About the Course

This course covers a variety of citizenship topics. Students spend the first term learning the art of asking questions as a means of relationship building. The second term focuses on government as students explore topics of government through a historical survey of Canada's Prime Ministers. The year finishes with a term of economics where students learn a variety of economic theories.

This topic is included in the following course(s): Citizenship: Grade 11 (Canada)

Placement & Combining Tips

Lessons are occasionally integrated with composition lessons. The book *The Prime Ministers: Canada's Leaders and the Nation They Shaped* will be read over two years (Grades 10 and 11). However, since this is the first year this book will be used, Grades 10 and 11 will have the same readings in 2026-2027.

How To Approach

Prepare

If you, the student, are learning at home, work to schedule a time with your teacher when you can complete the lessons from *Ourselves* or your Ethics reading together, as these lessons are much richer when shared and discussed.

Recap

Connect back to the previous lesson. (Optional for Current Events).

Introduce

For news sources: Scan the headlines first to get an overview, and then choose a story to read.

Read

Read the selection assigned or the news story chosen for the time assigned. For rich, dense, or more challenging books such as *Ourselves*, it is a good idea to read them aloud. Keep an eye out for quotes to put in your commonplace book or events or characters to put down in your Book of Centuries.

Narrate

Process and integrate your reading by narrating either orally or in writing. Some lesson plans will give you a suggestion of how best to narrate. To keep yourself on track, you might want to set a timer so you stop reading with enough time to narrate.

Connect

After your narration, think about how what you read connects to other subjects, other books, other things you've read or watched, or seen in the past or present. For current events, look up where events occurred on a map and ask questions together to discern the quality of the piece. (e.g., Are there sources cited? Is there an obvious bias? If so, what do other authors have to say on this subject? Are arguments supported by evidence? Is that evidence credible?) Consider reading an alternative perspective.

Citizenship Notebook

Record important ideas in your Citizenship Notebooks. Make a calendar of current events.

Teacher Note

These lessons are written directly to students, but to assist them throughout the year, please read through this section and the lesson plans so you are familiar with the instructions and flow of the lessons. You may also want to preview and choose which news sites to offer students.

Those educating at home might pick one lesson to read aloud (such as the Ethics readings on Cultural Engagement, Conscience, etc.) with their students to keep up the habit of oral narration and foster conversation and relationship and then simply give students these lesson plans and the rest of the books and check in with them throughout the term for conversation, support, and accountability.

It is valuable for those in a classroom setting to also have a mix of lessons, which students complete themselves silently, and others read aloud and narrated together. Classroom settings lend themselves well to additional discussion and sharing at the end of lessons, after everyone has narrated either together or independently in writing.

WEEK 1 40m Econ/Civics: Grade 11 (Canada) - Lesson 13

The Prime Ministers' Introduction and Sir John A. Macdonald

Materials: The Prime Ministers

→ INTRO

In his Introduction, J. D. M. Stewart recalls speaking to a group of high school students who could not recognize one of Canada's most well-known past Prime Ministers. How many can you name? What do you know about their time in office?

Stewart writes that if "we want to understand the country, it is imperative that we understand those who led it." This term, you will read the first half of his book *The Prime Ministers*, covering the years 1867-1963: nearly a century of Prime Ministers from John A. Macdonald to John Diefenbaker.

→ ANNOTATE

As your ability to read higher-level books in high school grows, it is helpful to learn new ways to interact with the text while you are reading to help you grasp what the author is saying. Non-fiction books are usually good candidates for annotating while you read. Maybe you want to underline the main ideas or interesting points. Maybe you want to put a question mark in the margin if something is unclear. Think about how to help yourself engage with the information in the book to make it your own. Recall what you learned in the previous term from *How to Mark a Book*.

∞ Article Link: *How to Mark a Book* by Mortimer Adler

Experiment with different ways to do that. Some students do best by recording themselves talking about the reading, while others may need to discuss the material with another person. Whatever you do, your annotations should help you to further solidify the main points or ideas in your mind. Write down any questions, comments, or connections that arise from your review of your annotations after reading. Try different ways and discuss your observations about what works well and what doesn't with your teacher.

Explore ways that might be most helpful for you as you read each week. Advances in technology make many more annotation options available to serve us and our various ways of processing. Some might do great with a pencil and a book, while others might benefit from colors, Post-its, or speech-to-text options.

For today, if you are new to this, start simply by putting a mark in the margin or a Post-it flag when you come across a main idea or an important point the author is making. For others who have been doing this already, see what new ways you might want to experiment with this term.

While reading *The Prime Ministers*, strive to make connections to ideas, events, and people you have come across in previous readings you have done. Each chapter gives a window into the period of Canada's history during which the particular Prime Minister served. They often faced similar issues, but addressed them quite differently.

As you read, also make notes of historical figures and events that are unfamiliar to you, and do further research on what interests you.

→ READ

p.ix-xi "A small anecdote illustrates" - "is to know ourselves."

p.1-12 "Sir John A. Macdonald" - "principal Father of Confederation."

- What were some of the major issues Macdonald addressed in his first term as Prime Minister?

Term 2

→ VIEW

With each new Prime Minister you learn about, look at their portrait reproduced in the photo pages between p.180 and 181.

→ NARRATE

Narrate in a way that helps you interact with the ideas in the reading. For some, that might be narrating orally or silently to yourself, in writing, by drawing a map, a diagram, or a picture, writing a diary/letter from the point of view of one of the historical figures, describing what happened, or writing a bulleted list of points and questions. For others, it might be helpful to make marks in the book as you read and then narrate as you look at what you marked in the chapter. Experiment and see what works well for you, and you can vary your approach week to week.

→ READ

p.99-102

→ DISCUSS AND/ OR WRITE

Discuss the charts on p.101 as they relate to immigration and supply and demand for labor.

→ INTRO

Entrepreneurship is essential to the economy. Two twentieth-century economists, Joseph Schumpeter and Israel Kirzner, contribute more to the conversation. In Chapter 2, you read how Kirzner suggests that entrepreneurs (and consumers) find ways around problems (p.55), and Schumpeter talks about creative destruction (p.158) - more on that in the finance section. Innovation brings about change, and entrepreneurs are change agents.

In the non-profit sector, innovation is about supporting a mission-driven vision that provides a product or service to supply a need. Think about this in the context of social needs or religious ministry; the organizations that support these areas can be for-profit or non-profit. Non-profit organizations also have business structures. Since the lesson discusses the idea of being employed by a business vs. setting up your own business, now is a good time to take a quick look at what that might mean for an entrepreneur in the ministry sector. Let's take a look at basic finance for nonprofits by watching a short video as an introduction to accounting and business practices.
