in the previous lesson?

→ VIEW & DISCUSS

Nova Scotia map in My Canada (pages not numbered)

→ MAP QUESTIONS

1. What are some of the animals that live in Nova Scotia? How many different ones can you find?
2. Can you find any National Parks in Nova Scotia? What about some Historic Sites?
3. Looking at the images, what are some activities that people might like to do in Nova Scotia?
4. Each map in this book has a symbol in the corners. Can you find Nova Scotia's? Why might it have been chosen?

→ READ, NARRATE, & DISCUSS

p.22-25 "Sable Island Sweat Bee" - "ways to protect it."

→ ILLUSTRATE (OPTIONAL)

Draw a Sable Island sweat bee pollinating a flower using watercolours or another medium such as chalk, pastels, or crayons.

• EXTRA HELPING

Learn more about Sable Island, where the Sable Island sweat bee is found.

∞ **Video Link:** 5 Things You (Probably) Didn't Know About Sable Island

Explore the rich history of Nova Scotia's African heritage at the Black Cultural Centre for Nova Scotia, the Africville Museum, and the Black Loyalist Heritage Centre.

∞ **Video Link:** Discover African Nova Scotia Culture

See more photos and video of the Sable Island sweat bee from Parks Canada.

∞ **Link:** Sable Island Sweat Bee

WEEK 3 20m Geography: Grade 3 (Canada) - Lesson 5 *Nova Scotia, cont.*

📄 **Materials:** geography journal

PREP: Print the flag of Nova Scotia.

∞ **Image Link:** Colouring Book of Flags: Canada

→ MAP WORK

Colour the flag of Nova Scotia and add it to your geography journal.

→ MAPPING ACTIVITY

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

Spend today's lesson learning more about Nova Scotia or any of the other provinces: check out some Extra Helpings, look up additional images, or add some more detail to your maps.
Today would also be a great day to check out a local landmark or take a nature walk!

WEEK 3 20m Geography: Grade 3 (Canada) - Lesson 6

Reading Maps

Materials: My Canada

→ NOTE

The information in this lesson is a refresher from last year.

→ MAP QUESTIONS

Map Resource: My Canada

1. Find the compass rose on the map of Canada at the beginning of My Canada.
2. What direction is north? South? East? West?
3. What is to the west of British Columbia? (Pacific Ocean)
4. What ocean is east of Ontario? (Atlantic Ocean)
5. If we travel from Victoria to Halifax, which direction would you travel? (east)
6. Run your finger along the southern border of Canada. Most of Canada's population lives near this border. Can you name some of the cities you see there?
7. Locate the capital city of Canada (Ottawa). Discuss what it means to be a capital city, and give some examples of other capital cities around the world.
8. Locate your province or territory. How close do you live to the southern border? How close do you live to the capital city of Ottawa? Which direction would you travel to get to Ottawa? Could you drive there, or would you have to fly?
9. Looking at the map, point out places you've visited or places where your family and friends live.
10. Come up with your own questions to give more practice on directions.

WEEK 4 20m Geography: Grade 3 (Canada) - Lesson 7

Grids and Maps

Materials: local map, globe, or atlas (showing a grid)

PREP: Today you will need a map of your local area (a provincial or territorial map would also work if the city cannot be found). If no options exist, print a map from a web mapping service (like Google Maps or OpenStreetMap) and draw your own grid.

→ INTRO

Spend some time looking at the grid lines on your globe or atlas. What do you notice?

→ VIEW, NARRATE, & DISCUSS (OPTIONAL)

If longitude, latitude, and grid coordinates are new concepts for your student(s), you may wish to watch and discuss the following video lesson.
∞ Video Link: Longitude and Latitude Explained

→ MAP QUESTIONS

Map Resource: your local map

1. Spend some time calling out grid cells; for example, "locate G4."
2. When this is mastered, move on to specific places with the following types of questions.
3. What grid cell is your home in?
4. Where is your church, grocery store, bank, park, etc.? What grid cell is

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

that in?

→ NOTE

Save your map for later lessons.

WEEK 4 20m Geography: Grade 3 (Canada) - Lesson 8

Prince Edward Island

Materials: The Kids Book of Canada, geography journal

PREP: (Optional) Print off a blank map of Prince Edward Island for more detailed mapping.

∞ Map Link: Outline Maps of Canada and Provinces (These maps have rivers and lakes.)

∞ Map Link: Completely Blank Map of Prince Edward Island

→ INTRO

When was the last time you ate potatoes? Do you know where yours come from? The next two weeks will be spent learning about the province of Prince Edward Island.

→ MAP QUESTIONS

Map Resource: The Kids Book of Canada "Canada" p.4-5

1. Find the province of Prince Edward Island on the map. What does it border? (It is an island, surrounded completely by the Atlantic Ocean.)
2. How many different geographical regions do we find in Prince Edward Island? Each one has a number and a separate colour. (There is only one: the Appalachian Region.)
3. From this region, what might the climate be like on Prince Edward Island? What other provinces share this region?

→ READ, NARRATE, & DISCUSS

p.40-41 "Prince Edward Island" - "in the Western Hemisphere."

→ MAP WORK

Map Resource: My Map of Canada

1. Label Prince Edward Island.
2. Label Charlottetown with a star to show it is a capital city.
3. Draw in the Confederation Bridge and label the Northumberland Strait, which separates Prince Edward Island from the mainland of New Brunswick.
4. Draw in and label any other features or illustrations of interest (bodies of water, cities, landmarks, natural features, etc.).

→ VIEW & DISCUSS

Watch an aerial view of Confederation Bridge.

∞ Video Link: Above PEI: Confederation Bridge

- Using Google Maps, find a place you know that is approximately 13km from your house. That is the length of the Confederation Bridge! Can you imagine driving across a bridge that long?

WEEK 5 20m Geography: Grade 3 (Canada) - Lesson 9

Prince Edward Island, cont.

Materials: The Kids Book of Canada, geography journal

PREP: Print the flag of Prince Edward Island.

∞ Image Link: Colouring Book of Flags: Canada

→ RECAP

What did you learn about Prince Edward Island in the previous lesson?

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

→ READ, NARRATE, & DISCUSS

p.42-43 "Every year tourists" - "Prince Edward Island."

→ MAP WORK

Colour the flag of Prince Edward Island and add it to your geography journal.

- Spend some time today entering an item of interest into your Picture Timeline. Students could also continue to decorate their map of Prince Edward Island.

WEEK 5 20m Geography: Grade 3 (Canada) - Lesson 10

Prince Edward Island, cont.

Materials: My Canada, geography journal

→ RECAP

What did you learn about Prince Edward Island in the previous lesson?

→ VIEW & DISCUSS

Prince Edward Island map in My Canada (pages not numbered)

→ MAP QUESTIONS

1. What are some of the animals that live on Prince Edward Island? How many different ones can you find?
2. Can you find any National Parks on Prince Edward Island?
3. What are some of the historical sites or museums that you can find?
4. Looking at the images, what are some activities that people might like to do on Prince Edward Island?
5. Each map in this book has a symbol in the corners. Can you find Prince Edward Island's? Do you know why it might have been chosen?

→ MAPPING ACTIVITY

Spend today's lesson learning more about Prince Edward Island or any of the other provinces: check out some Extra Helpings, look up additional images, or add some more detail to your maps. Today would also be a great day to check out a local landmark or take a nature walk!

• EXTRA HELPING

Visit the unique houses made entirely from glass bottles.

∞ **Video Link:** What's It Like to Visit the Bottle Houses on Prince Edward Island

Learn more about what makes some sand "sing," and what it sounds like!

∞ **Link:** Where are the Singing Sands?

Discover the wonders of PEI National Park.

∞ **Video Link:** 10 Wonders of PEI National Park

Take a virtual tour of the Confederation Trail, which spans one side of the island to the other. ∞ **Video Link:** Beautiful cycling routes: The Confederation Trail, Prince Edward Island

Meet a Christmas cactus from Beaconsfield Historic House that is nearly 150 years old!

∞ **Video Link:** Why this Christmas cactus still blooms after nearly 150 years

≈ GATHER SUPPLIES

Look ahead to the next two lessons to ensure that you have clay prepared.

• TAKE A GEOGRAPHY WALK

Pay attention to topography on your walk, noticing elevation changes.

WEEK 6 20m Geography: Grade 3 (Canada) - Lesson 11

Contour Map

Materials: clay or homemade dough (see Geography Models in the Appendix for link to make dough and recommendation for clay), dental floss

PREP: Read about how to Create a Contour Map on Education.com. Prepare to narrate during Model section.

∞ **Link:** Create a Contour Map

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

→ INTRO

We are going to do a lesson in topography today. What do you already know (if anything) about topography?

→ MODEL

1. Read the description of contour maps and narrate what else you have learned while referring to the two images of Half Dome from the website.
2. How would you make a map of a mountain? Could you show how steep it is in different places?
3. Using dough or clay, make your own mountain, being sure to make it with variable heights (peaks).

→ MAP QUESTIONS

📄 Map Resource: your contour map

Looking at your contour map, answer the following questions.

1. What did you notice?
2. What is the steepest area?
3. How close are the lines in that area?
4. Was there a certain area of the model that was difficult to work?
5. If so, what made that area difficult?

WEEK 6 📅 20m Geography: Grade 3 (Canada) - Lesson 12

Contour Map with Colour

📄 Materials: clay or homemade dough (see Geography Models in the Appendix for link to make dough and recommendation for clay), paint, paintbrush, dental floss, ruler

→ INTRO

We are going to do another lesson in topography today. This time we will add colour.

→ MODEL

1. Refer, if necessary, to the Create a Contour Map link.
∞ Link: Create a Contour Map
2. Make a new mountain with multiple peaks.
3. Use the same technique to separate the heights.
4. Once your levels are separated, use paint or food colouring to colour each layer a different colour. Make a key showing which heights are which colours.
5. Replace the levels, and you can see which colours represent the highest and lowest points (elevations) of your mountain and valley model.
6. Now you have created an elevation map, not just a topographic map.

→ VIEW & DISCUSS

Look at the linked Elevation Map of Canada.

∞ Map Link: Elevation Map of Canada

1. What colours did they use for the lowest and highest elevations?
2. Your model had heights divided every inch. How does that compare with this map?

WEEK 7 📅 20m Geography: Grade 3 (Canada) - Lesson 13

Model of British Columbia and Alberta

📄 Materials: materials for model and Geography Models Resource found in the Appendix

→ INTRO

Today, we will make a model of British Columbia and Alberta, using elevation maps as a guide. We have a different elevation map to look at today.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

→ MAP QUESTIONS

∞ Map Link: Topography of Canada

1. Zoom in to see British Columbia and Alberta close up.
2. What differences do you notice between the two provinces?
3. Where are the mountains located? (British Columbia and western Alberta)
4. Using the color ramp (key), what is the difference in height of eastern British Columbia compared with western Alberta? (Depending on where you look, over around 4000 metres!)
5. Where are the highest points? The lowest points?

→ MODEL

We are going to make a 3-dimensional map (model) of British Columbia and Alberta together. You have two lessons to build it. Follow instructions in the Appendix for making a basic model, using the Topography of Canada map as a guide.

→ NOTE

Make it in the shape of the two provinces together, and use a tool to draw the boundary between British Columbia and Alberta. Be mindful of the lowest areas by making them thinner, but don't worry about adding the mountainous regions because that will be done in the next lesson.

WEEK 7 □ 20m Geography: Grade 3 (Canada) - Lesson 14

Model of British Columbia and Alberta, cont.

□ Materials: materials for model and Geography Models in the Appendix

→ MODEL

We are going to finish the 3-dimensional map (model) of British Columbia and Alberta.

1. Follow instructions for making a basic model, using the Topography of Canada map as a guide.
2. Place a picture of your finished raised relief map in your geography journal as a memento.

WEEK 8 □ 20m Geography: Grade 3 (Canada) - Lesson 15

Rain and Thunderstorms

□ Materials: none

→ INTRO

Do you have thunderstorms where you live?

→ MAP QUESTIONS

∞ Map Link: Average Annual Precipitation, by ecoprovince

An ecoprovince is an area with a consistent climate, topography, and regional landforms.

1. What areas of Canada get the most precipitation? What areas get the least precipitation? Can you identify a pattern?
 2. Locate where you live. What is the name of your ecoprovince?
 2. Identify rainfall averages for your area.
 3. Compare rainfall averages in your area to those in other parts of the country.
 4. Using a weather app, or Environment Canada's website (see today's Quicklinks), find out if there is any place in Canada where it is raining or snowing today. If you have time, you could use this information to make a weather map for today on a blank map of Canada.
- ∞ Link: Canadian Weather: Current Conditions

→ VIEW

★ TEACHER TIP

Review next lesson in advance to prepare for the outing and activity.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

Here is a cumulonimbus diagram showing how (thunderstorm) clouds form.

∞ Link: Cumulonimbus Diagram

WEEK 8 20m Geography: Grade 3 (Canada) - Lesson 16

Local Stream

📄 Materials: See prep instructions below, geography journal

PREP: Choose a local stream/creek/river to visit for the focus of this lesson. During Term 3, there are more lessons on rivers, but this will be an introduction.

For the afternoon occupation, you will need the following items: two pieces of cork or some other floating object, a timer that can time by the second, and a map that includes the waterway you visit.

→ MAP QUESTIONS

📄 Map Resource: Find the creek or river you will be visiting (during the afternoon occupation) on Google Maps or a paper map. Some of the following questions may need to wait until after you have visited your body of water.

1. Locate where you will visit the waterway on the map.
2. Using the map, follow the waterway upstream to its source/head. How far away is it? Is it close enough to visit?
3. Using the map, follow the waterway to its mouth. How far away is it? Is it close enough to visit?
4. Which direction does the waterway flow where you visited? Which general direction does it flow? What large body of water does it empty into?

→ MAP WORK

📄 Map Resource: blank map of your province or territory

∞ Map Link: Outline Maps of Canada and Provinces

1. Draw the waterway you want to visit on your blank map. You may not be able to draw the head and mouth on this map, but draw what part of it is in your province or territory.
2. Indicate the flow of the water with arrows.
3. Label the name(s) of the waterway. (The name may change as it joins other watercourses.)

• TAKE A GEOGRAPHY WALK

Go for a walk near a creek or river.

Try to find two spots on the creek/river where the water seems to move at different speeds. At each one, measure a distance of say 12 feet, and time how long it takes for a piece of cork or some other floating object to go the full 12 feet. Compare the speeds; were they different? If so, why?

Record your findings in your Geography Journal.

WEEK 9 20m Geography: Grade 3 (Canada) - Lesson 17

Newfoundland & Labrador

📄 Materials: The Kids Book of Canada, geography journal

PREP: (Optional) Print off a blank map of Newfoundland & Labrador for more detailed mapping.

∞ Map Link: Outline Maps of Canada and Provinces (These maps have rivers and lakes.)

∞ Map Link: Completely Blank Map of Newfoundland & Labrador

→ INTRO

For the next few lessons, we will learn more about the province of Newfoundland & Labrador.

→ MAP QUESTIONS

∞ Map Link: Map of North America

What bodies of water form natural borders for Newfoundland & Labrador? (Labrador Sea, North Atlantic Ocean, Gulf of St. Lawrence)

📄 Map Resource: The Kids Book of Canada "Canada" p.4-5

1. Find the province of Newfoundland & Labrador on the map. What does it border? (Québec)

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

2. How many different geographical regions do we find in Newfoundland & Labrador? Each one has a number and a separate colour. (There are two: the Hudson Bay Lowland and the Boreal Forest.)
3. From these regions, what might the climate be like in different parts of Newfoundland & Labrador? Where else are these regions found in Canada?

→ READ, NARRATE, & DISCUSS

p.44-45 "Canada's most easterly" - "soil for farming."

→ MAP WORK

□ Map Resource: My Map of Canada

1. Label Newfoundland & Labrador.
2. Label St John's with a star to show it is a capital city.
3. Label the Strait of Belle Isle and Labrador Sea.
4. Draw in and label any other features or illustrations of interest (bodies of water, cities, landmarks, natural features, etc.).

WEEK 9 □ 20m Geography: Grade 3 (Canada) - Lesson 18

Newfoundland and Labrador, cont.

□ Materials: The Kids Book of Canada

→ RECAP

What did you learn about Newfoundland and Labrador in the previous lesson?

→ READ, NARRATE, & DISCUSS

p.46-47 "The hydroelectric station" - "hope for the future."

- Spend some time today entering an item of interest into your Picture Timeline. Students could also continue to decorate their map of Québec.

WEEK 10 □ 20m Geography: Grade 3 (Canada) - Lesson 19

Newfoundland and Labrador, cont.

□ Materials: My Canada, Canada Wild

→ RECAP

What did you learn about Newfoundland and Labrador in the previous lesson?

→ VIEW & DISCUSS

Newfoundland and Labrador map in My Canada (pages not numbered)

→ MAP QUESTIONS

1. What are some of the animals that live in Newfoundland and Labrador? How many different ones can you find?
2. Can you find any National Parks in Newfoundland and Labrador? What about museums or historic sites?
3. Looking at the images, what are some activities that people might like to do in Newfoundland and Labrador?
4. Each map in this book has a symbol in the corners. Can you find Newfoundland and Labrador's? Do you know what that is, and why it might have been chosen?

→ READ, NARRATE, & DISCUSS

p.26-29 "Newfoundland Pine Marten" - "trap a marten."

→ ILLUSTRATE (OPTIONAL)

Draw a Newfoundland pine marten or a puffin using watercolours or another medium such as chalk, pastels, or crayons.

• EXTRA HELPING

Visit with puffins along the eastern coast of Newfoundland
∞ **Video Link:** Atlantic Puffins in Elliston, Newfoundland and Labrador

See footage of Terry Fox setting out on his Marathon of Hope in 1980 from St. John's, Newfoundland.

∞ **Video Link:** Terry Fox in St. John's, Newfoundland on April 12th, 1980 (stop at 5:13)

Watch a dramatization of Guglielmo Marconi hearing a transatlantic radio message for the very first time.

∞ **Video Link:** Heritage Minutes: Marconi

Observe a Newfoundland pine marten in its natural habitat!
∞ **Video Link:** Trailcam Captures Rare Footage of Newfoundland Pine Marten

Visit Port Au Port, a francophone region of Newfoundland with a

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

distinct culture from its Acadian, Mi'kmaq, and French heritage.
∞ **Video Link:** Port-au-Port, Terre-Neuve-et-Labrador

WEEK 10 20m Geography: Grade 3 (Canada) - Lesson 20

Newfoundland and Labrador, cont.

📄 **Materials:** My Canada, The Kids Book of Canada, geography journal

PREP: Print the flag of Newfoundland and Labrador.

∞ **Image Link:** Colouring Book of Flags: Canada

→ MAP WORK

Colour the flag of Newfoundland and Labrador and add it to your geography journal.

→ MAPPING ACTIVITY

Spend today's lesson learning more about Newfoundland and Labrador or any of the other provinces: check out some Extra Helpings, look up additional images, or add some more detail to your maps. Today would also be a great day to check out a local landmark or take a nature walk!

WEEK 11 20m Geography: Grade 3 (Canada) - Lesson 21

Rivers

📄 **Materials:** geography journal

→ INTRO

What is the difference between a lake and a river? How can you tell something is a river?

→ MAP QUESTIONS

📄 **Map Resource:** Interactive Map: Canada's Ocean, Freshwater, and Us
Spend some time exploring this map, using the legend for guidance. You could try the interactive quiz with your child/student, and/or use the following questions for guidance.

1. What do you notice about the way water moves in Canada?
2. What are some of the bodies of water that the rivers most commonly drain into?
3. What do you notice about how water flows through the Rocky Mountains?
4. Follow one of Canada's major rivers (Mackenzie River, Yukon River, Fraser River, Columbia River, Churchill River, Athabasca River, etc.) to see where it empties.
5. How does water move through the Great Lakes system?
6. What other bodies of water empty into the St. Lawrence River? Smaller bodies of water that feed into a bigger body of water are called tributaries.
7. Find where you live on the map. What are some rivers near where you live?

→ MAP WORK

📄 **Map Resource:** My Map of Canada (or individual provincial maps)
Add some of the rivers you learned about today.

★ TEACHER TIP

Review next lesson in advance to prepare for the activity.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 1

WEEK 11 ☐ 20m Geography: Grade 3 (Canada) - Lesson 22

Deltas and Modeling

☐ Materials: My Canada; see Map Work section below, and gather what you need to make a delta.

→ MAP QUESTIONS

☐ Map Resource: My Canada (British Columbia map)

1. What is the geographic name for the area where a river joins a slower-moving body of water, such as a lake, ocean, or other river? (a river delta)
2. On the map of BC, find where the Fraser River meets the ocean. If that's where it empties, where does it begin? Follow the river upstream from the delta to where it begins—its source. (the Rocky Mountains)
3. We are going to do an activity to explain what a delta is.

→ MAP WORK

Model: Make a delta.

1. This can be done in a variety of ways, depending on what you have available. (It can be as simple as a pile of dirt or sand in the backyard with a hose, or you can build a model in a large pan or deep cookie sheet using dirt, sand, and a pitcher of water.)
 2. What is important is a visual of how water brings the sediment downstream and deposits it at the end of the model river.
 3. You probably don't have access to a stream table like the one in the video, but you can see a time-lapse of the creation of a stream, water running down the table, and creating a delta.
- ∞ Video Link: River Stream Table Time-lapse

WEEK 12 ☐ 20m Geography: Grade 3 (Canada) - Lesson 23

Exam Week

→ EXAMS

Answer question(s) related to course.

Questions will come from:
The Kids Book of Canada
My Canada

WEEK 12 ☐ 20m Geography: Grade 3 (Canada) - Lesson 24

Exam Week

→ EXAMS

Answer question(s) related to course.

Questions will come from:
Canada Wild

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

WEEK 1 20m Geography: Grade 3 (Canada) - Lesson 25

Scale

Materials: globe or wall map, My Canada, My Map of Canada

→ MAP QUESTIONS

Concept: Scale

1. What is scale? (Based on previous knowledge, you may mention the bar or line on the map used to measure distance. Let's call that a map scale.)
2. Open your left hand and stretch out your left arm as far as you can. Now study your left palm for a few seconds from that distance.
3. Place your left palm just inches from your nose, close enough that you can still focus on it. Study the palm in this position for a few seconds, too.
4. Both hand positions represent geographic scale. Another way to describe it is geographic extent. When the hand was far away, it looked smaller, but you saw the full extent of the hand; this is called small scale. When the hand was closer, you may have seen less of the hand, but the hand itself looked larger—large scale. Now let's apply this concept to maps!

Map Resource: a globe or wall map

1. Locate Canada.
2. Look for rivers in Canada.
3. Locate New Brunswick.
4. Look for rivers in New Brunswick.

Map Resource: The Kids Book of Canada "New Brunswick" p.32-33

1. Now, how many rivers can you locate in New Brunswick?
2. What changed as we worked our way from small-scale maps to large-scale maps? (The small-scale maps showed larger geographic extents and large real-world features, but they also represented those features as small and with fewer details. The large-scale maps showed smaller areas and more real-world features, and they also represented those features as larger and with more details.)
3. This activity can also be done with Google Maps, starting with a view of the whole world, then zooming in closer and watching more and more geographical features appear.

Map Resource: Globe or World Wall Map
Find large rivers on each continent. Name them.

WEEK 1 20m Geography: Grade 3 (Canada) - Lesson 26

Railroads

Materials: The Kids Book of Canada

PREP: Print the map of Southern Ontario for today's lesson.

→ INTRO

Have you ever seen a train stopped at a railroad crossing? Have you ever wondered what the train was carrying? Have you ever travelled by train?

→ READ, NARRATE, & DISCUSS

p.11 "In 1871" - "Vancouver was bustling."

• EXTRA HELPING

One of the most famous historical Canadian photographs is of Sir Donald Smith hammering in the last spike to mark the completion of the railroad on November 7, 1885. However, one surprising feature of the photograph is the inclusion of a boy directly behind Smith. Read more about his story and fascinating life.

∞ Article Link: The Kid in The Last Spike

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

- What do you think it meant for Canada to have a railway that went from the Pacific to the Atlantic Ocean? Why do you think British Columbia only agreed to join Canada once it received the promise of the railway?

→ VIEW & DISCUSS

∞ Map Link: Southern Ontario Map

1. Locate the scale on the map.
2. Mark on your ruler how far 80 kilometers is. (almost 3 centimeters or approximately 1¼ inches)
3. Locate Toronto and Kingston. Let's use our ruler and measure how far apart these two cities are from each other. How far is that? (6 inches)
4. We know the cities are farther apart than 6 inches, so an adult may need to help you calculate how many miles the 6 inches on the map represent. (In order to calculate how far away Kingston is from Toronto, divide 6 by 1¼, and then multiply by 50 to get 240 miles.)
5. Can you use the same method to figure out how far Toronto is from Ottawa? You may need to use a piece of string to track the route, then measure the distance.

→ ACTIVITY

You are going to plan a train trip across Canada! First, look at the following map of Canada's railway system.

∞ Map Link: National Railway Network

What do you notice about this map? What questions do you have? If you'd like, you can use the scale to get a rough estimate of how long Canada is from coast to coast.

Next, explore the routes travelled by VIA Rail, Canada's passenger train system.

∞ Link: Explore Canada: Train Map & Routes

What station is nearest to where you live? How many different trains would you need to take to travel to Ottawa? To Vancouver? To Halifax? Can you plan a journey that would require the most trains? What journey could you take that would only need one train?

WEEK 2 20m Geography: Grade 3 (Canada) - Lesson 27

Population

📄 Materials: none

→ MAP QUESTIONS

📄 Map Resource: Canada Population Density

∞ Map Link: Canada Population Density

While this map is from 2006, and population numbers have changed across Canada, trends of population density (numbers of people per square kilometer) are fairly constant.

1. Review the map key. What do the different colours tell you?
2. Find approximately where you live. What is the population density there? Are you from a small town/city? Do people live far apart or near each other?
3. Which city shown on this map is close to where you live? What is its urban area population?
4. Where are the areas with the largest population density?
5. What does the square point symbol mean, according to the urban area population map key? (It will be acceptable to think the symbol represents a city with 500,000 people or greater.)
6. How much of Canada has population densities of below 1? (White and yellow areas—mostly in the north. Students should notice how the population density is highest near the U.S. border.)
7. Have you ever taken a long car trip? What does low population density look like? (Houses are spread farther apart.)
8. Name three urban areas with a population of 500,000 or greater that

★ TEACHER NOTE

PREP for next lesson: Locate the local or street map of your area used in Term 1.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

aren't capitals. (Montreal, Calgary, Vancouver)

9. Name five urban areas with populations between 5,000 and 24,999—the circle symbol.

10. Now, find approximately where you live. What is the population density there? Are you from a small town/city? Do people live far apart or near each other?

11. Which city shown on this map is close to where you live? What is its urban area population?

→ MAP WORK

📄 Map Resource: My Map of Canada

Look up the current population of Canada and add the figure to your map.

WEEK 2 📅 20m Geography: Grade 3 (Canada) - Lesson 28

Your Town

📄 Materials: street map of your area (from previous lesson)

→ MAP QUESTIONS

📄 Map Resource: a map of your city, either a hard copy or a digital version

1. Locate your street. (A parent will probably need to help.) Can you locate your home on this map?

2. Do you live within the city limits?

3. Locate any parks or outdoor areas in your city. What direction would you travel to get there? Are there any within walking distance from your home?

4. Do you have a downtown or city centre? If so, what direction would you travel from your home to get there?

5. Locate your local seat of government—city hall, town hall, or municipal building. Do you live north, south, east, or west of it?

6. How are the streets laid out in your city? Is any portion of your city laid out in a grid? (Older areas may utilize the grid; newer sections may utilize cul-de-sacs; and other patterns like loop roads and diagonals may be used.)

7. If so, in what direction do the streets run? (north-south, east-west, etc.)

8. What are the streets named in this area? Do you see any “streets,” “avenues,” or “lanes”? What other street types (e.g., way, court, parkway) can you find? Is there a pattern for when these names are used (such as cul-de-sacs being “courts”)?

9. Are there differences in the way streets are laid out near the center city compared to near your home?

10. Look for familiar places (grocery stores you go to, places of worship, friends' homes, etc.). How would you travel there from your home?

11. Choose one of the familiar places you found, and find at least 2 different routes to travel there from your home. Which one do you think is faster?

→ NOTE

Keep the street map for the next lesson. Pay attention on walks/rides this week, noting things you saw on the map, or answering questions that came up during the map exercises.

WEEK 3 📅 20m Geography: Grade 3 (Canada) - Lesson 29

Your Town

📄 Materials: street map of your area (from previous lesson)

→ MAP QUESTIONS

📄 Map Resource: a map of your city, either a hard copy or a digital version

1. Locate your street.

2. Locate your local police department, fire station, and hospital. How would you travel there from your home?

3. Do you have more than one police station, fire station, or hospital? If so,

Term 2

- mark where they are located. Are they close to each other or far apart? What do you notice about how they are spaced?
4. Can you find any bodies of water or watercourses? (oceans, lakes, reservoirs, ponds, wetlands, rivers, streams, creeks, and so forth)
 5. Using the scale, estimate the distance of the closest water feature to your house. How far is it? Could you walk there? Drive there? How long would it take?
 6. How many bodies of water are there in your city?
 7. If your map shows physical features, can you tell which direction the rivers, streams, or creeks run? Do they all flow in the same direction?
 8. Can you see smaller tributaries that flow into larger ones?
 9. What is the largest body of water in your city?

WEEK 3 20m Geography: Grade 3 (Canada) - Lesson 30

Yukon

Materials: The Kids Book of Canada, geography journal

PREP: (Optional) Print off a blank map of Yukon for more detailed mapping.

∞ Map Link: Outline Maps of Canada and Provinces (These maps have rivers and lakes.)

∞ Map Link: Completely Blank Map of Yukon

→ INTRO

The next two weeks will be spent learning about the Yukon Territory.

→ MAP QUESTIONS

Map Resource: The Kids Book of Canada "Canada" p.4-5

1. What province did you learn about last? (Newfoundland and Labrador) Find the Yukon Territory on the map. What direction would you need to travel from Newfoundland to get there? (northwest)
2. What does it border? (British Columbia and the Northwest Territories, also Alaska, U.S.A. —but this isn't shown on the map)
3. What ocean is on its coast? (Beaufort Sea - Arctic Ocean)
4. How many different geographical regions do we find in the Yukon Territory? Each one has a number and a separate colour. (There are two: the Western Cordillera and a tiny bit of Taiga.)
5. From this region, what might the climate be like in Yukon?

→ READ, NARRATE, & DISCUSS

p.48-49 "Yukon Territory" - "St. Elias Range."

→ MAP WORK

Map Resource: My Map of Canada

1. Label Yukon.
2. Label Whitehorse with a star to show it is a capital city.
3. Label the Beaufort Sea.
4. Label the line of the Arctic Circle. Discuss what the Arctic Circle is (see the sidebar on p.49).
5. Draw and label the Yukon River.
6. Draw in and label any other features or illustrations of interest (bodies of water, cities, landmarks, natural features, etc.).

WEEK 4 20m Geography: Grade 3 (Canada) - Lesson 31

Yukon, cont.

Materials: The Kids Book of Canada

→ RECAP

What did you learn about Yukon in the previous lesson?

→ READ, NARRATE, & DISCUSS

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

p.50-51 "During the Gold Rush" - "in the territory."

- Spend some time today entering an item of interest into your Picture Timeline. Students could also continue to decorate their Yukon map.

WEEK 4 20m Geography: Grade 3 (Canada) - Lesson 32

Yukon, cont.

Materials: My Canada, Canada Wild

→ RECAP

What did you learn about Yukon in the previous lesson?

→ VIEW & DISCUSS

Yukon map in My Canada (pages not numbered)

→ MAP QUESTIONS

1. What are some of the animals that live in Yukon? How many different ones can you find?
2. Can you find any National Parks in Yukon? What about some museums or historical centres?
3. Looking at the images, what are some activities that people might like to do in Yukon?
4. Each map in this book has a symbol in the corners. Can you find Yukon's? Do you know what that is, and why it might have been chosen?

→ READ, NARRATE, & DISCUSS

p.38-41 "Collared Lemming" - "as the skua."

→ ILLUSTRATE (OPTIONAL)

Draw a collared lemming using watercolours or another medium such as chalk, pastels, or crayons.

• EXTRA HELPING

Explore Yukon's beauty from above.

∞ **Video Link:** Drone Shots of the Yukon Wilderness

Did you know Canada is home to a tiny desert in Yukon's cold climate?

∞ **Video Link:** The world's smallest desert is in Canada

Watch a time-lapse video of a full night of beautiful northern lights.

∞ **Video Link:** Northern Lights & Aurora Borealis, Whitehorse, Yukon, Canada - March 31, 2024

Discover Canada's most unusual forest - made entirely of signposts!

∞ **Link:** Take a trip around the world in the Sign Post Forest

∞ **Video Link:** Alaska Highway - Sign Post Forest

WEEK 5 20m Geography: Grade 3 (Canada) - Lesson 33

Yukon, cont.

Materials: My Canada, The Kids Book of Canada, geography journal

PREP: Print the flag of Yukon.

∞ Image Link: Colouring Book of Flags: Canada

→ MAP WORK

Colour the flag of Yukon and add it to your geography journal.

→ MAPPING ACTIVITY

Spend today's lesson learning more about Yukon or any of the other provinces and territories: check out some Extra Helpings, look up additional images, or add some more detail to your maps.

Today would also be a great day to check out a local landmark or take a nature walk!

WEEK 5 20m Geography: Grade 3 (Canada) - Lesson 34

Capitals

Materials: My Canada, geography journal

PREP: Print five copies of the blank Canada Map to use throughout the remainder of the course.

∞ Map Link: Canada Map

→ INTRO

Ask students if they have ever ridden in a car to a different province or

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

territory. What did the boundary line look like?

→ MAP QUESTIONS

📄 Map Resource: My Canada

1. Locate provincial and territorial capitals.
2. What symbol represents a provincial or territorial capital? (a star)
3. What symbol represents the national capital? (a star within a circle)

→ MAP WORK

📄 Map Resource: Canada Map

Label as many provinces and territories as you can, and also add the capitals if you can. This map also has blank circles for other non-capital cities, so students can also look at the individual maps in My Canada to fill in this information. Add this map to your geography journal.

WEEK 6 📅 20m Geography: Grade 3 (Canada) - Lesson 35

Northwest Territories

📄 Materials: The Kids Book of Canada, geography journal

PREP: (Optional) Print off a blank map of the Northwest Territories for more detailed mapping.

∞ Map Link: Outline Maps of Canada and Provinces (These maps have rivers and lakes.)

∞ Map Link: Completely Blank Map of the Northwest Territories

→ INTRO

For the next few lessons, we will learn more about the Northwest Territories.

→ MAP QUESTIONS

📄 Map Resource: The Kids Book of Canada "Canada" p.4-5

1. Find the Northwest Territories on the map. What does it border? (Yukon, Nunavut, British Columbia, Alberta, and Saskatchewan. It also borders the Beaufort Sea - Arctic Ocean to the north.)
2. How many different geographical regions do we find in the Northwest Territories? Each one has a number and a separate colour. (There are three: the Western Cordillera, Tundra, and Taiga.)
3. From these regions, what might the climate be like in different parts of the Northwest Territories?

4. What do you notice about the border between the Northwest Territories, Nunavut, Saskatchewan, and Manitoba? (The four corners meet.)

• An obelisk monument was placed at the site that would eventually become Canada's four corners by a survey crew in 1962. At that time, it marked the intersection of Saskatchewan, Manitoba, and the Northwest Territories.

∞ Map Link: Canada's "four corners" map

∞ Image Link: Survey crew photographed after installing monument, April 6, 1962

→ READ, NARRATE, & DISCUSS

p.52-53 "The Northwest Territories" - "lakes and rivers."

→ MAP WORK

📄 Map Resource: My Map of Canada

1. Label the Northwest Territories.
2. Label Yellowknife with a star to show it is a capital city.
3. Label Great Bear Lake and Great Slave Lake.
4. Trace the treeline, an imaginary boundary beyond which it is too cold for trees to grow.
5. Trace the Arctic Circle, and ask your student if they remember what it signifies.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

5. Draw in and label any other features or illustrations of interest (mountain ranges, bodies of water, cities, landmarks, natural features, etc.).

WEEK 6 20m Geography: Grade 3 (Canada) - Lesson 36

Northwest Territories, cont.

Materials: The Kids Book of Canada

→ RECAP

What did you learn about the Northwest Territories in the previous lesson?

→ READ, NARRATE, & DISCUSS

p.54-55 "Pingos, cone-shaped mounds" - "development of the land."

• Spend some time today entering an item of interest into your Picture Timeline. Students could also continue to decorate their map of the Northwest Territories.

• EXTRA HELPING

Do you remember learning about river deltas a few weeks ago? The Mackenzie River has an enormous river delta—a triangle 190km long and 90km wide—that can be seen clearly from space.

∞ **Video Link:** Exploring Earth from Space: Mackenzie River, Canada

WEEK 7 20m Geography: Grade 3 (Canada) - Lesson 37

Northwest Territories, cont.

Materials: My Canada, Canada Wild

→ RECAP

What did you learn about the Northwest Territories in the previous lesson?

→ VIEW & DISCUSS

Northwest Territories map in My Canada (pages not numbered)

→ MAP QUESTIONS

1. What are some of the animals that live in the Northwest Territories? How many different ones can you find?
2. Can you find any National Parks in the Northwest Territories? What about some of the heritage sites and monuments?
3. Looking at the images, what are some activities that people might like to do in the Northwest Territories?
4. Each map in this book has a symbol in the corners. Can you find the Northwest Territories' symbol? Do you know what that is, and why it might have been chosen?

→ READ, NARRATE, & DISCUSS

p.46-49 "Wood Bison" - "ice on rivers."

→ ILLUSTRATE (OPTIONAL)

Draw a wood bison or another arctic animal using watercolours or another medium such as chalk, pastels, or crayons.

• EXTRA HELPING

Learn more about how arctic cotton grass survives in such a harsh climate.

∞ **Video Link:** Arctic Cotton Grass

Take a trip to the annual Snowking festival in Yellowknife!

∞ **Article Link:** In pictures: Snowking XXXI officially opens on Yellowknife Bay

Watch a timelapse video of the ice breakup on the Mackenzie River in the spring.

∞ **Video Link:** Inuvik Mackenzie River Breakup 2020 Timelapse

Tour the beautiful Our Lady of Victory Church in Inuvik.

∞ **Link:** The Igloo Church in Inuvik, NWT

Visit the isolated Aulavik National Park on Banks Island. (Please note: sensitive children may wish to skip this video, as there are several scenes with animal skulls and bones.)

∞ **Video Link:** Explore Aulavik National Park

WEEK 7 20m Geography: Grade 3 (Canada) - Lesson 38

Northwest Territories, cont.

Materials: My Canada, The Kids Book of Canada, geography journal

PREP: Print the flag of the Northwest Territories.

∞ **Image Link:** Colouring Book of Flags: Canada

→ MAP WORK

Term 2

Colour the flag of the Northwest Territories and add it to your geography journal.

→ MAPPING ACTIVITY

Spend today's lesson learning more about the Northwest Territories or any of the other provinces and territories: check out some Extra Helpings, look up additional images, or add some more detail to your maps. Today would also be a great day to check out a local landmark or take a nature walk!

WEEK 8 20m Geography: Grade 3 (Canada) - Lesson 39

Model of Mountain Landscape

📋 Materials: materials for model, and Geography Models Document in Appendix

PREP: Students are building a mountain landscape out of clay. The landscape must be big enough for students to observe water flowing down slopes, valleys, and rivers in the next lesson.

→ MODEL

1. Follow instructions for making a basic model.
2. Your landscape should include: mountains, valleys, canyons, rivers, and a large body of water (lake, sea, or ocean).
3. After it has dried, paint the model to help seal the clay. (There is a lesson dedicated to painting the model next week.)

WEEK 8 20m Geography: Grade 3 (Canada) - Lesson 40

Nunavut

📋 Materials: The Kids Book of Canada, geography journal

PREP: (Optional) Print off a blank map of Nunavut for more detailed mapping.

- ∞ Map Link: Outline Maps of Canada and Provinces (These maps have rivers and lakes.)
- ∞ Map Link: Completely Blank Map of Nunavut

→ INTRO

For the next two weeks, we will learn more about the territory of Nunavut.

→ MAP QUESTIONS

- ∞ Map Link: Map of North America
- What bodies of water form natural borders for Nunavut? (Hudson Bay, Labrador Sea, David Strait, Baffin Bay, the Arctic Ocean)

Nunavut also has two unique land borders on tiny islands: on Killiniq Island, there is a border between Nunavut and Newfoundland and Labrador, and on Hans Island, there is an international border between Nunavut (Canada) and Greenland (Denmark).

- ∞ Map Link: Map of Killiniq Island
- ∞ Map Link: Map of Hans Island

📋 Map Resource: The Kids Book of Canada "Canada" p.4-5

1. Find the province of Nunavut on the map. What else does it border? (the Northwest Territories and Manitoba)
2. How many different geographical regions do we find in Nunavut? Each one has a number and a separate colour. (There are three: Tundra, Taiga, and the Hudson Bay Lowland.)
3. From these regions, what might the climate be like in different parts of Nunavut?

→ READ, NARRATE, & DISCUSS

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

p.56-57 "Nunavut, which means 'our land'" - "trees to grow."

→ MAP WORK

📄 Map Resource: My Map of Canada

1. Label Nunavut.
2. Label Iqaluit with a star to show it is a capital city.
3. Label the Arctic Circle, Ellesmere Island, and Baffin Island.
4. Draw in and label any other features or illustrations of interest (bodies of water, cities, landmarks, natural features, etc.).

WEEK 9 📅 20m Geography: Grade 3 (Canada) - Lesson 41

Nunavut, cont.

📄 Materials: The Kids Book of Canada

→ RECAP

What did you learn about Nunavut in the previous lesson?

→ READ, NARRATE, & DISCUSS

p.58-59 "Inuksuit, stone towers" - "running of the territory."

- Spend some time today entering an item of interest into your Picture Timeline. Students could also continue to decorate their map of Nunavut.

WEEK 9 📅 20m Geography: Grade 3 (Canada) - Lesson 42

Model with Mountains and Rivers

📄 Materials: completed model, watering can, geography journal

PREP: Note If the painted model is not dry, you may do this lesson during an afternoon later in the week. The model has to be dry and sealed with paint for it to work at its best. You may even continue the project during your assessment week.

→ MODEL

1. By now, your landscape should be formed and painted.
2. If your mountain model is thoroughly dry, you may use a watering can to rain on your landscape. Notice where the water runs, and where it gathers. Did it do what you expected?

→ ACTIVITY

Write an account of your rain test and draw a picture of your model in your geography journal.

→ MAP QUESTIONS

📄 Map Resource: British Columbia map in My Canada (pages not numbered)

1. Rivers empty into larger bodies of water, and most of the largest rivers flow into an ocean. If you look at the map of British Columbia, can you guess where some rivers may begin? (in higher elevations or mountains)

📄 Map Resource: Longest Rivers in Canada

∞ Map Link: Longest Rivers in Canada

2. Now, if you look only at this map, and you know that a river empties into a larger body of water like a bay or ocean, where would you guess the mountains would be on this map? (Where those rivers begin.)

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

WEEK 10 20m Geography: Grade 3 (Canada) - Lesson 43

Nunavut, cont.

Materials: My Canada, Canada Wild

→ RECAP

What did you learn about Nunavut in the previous lesson?

→ VIEW & DISCUSS

Nunavut map in My Canada (pages not numbered)

→ MAP QUESTIONS

1. What are some of the animals that live in Nunavut? How many different ones can you find?
2. Can you find any National Parks in Nunavut? What about some of the museums or historical sites?
3. Looking at the images, what are some activities that people might like to do in Nunavut?
4. Each map in this book has a symbol in the corners. Can you find Nunavut's? Do you know what that is, and why it might have been chosen?

→ READ, NARRATE, & DISCUSS

p.34-37 "Peary Caribou" - "forage for food."

→ ILLUSTRATE (OPTIONAL)

Draw a Peary caribou or an arctic tern using watercolours or another medium such as chalk, pastels, or crayons.

• EXTRA HELPING

Learn more about caribou and reindeer.

∞ **Video Link:** What is the difference between caribou and reindeer?

Take a virtual tour of Nunavut!

How many different arctic animals can you spot?

∞ **Video Link:** Welcome to Nunavut

Watch of time lapse of the sun never setting on Ellesmere Island in July above the Arctic Circle.

∞ **Video Link:** Midnight Sun: Time Lapse on Ellesmere Island

Listen to Stan Rogers sing about the Northwest Passage. How many place names do you recognize?

∞ **Music Link:** Northwest Passage

The arctic tern is the animal with the longest migration—from the Arctic to Antarctica every single year! Watch the path of one such bird, tracked by scientists.

∞ **Video Link:** The Migration Route Of An Arctic Tern

WEEK 10 20m Geography: Grade 3 (Canada) - Lesson 44

Nunavut, cont.

Materials: My Canada, The Kids Book of Canada, geography journal

PREP: Print the flag of Nunavut.

∞ Image Link: Colouring Book of Flags: Canada

→ MAP WORK

Colour the flag of Nunavut and add it to your geography journal.

→ MAPPING ACTIVITY

Spend today's lesson learning more about Nunavut or any of the other provinces and territories: check out some Extra Helpings, look up additional images, or add some more detail to your maps. Today would also be a great day to check out a local landmark or take a nature walk!

WEEK 11 20m Geography: Grade 3 (Canada) - Lesson 45

Islands

Materials: world wall map or globe, My Canada, geography journal

→ MAP QUESTIONS

Map Resource: world wall map or globe

1. Locate your home on the globe.

★ TEACHER NOTE

For student(s) who did this exercise in Grade 2 Geography, try to find different islands, or perhaps smaller and harder to find islands this time.

• DEFINITIONS

isthmus, n.
a narrow strip of land with sea on

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 2

2. Locate the Equator. Do you live north or south of it?
3. Which continent do you live on?
4. Which ocean is closest to you?
5. What is an island? (a body of land surrounded by water)
6. Locate a very large island in the Atlantic Ocean. (The largest island is Greenland, which extends from the Arctic Ocean into the North Atlantic Ocean. Other islands are listed in the next question.)
7. Can you locate any more islands in the Atlantic Ocean? (Possibilities include Iceland, Ireland, Great Britain, Newfoundland, and the Falklands, among others.)
8. Some islands in the Pacific Ocean are isolated, while others exist in groups. Can you locate a group of islands in the Pacific Ocean? (Aleutian Islands, Hawaii, Galápagos Islands, Japan, Philippine Islands, Northern Mariana Islands, Marshall Islands, Micronesia, Solomon Islands, Cook Islands, French Polynesia, and New Zealand, among many others)
9. Can you locate standalone islands in the Pacific that are not part of a group? (This question is more of a scavenger hunt, and the student may only name Vancouver Island and Taiwan. Searching for individual islands in the Pacific Ocean makes it apparent that almost all islands in this ocean are part of a larger group.)
10. Can you find an isthmus on the world map or globe? (Two famous ones are the Isthmus of Panama and the Isthmus of Suez.)

🗺 Map Resource: Canada map in My Canada (pages not numbered)

11. What is an island close to you?
12. How many islands can you find on the east coast of Canada?
13. There are a lot of peninsulas in Canada. Can you find some of them? What about elsewhere in the world?
14. Can you find an archipelago (group of islands) in Canada? (Students should notice that Nunavut comprises an archipelago.) What about elsewhere in the world?

→ ACTIVITY

Write the definitions of archipelago, isthmus, and peninsula in your geography journal.

either side, forming a link between two larger areas of land.

peninsula, n.

From the Latin "paene insula," meaning "almost an island," the term means a piece of land that is mostly surrounded by water but connected to a larger landmass.

WEEK 11 🗓 20m Geography: Grade 3 (Canada) - Lesson 46

Catch-Up Day

→ CATCH UP

Use today to finish any work or walks from the term.

WEEK 12 🗓 20m Geography: Grade 3 (Canada) - Lesson 47

Exam Week

→ EXAMS

Answer question(s) related to course.

Questions will come from:

My Canada

Kids Book of Canada

WEEK 12 🗓 20m Geography: Grade 3 (Canada) - Lesson 48

Exam Week

→ EXAMS

Answer question(s) related to course.

Questions will come from:

Canada Wild

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

WEEK 1 20m Geography: Grade 3 (Canada) - Lesson 49

Sound Map

Materials: blank Canada Map

PREP: Print several copies of the Canada Map if you didn't already do this in Lesson 34.

∞ Map Link: Canada Map

→ INTRO

What sounds do you think you might hear in a forest?

→ LISTEN & DISCUSS

We are going to practice listening for a few minutes, and next lesson, we will make a sound map.

1. What different kinds of sounds do you hear in different rooms/areas of your home or school?
2. If your eyes were closed, do you think you would know which room you were in based just on the sounds?
3. Test your hearing sense by choosing to:
 - a. Close your eyes, have someone lead you to different rooms, and you guess which room you are in; OR
 - b. Have someone record sound for 15 seconds (on a phone or recorder of some type) in various rooms, play each one for you to hear, and you guess the respective room.
4. Draw pictures to represent each of the places you "heard."

→ MAP WORK

In the time remaining, see how many provinces, territories, capitals, and bodies of water your student can identify and label the Canada Map (parents/teachers can act as scribes for the spelling and writing).

★ TEACHER TIP

In two weeks, there will be three lessons dedicated to learning about your own local area. You may wish to gather library books in advance or make library research with your student part of the lessons.

WEEK 1 20m Geography: Grade 3 (Canada) - Lesson 50

Outdoor Sound Map

PREP: John Muir Laws has a Nature Journal Connection video about making sound maps. The video is 14 minutes long, so it may be good to watch it ahead of time and use the time today to do the actual sound map.

∞ Video Link: JML Sound Map

→ LISTEN & PRACTICE

1. Find a spot outside where you can listen. Take a paper and a pencil.
2. Face north and draw yourself or a symbol to represent yourself in the middle of your paper.
3. Spend time (per the video) listening.
4. Add to your map the sounds you hear.

WEEK 2 20m Geography: Grade 3 (Canada) - Lesson 51

Historical Maps

Materials: none

→ INTRO

The maps we use and are familiar with today are not the way maps have always looked. Today, we will look at pictures of several different maps from previous times in history. As you look at them, ask yourself questions such as: Who might this map have been made for? Could I use this map to find my way somewhere? What information is included, and what has been left out?

→ VIEW & DISCUSS

1. A T-O map (named for its shapes) divided the earth into Africa, Asia,

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

and Europe.

∞ Map Link: A T-O map from the Etymologies of Isidore of Seville, 10th century

2. This T-O map is more elaborate, showing Jerusalem at the centre, the Mediterranean Sea, and cardinal directions.

∞ Map Link: A T-O map from the 15th century

3. This map is the first to use the name "America" and to show America as separate from Asia.

∞ Map Link: Martin Waldseemuller Map of the known world, 1507

4. This is an early road map for travellers. Notice that each strip (reading from bottom to top) has its own compass rose and elaborate symbols to indicate what will be seen on the road. Look at the last strip—can you figure out how Ogilby shows whether the road is uphill or downhill?

∞ Map Link: John Ogilby's Britannia (1675), The Road from London to Bristol

WEEK 2 20m Geography: Grade 3 (Canada) - Lesson 52

Local Geography

Materials: geography journal

→ INTRO

In these next three lessons, choose some ways to learn more about your own local geography. Possible activities include:

- Borrow library books about your own province, region, or city.
- Explore the local history section of your local library. Many libraries and museums have permanent displays of local history.
- Learn more about a particular natural feature near where you live.
- Go on a nature walk near where you live.
- Make a detailed map of your town or neighbourhood.
- Spend extra time on the map of your own province or territory.
- Add additional information to your geography journal.

WEEK 3 20m Geography: Grade 3 (Canada) - Lesson 53

Local Geography, cont.

Materials: geography journal

→ INTRO

Continue learning more about your own local geography. Possible activities include:

- Borrow library books about your own province, region, or city.
- Explore the local history section of your local library. Many libraries and museums have permanent displays of local history.
- Learn more about a particular natural feature near where you live.
- Go on a nature walk near where you live.
- Make a detailed map of your town or neighbourhood.
- Spend extra time on the map of your own province or territory.
- Add additional information to your geography journal.

WEEK 3 20m Geography: Grade 3 (Canada) - Lesson 54

Local Geography, cont.

Materials: geography journal

→ INTRO

Continue learning more about your own local geography. Possible activities include:

- Borrow library books about your own province, region, or city.
- Explore the local history section of your local library. Many libraries and

Term 3

- museums have permanent displays of local history.
- Learn more about a particular natural feature near where you live.
- Go on a nature walk near where you live.
- Make a detailed map of your town or neighbourhood.
- Spend extra time on the map of your own province or territory.
- Add additional information to your geography journal.

WEEK 4 ☐ 20m Geography: Grade 3 (Canada) - Lesson 55 *Industry and Economy*

☐ Materials: My Map of Canada, geography journal

→ INTRO

As you've learned, Canada is a large and varied country with many different regions. These regions have different ecosystems, weather patterns, and natural resources. Natural resources are materials or substances (living and non-living) that can be found in nature in a particular place and are used by people for energy, construction, and sustenance. Some examples are: trees, minerals, crops, fish, water, metal, oil, gas, etc.

Today we are going to learn about some of the different industries that support the economies of Canada's many regions. Industries belong to one of three types of sectors:

1. Primary resource sector: these are the industries that deal directly with natural resources, such as fishing or mining.
2. Secondary resource sector: these are the industries that manufacture or convert a natural resource into a usable product, such as lumber manufacturing, automobile parts, or clothmaking.
3. Tertiary (sometimes called service) sector: these are businesses that provide services or sell goods.

→ MAP QUESTIONS

☐ Map Resource: Canada's Regional Economies

∞ Map Link: Canada's Regional Economies

Look at the interactive map on this page. It has divided Canada into seven regions: the Territories, British Columbia, Alberta, Saskatchewan, Ontario, Quebec, and the Atlantic region. For each region, discuss the following questions:

1. What industries are present in this region?
2. Which ones are part of the primary resource sector?
3. What natural resources does this region have?
4. Which industries are part of the secondary resource sector?
5. Which industries are part of the tertiary sector?
6. Can you think of specific examples of industries in each of these sectors? For example, if farming is an industry, discuss the specific types of farms that might be found in that region.

→ NOTEBOOK

Enter information about each region's industries into your geography journal. Add symbols representing various industries to My Map of Canada or onto the individual province and territory maps. You will be able to work through these questions and activities over two lessons.

WEEK 4 ☐ 20m Geography: Grade 3 (Canada) - Lesson 56 *Industry and Economy, cont.*

☐ Materials: geography journal

→ NOTEBOOK

☐ Map Resource: Canada's Regional Economies

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

∞ Map Link: Canada's Regional Economies

Continue to work through the questions about Canada's various industries from the last lesson.

WEEK 5 20m Geography: Grade 3 (Canada) - Lesson 57

The Oceans

📄 Materials: globe, geography journal

→ INTRO

If needed, students can use the globe to answer these questions.

Can you name the four (4) oceans of the world? (Atlantic, Pacific, Indian, Arctic)

How about the seven (7) continents? (North America, South America, Europe, Asia, Africa, Australia/Oceania, Antarctica)

→ MAP QUESTIONS

📄 Map Resource: globe

1. Which continents touch the Pacific Ocean? (Australia, Asia, North America, South America, and Antarctica)

2. Which oceans touch the Pacific Ocean? (Arctic, Atlantic, and Indian)

You should recognize that continents drain to more than one ocean. You should also see that all oceans are connected.

→ MAP WORK

Label the continents and the oceans on My World Map (if you don't already have a copy in your geography journal, you can print one at the link below).

∞ Map Link: Blank World Map

WEEK 5 20m Geography: Grade 3 (Canada) - Lesson 58

The Oceans, cont.

📄 Materials: none

→ MAP QUESTIONS

📄 Map Resource: Canada's Mountain Regions

∞ Map Link: Canada's Mountain Regions

1. Where are the major bodies of water where rivers empty? (Atlantic Ocean, Pacific Ocean, Arctic Ocean, Hudson's Bay)

2. If you poured water on the Laurentian Highlands, where would it flow to? (the Gulf of St. Lawrence/Atlantic Ocean on one side and Hudson's Bay on the other side)

3. Ask the same question of all of the mountain ranges on the map, and follow the flow of water. Notice that water will tend to flow in two directions. The point of separation between one direction and the other is called a "watershed."

WEEK 6 20m Geography: Grade 3 (Canada) - Lesson 59

Gulfs and Bays

📄 Materials: world wall map or globe, My Map of Canada

→ MAP QUESTIONS

📄 Map Resource: North American map; world wall map or globe

∞ Map Link: Map of North America

1. Locate the Gulf of Alaska, Hudson Bay, and Baffin Bay.

2. Do you notice any differences between the bays and the gulf? (The gulf is more "open" or wider.)

3. Can you find any more gulfs or bays on this map? (the Gulf of Mexico and the Chesapeake Bay)

4. Take a few minutes to look at your world wall map or globe. See if you

★ TEACHER NOTE

This lesson may be a repeat from Grade 2, but encourage students to find other gulfs and bays, perhaps using Google Maps to find less well-known ones.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

can find other bays or gulfs.

5. What did you notice about the differences between them? (You may notice that some bays look like gulfs, and some gulfs look like bays. Typically, bays are smaller than gulfs. Both bays and gulfs are portions of larger bodies of water that extend into the land. They also have wide mouths where they join the larger body of water, but gulfs can sometimes have narrow mouths as well, like the Persian Gulf. The Bay of Biscay, north of Spain and France, is actually a gulf.)

6. Read the following definition: National Geographic defines a bay as “a body of water partly surrounded by land. A bay is usually smaller and less enclosed than a gulf. The mouth of the bay, where [it] meets the ocean or lake, is typically wider than that of a gulf.”

→ MAP WORK

📄 Map Resource: My Map of Canada

1. Label Baffin Bay and the Gulf of St. Lawrence on your map.
2. Draw and label any other bodies of water that are of interest, using the Map of North America as a resource.

WEEK 6 📅 20m Geography: Grade 3 (Canada) - Lesson 60

Model of Bay

📄 Materials: pan, water, large rock(s)

→ MODEL

Before doing this demonstration, how do you think waves from the ocean are different from waves from a bay? (Ocean waves are large, and bay waves are small.)

1. Cover the bottom of a shallow pan with water—maybe halfway up.
2. Blow across the pan and watch the waves.
3. Next, place a big rock or other object in the pan so that it rises above the water.
4. Now, blow across the pan where the object is now in the waves.
5. Does the size or chopiness of the waves differ between open water wind and obstructed wind?
6. Add a sketch to your journal diagramming ocean waves versus bay waves.

★ TEACHER NOTE

If you have already done this activity in Grade 2 Geography, you can use the day to catch up.

WEEK 7 📅 20m Geography: Grade 3 (Canada) - Lesson 61

Map Labelling

📄 Materials: blank copy of Canada Map (from Lesson 49)

→ MAP WORK

See how many provinces, territories, capitals, and bodies of water your student can identify and label the Canada Map (parents/teachers can act as scribes for the spelling and writing).

WEEK 7 📅 20m Geography: Grade 3 (Canada) - Lesson 62

Indigenous Place Names

📄 Materials: "Coming Home to Indigenous Place Names in Canada" map

PREP: Download a PDF of the "Coming Home" map. This is a highly detailed map, best viewed zoomed in on a computer monitor.

∞ PDF Link: "Coming Home" Map

→ INTRO

The land we call Canada existed long before 1867 and the drawing of provincial and territorial boundaries. While many places in Canada derive their names from Indigenous languages, previous names for places have been preserved largely through oral histories. Today's lesson will

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

introduce you to the "Coming Home to Indigenous Place Names in Canada" map, a recent project that maps Canada with Indigenous place names.

→ MAPPING ACTIVITY

Spend the lesson time today studying the "Coming Home" map. How does this map look different from the map of Canada in your atlas? Look up places near where you live, or places you've visited. What different types of information gave places their names? Make a list of some of your favourites.

WEEK 8 20m Geography: Grade 3 (Canada) - Lesson 63

Indigenous Place Names, cont.

Materials: "Coming Home" map, Native Land map

→ MAPPING ACTIVITY

Today's lesson gives you additional time to explore the "Coming Home" map. Additionally, you can explore the Native Land map, which allows users to learn about the history of Indigenous territories, languages, and treaties for any address. (Note: the "Classic Map" view is more accessible for younger students than the "Constellation Map.")

∞ Map Link: Native Land Map

WEEK 8 20m Geography: Grade 3 (Canada) - Lesson 64

Ottawa

Materials: My Canada

→ INTRO

Have you ever been to Ottawa, Ontario? If so, what do you remember about your time there? Let's spend some time looking at a map of it.

→ MAP QUESTIONS

Map Resource: Ottawa Map

∞ Map Link: Ottawa Map

1. What river runs through Ottawa? (The Ottawa River. Students might notice the Rideau Canal as well.)
2. What do you notice about the river? What does it separate? (The river forms the border between Ontario and Québec. The Québec side of the river across from Ottawa is called Gatineau.)
3. What do the green areas represent? (parks and open areas)
4. What do the red parts represent? (major points of interest)
5. Can you find the Parliament Building on the map? What about museums?
6. What else can you find on the map?

→ VIEW & DISCUSS

1. Learn more about some of Ottawa's major sites.

∞ Video Link: Ottawa Destination (Note that between 2:15-2:32, there are images of wine during the culinary section.)

2. Why was Ottawa chosen as Canada's capital city?

∞ Video Link: The Selection of Ottawa as the Capital of Canada

WEEK 9 20m Geography: Grade 3 (Canada) - Lesson 65

Canada's Parliament

Materials: geography journal

→ INTRO

I wonder who makes the laws for our country—all 10 provinces and 3 territories? Where do they meet?

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

→ VIEW, NARRATE, & DISCUSS

∞ Video Link: What is Parliament?

∞ Video Link: Who are Parliamentarians?

∞ Video Link: Explore the House of Commons at West Block

∞ Video Link: Explore the Senate of Canada Building

→ ACTIVITY

Look up who your Member of Parliament is. Enter that information in your geography journal, as well as interesting information from the videos.

WEEK 9 20m Geography: Grade 3 (Canada) - Lesson 66

Prime Minister

📄 Materials: none

→ INTRO

How does someone become the Prime Minister? What tasks are part of the job of the Prime Minister? Where does the Prime Minister work?

→ VIEW, NARRATE, & DISCUSS

∞ Video Link: What is Responsible Government

∞ Video Link: The Prime Ministers

∞ Link: The Prime Ministers of Canada

★ TEACHER TIP

PREP for next week's lesson: You will need to go to the grocery store with your student and find produce with labels showing where they were grown. Read Lesson 67 for more clarity.

WEEK 10 20m Geography: Grade 3 (Canada) - Lesson 67

Where is My Food From?

📄 Materials: globe or world wall map, Atlas of Canada

PREP: Go to the grocery store before class and make sure to find fresh fruit or vegetables with labels showing where they were grown.

→ INTRO

Have you ever wondered where the food you eat at home was grown or raised?

→ MAP QUESTIONS

📄 Map Resource: globe or world map

📄 Map Resource: Atlas of Canada

1. Locate each place on the world or Canadian map where one of your fruits or vegetables grew. (You can do this by looking at the label to see where it was grown.)
2. How far did each one travel to get to your local grocery store or farmers' market? (This is a good opportunity to practice using the scale bar on the map.)
3. If it came from very far away, when do you think it was harvested? (Think calendar time as well as stage of ripeness.)
4. Write the fruits and vegetables in your geography journal, along with where they were grown.

★ TEACHER TIP

PREP for next week's lesson: You will need a local map for the next lesson.

Have your child go to the local farmers' market or vegetable stand with you to help pick out fresh fruit and vegetables. Ask the farmer where their farm is, and make a note of it. Read the next lesson for more clarity.

WEEK 10 20m Geography: Grade 3 (Canada) - Lesson 68

Where is My Food From?

📄 Materials: local map

PREP: Have your child go to the local farmers' market or vegetable stand with you to help pick out fresh fruit and vegetables. Ask the farmer where

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

their farm is and make a note of it.
Use a local map to find where the local farmers' market food is grown.

→ MAP QUESTIONS

□ Map Resource: your local map

1. Locate each city or rural area where your fruit or vegetables grew. (You will have to ask the farmer at the market stand and take note of it.)
2. How far did each one travel to get to your local vendor or farmers' market? (You may use the map scale bar for this.)
3. When do you think it was harvested?
4. Write the fruits and vegetables in your geography journal, along with where they were grown.

WEEK 11 □ 20m Geography: Grade 3 (Canada) - Lesson 69

Physical Map vs. Political Map

□ Materials: blank Canada Map (from lesson 34)

→ MAP QUESTIONS

□ Map Resource: Political Map of Canada

∞ Map Link: Political Map of Canada

□ Map Resource: Physical Map of Canada

∞ Map Link: Physical Map of Canada

1. Compare the physical and political maps.
2. What do you notice that is different on the political map? (Answers will vary, possibly noticing things like different colored boundary lines, dotted lines between states, capital cities, and other major cities are shown.)
3. If they didn't notice province or territory borders, point those out. Have you ever driven on a highway and seen a sign saying you are entering a province or territory? You were crossing a border but were not able to see the line.
4. Looking at the physical map, does Canada look more broken up or less broken up compared to the political map? (The physical map allows you to see the country more as a whole than as separate units.)

→ MAP WORK

In the time remaining, see how many provinces, territories, capitals, and bodies of water your student can identify and label the Canada Map (parents/teachers can act as scribes for the spelling and writing).

WEEK 11 □ 20m Geography: Grade 3 (Canada) - Lesson 70

Catch-Up Day

→ CATCH UP

Use this time to catch up on lessons in this or another course, or explore Extra Helpings.

WEEK 12 □ 20m Geography: Grade 3 (Canada) - Lesson 71

Exam Week

→ EXAMS

Answer question(s) related to course.

Questions will come from:
activities and models from the term

WEEK 12 □ 20m Geography: Grade 3 (Canada) - Lesson 72

Exam Week

→ EXAMS

Answer question(s) related to course.

Geography: Grade 3 (Canada)

[Click THIS text or scan the QR code for links.](#)

Term 3

Questions will come from:
activities and models from the term

Geography: Grade 3 (Canada)

Examination

Term 1

- The Kids Book of Canada and My Canada: Imagine you are taking a trip to Prince Edward Island from another part of Canada. How would you get there? What kinds of things would you expect to see? What are some things that make islands special?
- Canada Wild: Tell what you remember about one of Canada's endemic animals that you learned about this term: Sable Island sweat bee or Newfoundland pine marten. What does it look like? Where does it live? What does it eat?

Term 2

- The Kids Book of Canada and My Canada: Imagine you are taking a trip to Nunavut from another part of Canada. How would you get there? What kinds of things would you expect to see? What are some things that make the Arctic region of Canada special?
- Canada Wild: Tell what you remember about one of Canada's endemic animals that you learned about this term: collared lemming, wood bison, or Peary caribou. What does it look like? Where does it live? What does it eat?

Term 3

- Tell what you know about bays, gulfs, and harbors. OR Tell what you learned about Ottawa and Canada's Parliament.
- Tell about your sound map from the beginning of the term. How did you make the map, and what do you remember from it?
