

Introduction to Engineering Lessons

About the Course

An elective in Physical Science, Introduction to Engineering develops thinking skills and practical experience that are applicable to any field of design/innovation, while incorporating historical context, modern developments, current events, and citizenship. This is a VERY hands-on course that requires independent interest in any form of design/innovation, including various fields of engineering and the skilled trades. The course provides guidance and flexibility for teachers and learners to adjust the course for personal needs and preferences.

This topic is included in the following course(s): Science: Introduction to Engineering

Placement & Combining Tips

The completion of Algebra 1 and Geometry are recommended for this course, as the experience will contribute to the learner's understanding, but they are not required.

Introduction to Engineering Lessons

☐ There are 2 sensitive terms used in Ch.2 of The Things We Make as part of a larger discussion on design bias. Teachers should review Lesson 1 before the start of the term.

- ☐ Carve out time to continue or establish the regular habit of spending time in nature, including the use of a nature journal, as appropriate.
- ☐ Obtain materials from the supply lists.
- ☐ Select a science book from the Alveary bookshelf for personal reading time, as appropriate.
- ☐ Bookmark or print Quick Links, as needed.

Term Prep & Teacher Tips

Introduction to Engineering Lessons

- ☐ Gather household items, typically easy for students to scavenge or teachers to obtain locally:
 - items with which to tinker by student choice; Basements, closets, thrift shops, and scrap exchanges are great places to find objects for tinkering
 - materials for projects by student choice; if you would like to have materials for the suggested Week 1 activity, obtain the optional supplies below
 - optional: 2-3 boxes uncooked spaghetti (Term 1 Week 1)
 - optional: all-purpose glue (Term 1 Week 1)
 - optional: uncooked spaghetti (Term 1 Week 1)
 - optional: S hook (Term 1 Week 1)
 - optional: plastic bucket (Term 1 Week 1)
 - optional: water or sand (Term 1 Week 1)
 - optional: uncooked spaghetti (Term 1 Week 1)
 - optional: kitchen scale(Term 1 Week 1)
 - optional: bathroom scale (Term 1 Week 1)
 - optional: 6-12" piece of wooden board (Term 1 Week 1)

SAMPLE

Introduction to Engineering Lessons

How To Approach

Introduce

- If starting a new book or a new topic in the book, then look at the title or a picture and take a moment to consider previous ideas and experiences.
- If continuing a previous reading, recap what was read previously. Often, the title of the book's section can help to draw out the main idea.

Read

- Read or do, as instructed in the lessons, making note of or flagging unfamiliar terms, interesting ideas, important dates, inspiring quotes, etc.
- Use supportive strategies and educational tools to reduce frustration and better engage the mind, as appropriate. These could include, but are not limited to, the use of eBooks, pictures, audio, read-aloud, buddy reading, colored reading strips, etc.
- As they read, learners record ideas in a notebook or binder using outlines, diagrams, graphic organizers, or other methods (or a combination of methods) that suit them. These recordings can be a helpful mechanism for remembering or a mini-narration to support understanding.
- If learners do not understand a word or concept, do not worry. Try reading over the passage again, studying a picture or diagram, connecting the idea to something from real life, or practicing chapter exercises. The lab/field work further supports major concepts from the text.

Narrate

- Process the ideas of the lesson by retelling, defining a concept, explaining the links in a chain of thought, etc. Do this orally or silently to yourself.
- Use words, pictures, outlines, etc.
- If a particular idea cannot be narrated, then read or examine the text again.

Discuss

- Consider with the teacher any thoughts, confusion, or concerns about the passage.
- If understanding is still uncertain, try rereading the passage or do some personal research on the topic.

Connect

- Follow any extra links, examine any sidebars in the text, or pursue additional reading, depending on student interest.

Term 1

WEEK 1 45m Introduction to Engineering Lessons - Lesson 1

How Engineering Works

Materials: The Things We Make

PREP: Read Teacher Tip

→ INTRO

From medieval cathedrals to modern soda cans, this book will help you grasp "the engineering method" and notice it working all around you. Note that during a discussion regarding bias in the design process (Ch.2), the author uses two terms that may be unfamiliar to you: porn - short for pornography; inappropriate, sexually-oriented media that treats people as material objects rather than whole persons. cisgender - a modern term used to describe people whose biological sex and sociological gender are aligned, as opposed to transgender.

→ READ, NARRATE, & DISCUSS

Introduction

→ PREPARE

Since an important aspect of engineering is tinkering and developing your intuition, spend some time looking for an item you'd like to work with on your Tinker Lab days. This could be a broken clock, coffee maker, soap dispenser, etc. Anything found in a closet or a thrift store that you can take apart and figure out without worrying your teacher is the perfect thing!

★ TEACHER TIP

There are two sensitive terms used in Ch.2, which some students may not be familiar with. The author only mentions them in a larger discussion about the impact of design bias. Nothing beyond the basic definitions provided in today's introduction is needed, but you may want to preview pp.30, 42 if you would like to understand the context or consider any additional discussion you would like to introduce.

• PLAN WEEKLY

- take a nature walk
- science free read

WEEK 1 45m Introduction to Engineering Lessons - Lesson 2

Tinker Lab

Materials: by student choice & notebook

→ INTRO

You have two days each week to tinker with found objects that you have permission to take apart, figure out, and attempt to put back together (or improve). Basements, closets, thrift shops, and scrap exchanges are great places to find objects for tinkering. When you finish with one object, simply find another!

→ TINKER

Take apart, figure out, and attempt to put back together (or improve). Record your observations.

WEEK 1 45m Introduction to Engineering Lessons - Lesson 3

Tinker Lab

Materials: by student choice & notebook

→ TINKER

Take apart, figure out, and attempt to put back together (or improve). Record your observations.

WEEK 1 45m Introduction to Engineering Lessons - Lesson 4

Engineering Literature

Materials: The Boy Who Harnessed the Wind

→ READ, NARRATE, & DISCUSS

Introduction to Engineering Lessons

[Click THIS text or scan the QR code for links.](#)

Term 1

about 20 pages or 1 chapter per week

WEEK 1 ☐ 45m Introduction to Engineering Lessons - Lesson 5

Flex Day

☐ Materials: Selected engineering literature, tinker/project supplies, or internet access

→ NOTE

Use this flex day to finish the week's reading or continue any hands-on activities. Or, you might read and narrate a current event (link below and in your Quick Links) or research an interesting engineering question that came to mind during a nature walk or drive around town, such as 'How do frogs jump so far?' or 'Why does that tall building look like it's tilting?' A fun TEDEd video is provided for inspiration.

WEEK 2 ☐ 45m Introduction to Engineering Lessons - Lesson 6

How Engineering Works

☐ Materials: The Things We Make

→ READ, NARRATE, & DISCUSS

Ch.1

• PLAN WEEKLY

- ☐ take a nature walk
- ☐ science free read

WEEK 2 ☐ 45m Introduction to Engineering Lessons - Lesson 7

Tinker Lab

☐ Materials: by student choice & notebook

→ TINKER

Take apart, figure out, and attempt to put back together (or improve). Record your observations.

WEEK 2 ☐ 45m Introduction to Engineering Lessons - Lesson 8

Tinker Lab

☐ Materials: by student choice & notebook

→ TINKER

Take apart, figure out, and attempt to put back together (or improve). Record your observations.

WEEK 2 ☐ 45m Introduction to Engineering Lessons - Lesson 9

Engineering Literature

☐ Materials: The Boy Who Harnessed the Wind

→ READ, NARRATE, & DISCUSS

about 20 pages or 1 chapter per week

WEEK 2 ☐ 45m Introduction to Engineering Lessons - Lesson 10

Flex Day

☐ Materials: Selected engineering literature, tinker/project supplies, or internet access

→ NOTE

Use this flex day to finish the week's reading or continue any hands-on
