About the Course

This course includes the following topic(s): U.S. History: Grades 4-6, World History: Grades 4-6

About U.S. History: Grades 4-6

Read United States history stories from the current history cycle (1800-1900). View images and reference atlases and maps to set the people and events in their time and place. Update History Charts as appropriate for student level.

About World History: Grades 4-6

Through the reading of history stories and biographies, students experience what life was like in different times and places. They are exposed to the everyday experiences as well as the major events from our current history cycle (1800-1900). Students will also view images, reference maps, and work on their century charts and Book of Centuries as part of their lessons.

Placement & Combining Tips

U.S. History: Grades 4-6

This course is the same for 4th-6th graders. In grade 5, students may begin their Book of Centuries.

World History: Grades 4-6

How To Teach

Prepare

- Read through the lesson and gather any materials or find any necessary links.
- If you have not already read the book, you may want to read the selected pages in advance.

Recap

- Connect to previous lessons by asking students to recall where they left off.
- If students have difficulty recalling, teachers might try showing them a picture from the reading, sharing something the teacher remembers, or prompting them with the first sentence of the last reading. This will often refresh their memory enough to allow them to recall.
- If students still cannot recall anything from the last reading, teachers might consider continuing anyway (with a shorter reading this time) or repeating the previous lesson, depending on the reading and the nature of the book.

Introduce

- Use a picture, map, or engaging question to pique the student's interest in the day's lesson.
- If necessary, you may talk about one or two unfamiliar words that will be crucial to understanding.

Read

- Read the day's passage out loud. When reading to pre-readers, point to the words as you read, even if it seems like they aren't paying attention.
- Move at the student's pace for the lesson time rather than a particular number of pages. It is vitally important that teachers not try to 'force feed' a student more than they can consume in one sitting.
- Students who have a difficult time sitting still or listening may benefit from a fidget of their choice, such as a piece of putty or clay or an afghan; flexible positioning, such as a wobble seat or inverted sitting; or sensory modulation, such as a weighted vest or blanket or adjustment of light, temperature, or sound.

Narrate

- Have students retell the passage orally.
- Alternatively, learners may use words, pictures, Legos, dolls, etc., to process and convey ideas in the manner most natural to them.
- Teachers may take turns to model.
- Narration is a complex skill requiring the coordination of several parts of the brain. If a student struggles to narrate in general, with a specific subject or book, or on one day but not others, then this is an opportunity to learn. Observe when they struggle with this or any other activity today. Notice facial expressions and body language; listen to what they say about why it is hard or how they feel about it. Take note of these observations for later, tell them that you see how hard they

are working, and then offer whatever support they need to end on a positive note. If necessary, take a break for the day.

Discuss

- Give the student an opportunity to share thoughts on the lesson and any connections made.
- To stimulate discussion, you could ask them what they thought about the passage or ask an open-ended question.

Term 1

WEEK 1 25m U.S. History: Grades 4-6 - Lesson 1

A Duck, A Dog, and a Deal

Materials: SeaMan: The Dog Who Explored The West With Lewis & Clark

→ PREP

1. Please note that a few of the chapters will be skipped for the sake of time. You can encourage your student to read those chapters outside of lesson time.
2. You may want to read the introduction to get some more background knowledge about the book.

→ INTRO

This year, we are studying the history of the United States from 1800-1900. President Thomas Jefferson acquired a large amount of land west of the Mississippi for \$15 million through the Louisiana Purchase from France. He chose Meriwether Lewis to head an expedition to explore this area. Along with William Clark and a select group of men, a dog named Seaman joined the expedition. We learn about this dog in the journals of Lewis and Clark. For a long time, people thought the name of the dog was Scannon because it was hard to read the handwriting. Over the years, more information about Seaman has been found in the journals and other sources. That is what makes the study of history interesting—historians continue to find more evidence that adds to a fuller understanding of the past. The author wrote this story based on Lewis and Clark's journals, which were originally written with a quill pen!

→ LOCATE

Map Resource: Map at the back of the book

At the beginning of the book, Lewis is in Pittsburgh and then needs to meet Clark before heading to Fort Wood, where they will spend the winter before they begin their expedition. Trace this route on the map. What rivers will he be traveling along to get to the camp? [A: Ohio and Mississippi]

→ READ, NARRATE, & DISCUSS

p.1-11 "The huge black" - "lift their spirits."

- One of the goals of the expedition was to look for the Northwest Passage. Many thought there would be a direct water route across the continent that led to the Pacific Ocean. It was believed that this waterway could open a direct trade route between North America and Asia. Lewis and Clark were to find out and let President Jefferson know. Do you know if there is a direct water route from the Atlantic to the Pacific? You can look at a map to find out.

The Slave Auction, A Letter from a Schoolboy

Materials: William Wilberforce: The Freedom Fighter

→ INTRO

This book is about an Englishman named William Wilberforce (1759-1833) who was a member of Parliament, the lawmaking group in the government of Great Britain. The English had been part of the slave trade since 1662. In 1770, out of a total of one hundred thousand slaves a year

from West Africa, British ships transported more than half. English considered the slave trade inseparably linked with the wealth and national security of Great Britain. William worked tirelessly in Parliament to change the laws and abolish or get rid of the slave trade. As we learn about this remarkable man, we will also learn about what life was like in the late 1700s and early 1800s, what people were thinking or talking about, and how it was different from our lives today. We are mostly studying 1800-1900 this year, but this book begins a little earlier in 1759, when William was born.

When someone says they want to enter public service for their career, what do they mean? It usually means they want to get involved in government. It is important to know a little about the government of the United Kingdom (England, Scotland, Wales and Northern Ireland) since our book takes place in England. Parliament is the legislature or lawmaking group. The government leader, called the prime minister, is always a member of Parliament. This makes Britain different from the United States, which keeps Congress and the president in separate branches of government. Parliament is made up of two houses: the House of Lords and the House of Commons. You will read about William's entrance into public service.

→ INTRO

1. We are skipping chapter 4, but one important incident to note is that Sergeant Charles Floyd developed serious stomach pains. Lewis gave him different medications that he had brought with him. However, Floyd died at the age of 22. They held a funeral service for him on a hill overlooking a river and named it "Sergeant Floyd's Bluff." Many people now think he had appendicitis.

2. Trace the route down the Missouri River to the place where Sergeant Floyd died.

📄 Map Resource: Map at the back of the book

3. Another goal of the expedition was to establish relations with Native Americans. In today's reading, Lewis and Clark will meet the Sioux who live in what is now South Dakota. This is what President Jefferson said to the explorers about the Sioux: "On that nation, we wish more particularly to make a friendly impression, because of their immense power, and because we learn they are very desirous of being on the most friendly terms with us." PREP: We are skipping chapter 8 for the sake of time. Feel free to have your student read it on their own.

→ RECAP

What happened in the last chapter?

→ INTRO

1. We are skipping chapter 8. In that chapter, Seaman is back to normal and chases a 2000-pound buffalo through the campsite. The Corps of Discovery came to a fork in the Missouri River and needed to decide which way to go. They decided to take the southern river and came across many waterfalls that Lewis described as "the grandest sight I ever beheld." The water was falling over a cliff more than 80 feet high. They would have to portage (carry their boats overland) around the waterfalls. To lighten their load, they stored some of their supplies in a cache or hiding place in the ground that they would get on their way back.

When you think of Ireland, what comes to mind? Perhaps the story of St. Patrick. Ireland is often called the Emerald Isle because of its lush greenery. It is considered an enchanting place to visit.

∞ Image Link: The Cliffs of Moher

However, in the 1840s, tragedy struck Ireland that changed it forever. There was a terrible famine, and many people either died or left the country to go to America. Today, one-sixth of US citizens (43 million) identify their national background as Irish. What was it like to live in Ireland at this time? This book is a fictional account of an Irish family during that time and what they did to survive. It is hard to read about such a sad time in history and all the suffering that happened, but we also read about those who persevered and had hope for a brighter future. The author is from Ireland and has sequels to this book if you want to read more. Let's first learn about the geography of Ireland.

3. Which country is directly east of Ireland across the Irish Sea? [A: United Kingdom-England, Wales, Scotland]
4. What sea lies between them? [A: The Irish Sea]
5. What is the capital city of Ireland? [A: Dublin]
6. Now look at the link for the map of Ireland to answer the rest of the questions. Find Cork in the southern part of Ireland. The characters in this story live in Duneen, which lies in the region of Cork.
7. What river runs through Cork? [A: River Lee]

During this time in Ireland, people used turf to heat their homes and cook their food. Turf, also known as peat, was harvested from a bog, which is a kind of wetland. Here is a little more background information about the potato disease or blight. "Almost overnight, healthy green fields of potatoes turned black. Prior to the blight, many Irish families relied on potatoes as their primary food source. The average man ate 14 pounds of potatoes a day. Mixed with buttermilk, potatoes provided a nutritious diet for hard-working laborers. Ireland was unprepared for the recurring failure of the potato crop in the years 1845–1849. As it turned out, the crop failure was due to a fungus that was unknown at the time, which is now believed to have been *Phytophthora infestans*. Approximately 40 percent of the crop was lost in 1845; however, it did not lead to famine, as surplus from the previous year sustained the population along with some government relief. The next year's harvest was expected to be healthy and plentiful. However, in 1846, the blight returned to the potato crop in Ireland, and relief from the government in England was slow and inadequate. Soon disease and death spread across the country" (From Great Hunger Museum).

The potato plant grows underground. Potatoes are grown by planting seed potatoes—sprouted chunks of old potatoes—which form multiple new tubers underground, typically five to six per seed piece. Term 2

- Did you notice some of the unfamiliar words in this chapter—a ghile (p.23) and a stór (p.24)? Those words come from the Irish language, also known as Gaelic or Gaelige. The origins of the Irish language can be traced back to the 4th century AD, when it evolved from a common Celtic language spoken by the ancient Celts who lived in Ireland. When England took control of Ireland, the English language became more common than Gaelic, although some words have carried over.

Workhouses were built by the government before the famine as places of refuge for those who were unable to support themselves, often due to extreme poverty. A typical day inside a workhouse was to rise at 6 am, breakfast at 6.30 am, work until 12 noon, lunch break, and then work until 6 pm. Supper was served at 7 pm, with lights out at 8 pm. Husbands, wives, and children were separated as they entered the workhouse and could be punished if they attempted to speak to each other. An inmate's only possessions were his/her uniform, mattress, and blanket. Once a week, the inmates bathed, and the men shaved. The conditions were unsanitary, and the conditions were harsh because they didn't want people to go to the workhouses unless it was the last resort. However, during the famine, more and more people had no other choice.

History is complicated, and it is hard to simplify all the conflict that existed between Protestant England and Catholic Ireland at the time. The Acts of Union in 1800 that created the United Kingdom had declared that Ireland, a predominantly Catholic country, would be directly under British rule. Many farms in Ireland were owned by English absentee landlords. The Irish were, in effect, second-class citizens in their own country. This background will help you understand some of the hardships in this book and why England didn't provide as much help as it should have.

The author is showing the tension that existed in Ireland between the Irish Catholics and English Protestants.

You may be wondering why the Irish were so dependent on the potato and why they didn't have other crops. "Potatoes are not native to Ireland but likely originated in the Andes Mountains of Peru, South America. In the early 1500s, Spanish conquerors found the Incas growing the vegetable, which the Spanish called patata. They were taken back to Europe and eventually reached England, where the name changed to potato. About 1590, potatoes were introduced to Ireland, where farmers quickly discovered they thrived in their country's cool, moist soil with very little labor. An acre of fertilized potato field could yield up to 12 tons of potatoes, enough to feed a family of six for a year, with leftovers going to the family's animals. By the 1800s, the potato had become the staple crop in the poorest regions. More than three million Irish peasants subsisted solely on the vegetable, which is rich in protein, carbohydrates, minerals, and vitamins such as riboflavin, niacin, and Vitamin C. Irish peasants were actually healthier than peasants in England or Europe, where bread, far less nutritious, was the staple food" (from historyplace.com). Although the potato crop failed, some farmers in Ireland were still growing wheat, oats, barley, and other crops that were exported to England. That is why many Irish people blamed England for not helping them as much as they could have. You will read more about that in today's reading.

Here is the issue that the government was discussing: Would each new state enter as a free state or a slave state? Lincoln could sit back no longer. He now felt compelled to do what he could to oppose the spread of slavery. While many people stayed in Ireland hoping for an end to the famine, millions of people emigrated (to leave one's country to live elsewhere) to other places. Between 1845 and 1855, nearly 2 million people emigrated from Ireland to America and Australia, and another 750,000 to Britain. The Poor Law Extension Act, which made landlords responsible for the maintenance of their own poor, urged the landlords to pay for their tenants to leave the country. However, emigrating was not an easy solution. Ships were overcrowded, and many people died before reaching their new home. Disease spread quickly on board because people were packed in so close together. These ships became known as "coffin ships" because so many people died aboard them.
