

Math Lessons

Denison

About the Course

Complete Pre-Algebra course with video lessons taught by a veteran teacher. Pre-Algebra is designed for students entering 7th or 8th grade who would benefit from a solid review of arithmetic alongside a gentle introduction to algebra. It covers every essential pre-algebra topic with a strong emphasis on reinforcing arithmetic fundamentals, filling in any learning gaps, and building confidence as students transition into more abstract algebraic thinking. It is ideal for situations who need to revisit key arithmetic skills, strengthen problem-solving confidence, or bridge gaps before beginning Algebra 1. Despite its basic approach, the course covers all the essential topics needed for success in high school Algebra 1 and beyond.

This topic is included in the following course(s): Mathematics: Grade 7 (Denison)
